COMMERCIAL ITEM DESCRIPTION

EXTRACTS AND FLAVORS

The U.S. Department of Agriculture has authorized the use of this Commercial Item Description in preference to Federal Specification EE-E-911.

This Commercial Item Description (CID) covers extracts and flavors, packed in commercially acceptable containers, suitable for use by the Federal Government.

Salient characteristics.

Types.

Lemon flavor
Vanilla extract
Vanilla flavor, imitation
Orange extract
Orange flavor
Maple flavor, imitation
Rum flavor, imitation
Peppermint flavor, imitation
Banana flavor, imitation
Cherry flavor, imitation
Pineapple flavor, imitation
Brandy flavor, imitation
Black walnut flavor, imitation
Almond flavor, imitation
Rye flavor
Smoke flavor, imitation

All flavors shall be nonalcoholic (less than 0.5 percent ethyl alcohol).

Lemon flavor. Lemon flavor shall be a mixture prepared in the proportion of 20 volumes oil of lemon diluted with cottonseed oil to 100 volumes. Cottonseed oil shall be thoroughly refined, winterized, sweet, neutral, and free from sediment, off-flavors, and odors. The oil shall remain clear after being held for 5 hours at 32°F and shall have a free fatty acid content not to exceed 0.05 percent (as oleic) when tested in accordance with the Official Methods of Analysis of the Association of Official Analytical Chemists. Preservatives (antioxidants) suitable for food use may be added. The lemon flavor shall be free from rancidity. At a temperature of 65-70°F, the lemon flavor shall be transparent and free of sediment.

FSC 8950

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Vanilla extract. The vanilla extract shall be light brown to brown-black in color and free of sediment. Vanilla extract is the solution in aqueous ethyl alcohol of the savory and odorous principles extractable from vanilla beans. Vanilla extract may contain one or more optional ingredients such as glycerine, propylene glycol, sugar (including invert sugar), dextrose, and corn syrup (including dried corn syrup). Vanilla extract shall be prepared, without added flavoring or coloring, from properly cured vanilla beans. The product shall contain, in 10 milliliters (mL), the soluble material from not less than 10 grams (g) of vanilla beans, based on a maximum of 25 percent moisture, shall contain not less than 35 percent by volume of ethyl alcohol, and shall show a Wichmann lead number not less than 0.70. The strength of the extract in respect to the vanillin and vanilla resins, which shall be derived solely from the beans used, shall be not less than 0.15 percent for vanillin and not less than 0.09 percent for vanilla resins.

Vanilla flavor, imitation. The imitation vanilla flavor shall contain not less than 2.8 g of vanillin, or 0.94 g of ethyl vanillin, or alternatively, a blend of 1.4 g of vanillin and 0.47 g of ethyl vanillin, per 100 mL. Alcohol, glycerine, propylene glycol, or any combination of these shall be used in such an amount that the vanillin or ethyl vanillin will not crystallize out when the finished product is subjected to a temperature of 32°F for 8 hours. The product shall be artificially colored with caramel. No preservatives shall be added. The product shall have a pleasant flavor and odor. The vanillin and ethyl vanillin shall comply with purity requirements in the United States Pharmacopeia.

Orange extract. The orange extract shall be transparent and free of sediment at a temperature of 65-75°F. The extract shall be prepared from oil of orange and ethyl alcohol of proper strength. The extract shall contain not less than 80 percent by volume of ethyl alcohol and not less than 5 percent by volume of oil of orange.

Orange flavor. The orange flavor shall be a mixture prepared in the proportion of 20 volumes of oil of orange diluted with cottonseed oil to 100 volumes. The cottonseed oil shall be thoroughly refined, winterized, sweet, neutral, and free from sediment, off-flavors, and odors. The oil shall remain clear after being held for 5 hours at 32°F, and shall have a free fatty acid content not to exceed 0.05 percent (as oleic) when tested in accordance with the Official Methods of Analysis of the Association of Official Analytical Chemists. Preservatives (antioxidants) suitable for food use may be added. The finished product shall be free from sediment and rancidity.

Maple flavor, imitation. The imitation maple flavor and coloring ingredients, shall be stable products of quality that when a syrup is made from not less than 3-7/8 pounds of sugar dissolved in 1 quart of boiling water and flavored with 1/2 ounce of the imitation maple flavor, the resulting syrup will have a characteristic maple flavor and will not have a bitter, flat, weak, or medicinal flavor. The syrup color shall be light amber to medium amber as stated in the U.S. Standards for Grades of Table Maple Sirup.

Rum flavor, imitation. Imitation rum flavor shall be a homogenous solution composed of a blend of organic compounds, extractives, vanillin, sugar, and certified color in edible solvents; e.g., propylene glycol and water. The finished product shall have a characteristic rum flavor and aroma.

Peppermint flavor, imitation. Imitation peppermint flavor shall be a homogenous solution composed of a blend of organic compounds, extractives, propylene glycol, and water. The finished product shall have a characteristic peppermint flavor and aroma.

Banana flavor, imitation. Imitation banana flavor shall contain amyl acetate (or its equivalent artificial flavors), certified color, and water. The finished product shall have a characteristic banana flavor and aroma.

Cherry flavor, imitation. Imitation cherry flavor shall contain oil of bitter almonds, organic compounds, certified color, and water. The finished product shall have a characteristic cherry flavor and aroma.

Pineapple flavor, imitation. Imitation pineapple flavor shall contain organic compounds, pineapple extract, certified color, propylene glycol, and water. The finished product shall have a characteristic pineapple flavor and aroma.

Brandy flavor, imitation. Imitation brandy flavor shall contain organic compounds, essential oils, vanillin, propylene glycol, sugar, certified color, and water. The finished product shall have a characteristic brandy flavor and aroma.

Black walnut flavor, imitation. Imitation black walnut flavor shall contain organic compounds, essential oils, caramel color, and water. The finished product shall have a characteristic black walnut flavor and aroma.

Almond flavor, imitation. Imitation almond flavor shall contain almond oil, bitter (free from prussic acid), benzaldehyde, other organic compounds, and water. The finished product shall have a characteristic almond flavor and aroma.

Rye flavor. Rye flavor shall contain caraway oil, d-Carvone, other organic compounds, and water. The finished product shall have a characteristic caraway flavor and aroma.

Smoke flavor, imitation. Imitation smoke flavor shall contain natural wood flavors and be suspended in either water or partially hydrogenated soybean oil. The finished product shall have a characteristic wood smoke flavor and aroma.

Analytical requirements.

Chemical analysis shall be made in accordance with the following methods in the latest edition of the Official Methods of Analysis of the Association of Official Analytical Chemists:

Test	Source	Method
Fatty Acids (Free) in Crude and Refined Oils	Chapter: Oil and Fats Section: Fatty Acids	Titration
Lead Number (Wichmann) of Vanilla Extract	Chapter: Flavors Section: Vanilla Extract and Its Substitutes	Titrimetric

Contractor's certification.

By submitting an offer, the contractor certifies that the product offered meets the specified salient characteristics and requirements of this CID; conforms to the producer's own specifications and standards, including product characteristics, manufacturing procedures, quality control procedures, and storage and handling practices; has a national or regional distribution from storage facilities located within the United States, its territories, or possessions; and is sold on the commercial market. The Government reserves the right to determine proof of such conformance prior to the first delivery from point of origin and any time thereafter, up to and including delivery at final destination, as may be necessary to determine conformance with the provisions of the contract.

Regulatory requirements.

The delivered product shall comply with all applicable Federal and State mandatory requirements and regulations relating to the preparation, packaging, labeling, storage, distribution, and sales of the product in the commercial marketplace. All deliveries shall conform in every respect to the provisions of the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder.

Quality assurance.

When required in the solicitation, contract, or purchase order, the Processed Products Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, will determine the quality assurance of the extracts and flavors according to Processed Products Branch procedures. The product shall be examined and/or analyzed in accordance with applicable provisions in the CID, and when applicable, the United States Standards for Condition of Food Containers currently in effect on the date of the solicitation.

Preservation, packaging, packing, labeling, and marking.

The extracts and flavors shall be preserved, packaged, packed, labeled, and case marked in accordance with good commercial practice. Commercial labeling and packaging, as may be augmented by the solicitation, contract, or purchase order, shall be acceptable. Shipping containers shall comply with the National Motor Freight Classification or Uniform Freight Classification, as applicable.

For Department of Defense procurements.

The following requirements are applicable when specified by the contracting officer:

A. Commercial packaging. Eight ounces, one pint, one quart, or one gallon of product shall be packaged in accordance with good commercial practice.

B. Commercial packing. Twenty-four 8-ounce containers, twelve 1-pint or 1-quart containers, or four 1-gallon containers shall be packed in fiberboard boxes complying with Uniform Freight Classification or National Motor Freight Classification.

C. Export packaging. Eight ounces, one pint, one quart, or one gallon of product shall be packaged in glass or plastic containers in accordance with good commercial practice.

D. Export packing. Twenty-four 8-ounce containers, twelve 1-pint or 1-quart containers, or four 1-gallon containers shall be packed in a fiberboard box constructed, closed, and reinforced in accordance with Style RSC, Grade V3c, V3s, or V4s of PPP-B-636. Reinforcement shall be limited to nonmetallic strapping or pressure-sensitive adhesive, filament-reinforced tape.

E. Unit loads (commercial and export). Shipping containers shall be arranged in unit loads in accordance with MIL-L-35078. When unit loads are strapped, strapping shall be limited to nonmetallic strapping, except for Type II, Class F loads.

F. Labeling (commercial and export). Commercial labeling shall be acceptable.

G. Marking (commercial and export). Marking of shipping containers and unit loads shall be in accordance with MIL-STD-129.
