Ⓐ NOTES:

1. MATERIAL: Material shall be in accordance with ANSI B16.12.
2. COATINGS: Coatings shall be in accordance with ANSI B16.12 and shall be uncoated, coated with a bituminous composition or zinc coated as specified by the MS part number.
3. DIMENSIONS: All dimensions are in inches and shall be in accordance with ANSI B16.12.
4. THREADED ENDS: The threaded ends shall be in accordance with ANSI B16.12.
5. GENERAL:
   - (a) Referenced documents shall be of the issue in effect on date of invitations for bid or requests for proposal.
   - (b) For design feature purposes, this standard takes precedence over procurement documents referenced herein.
   - (c) The US Government has a Federal Supply Cataloging system which establishes approved item names to catalog and standardize items used within the government. The Federal Supply Cataloging System's approved item name may not be the same that is used in commercial or industrial organizations. Therefore, the government name and equivalent commercial name are listed here for fittings on this MS.

6. PART NUMBER. The MS part number is formed by combining the MS number with a dash after it, the size code number, the fitting style code letter and the coating identification number.

```
                                MS 90526 - XX X X
Size code number (see note 7)---------------┘  | |
Fitting style code number (see note 8)---------┘ |
Coating identification number (see note 9)-------┘
```

7. SIZE: The nominal pipe size and for offsets the offset dimensions are designated by two digits (see table IV).

TABLE IV. Code Number to Size.
