MIL-S-70703
AMENDMENT 1
7 July 1987

MILITARY SPECIFICATION

STRAND CAST STEEL, CARBON AND ALLOY,
FOR PROJECTILE APPLICATIONS

This amendment forms a part of Military Specification MIL-S-70703 dated 12 January 1987, and is approved for use by all Department and Agencies of the Department of Defense.

PAGE 9

4.6.6, After last sentence: Add "(See 6.4)"

PAGE 10

Section 6, add a new paragraph as follows:

"6.4 DI ratios. The munitions manufacturer should review the requirements of paragraph 4.6.6 to determine that the specified D.I. ratios will assure purchase of steel capable of consistently being heat treated to end item mechanical property requirements. The review should take into consideration the hardenability of the grade of steel selected for use, the heat treatment equipment and procedures being used and supplemental chemical and hardenability requirements imposed by the munitions manufacturer on the steel supplier. It is the responsibility of the munitions manufacturer to specify more restrictive D.I. transition material ratios when the munitions manufacturer determines a more restrictive chemical analysis variation for transition material is required."
