COMMERCIAL ITEM DESCRIPTION

YOGURT

The U.S. Department of Agriculture has authorized the use of this Commercial Item Description.

1. SCOPE.

1.1 This Commercial Item Description (CID) covers yogurt, packed in commercially acceptable containers, suitable for use by Federal, State, and local governments and other interested parties.

2. CLASSIFICATION.

2.1 The yogurt shall conform to the types and classes in the following list which shall be specified in the solicitation, contract, or purchase order.

Types and classes.

Type I - Yogurt (21 CFR 131.200)
Type II - Lowfat yogurt (21 CFR 121.203)
Type III - Nonfat yogurt (21 CFR 131.206)

Class A - Plain yogurt
Class B - Yogurt with fruit
Class C - Flavored yogurt
Class D - Yogurt with other food items

Beneficial comments, recommendations, additions, deletions, clarifications, etc., and any data which may improve this document should be sent to: Head, Food Quality Assurance Staff, Fruit and Vegetable Programs, Agricultural Marketing Service, U.S. Department of Agriculture, STOP 0243, 1400 Independence Ave., SW, Washington, DC 20250-0243 or telephone (202) 720-9939 or FAX (202) 690-0102.

FSC 8910

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

3. SALIENT CHARACTERISTICS.

3.1 Finished product: The yogurt shall comply with all applicable Federal regulations including those contained in 21 CFR 101.62 for food nutrient content claims for fat and 21 CFR 130.10 for foods named by use of a nutrient content claim and a standardized term.

3.1.1 Milkfat/solids (not fat) content: Before the addition of bulky flavors, yogurt shall contain:

Product	Milkfat/solids (not fat) content
Yogurt	Not less than 3.25 percent milkfat Not less than 8.25 percent milk solids not fat
Lowfat yogurt	Not less than 0.5 percent milkfat nor more than 2 percent milkfat Not less than 8.25 percent milk solids not fat
Nonfat yogurt	Less than 0.5 percent milkfat Not less than 8.25 percent milk solids not fat

3.1.2 Pasteurization/Homogenization: All dairy ingredients shall be pasteurized at a temperature of not less than 161°F (71.7°C) for a period of not less than 15 seconds, or for a time and at a temperature equivalent. All dairy ingredients may be homogenized, prior to the addition of the bacterial culture.

3.1.3 Vitamins A and D (optional): If added, all types and classes of yogurt shall contain not less than 2,000 IU of vitamin A per quart within limits of good manufacturing practice. If added, all types and classes of yogurt, shall contain 400 International Units (IU) of vitamin D per quart within limits of good manufacturing practice.

3.1.4 Heat treatment: All types and classes of yogurt are manufactured using live and active cultures. Yogurt may be heat treated after culturing is complete. This heat treatment destroys the live and active cultures. Unless otherwise specified in the solicitation, contract, or purchase order, the yogurt shall contain live and active cultures.

3.2 Quality specification:

3.2.1 Flavor: All yogurt types and classes shall have a clean, pleasing tangy, and acid flavor. All yogurt types and classes shall possess a pleasant, mild, aromatic flavor, and be free from undesirable flavors such as flat, bitter, rancid, or oxidized. Yogurt with fruit and flavored yogurt (e.g., strawberry, cherry, and strawberry cheesecake) shall have sufficient characterizing fruit or flavoring used to provide a distinct recognizable flavor level.

Check the source to verify that this is the current version before use.

3.2.2 **Body and texture:** The yogurt body and texture shall be thick and smooth; uniform; free from lumps, except for fruit; free from graininess; and without excessive whey separation.

3.2.3 **Color:** Types I, II, and III, Class A and D yogurt color shall be uniformly white to off-white and shall be free from mottling. Types I, II, and III, Classes A, B, C, and D shall be uniformly colored throughout and characterize the fruit, flavor, or other food items they represent.

3.3 **Analytical procedure:** Use USDA, AMS, Dairy Grading Branch procedures.

3.3.1 **Preparation of sample:** The selected samples shall be prepared individually according to the Official Methods of Analysis of the AOAC International, Method 955.30.

3.3.2 **Analytical testing:** Chemical analysis shall be made in accordance with the following methods described in the 16th Edition of Official Methods of Analysis of the AOAC International.

Test	Method
Milkfat	933.05
Solids (not fat)	990.21
Vitamin A	992.04

3.3.3 **Test results:** The test results for milkfat and solids (not fat) shall be reported to the nearest 0.01 percent. If added, the yogurt shall contain not less than 2,000 IU of vitamin A per quart. Any test result not conforming to the analytical requirements shall be cause for rejection of the lot.

4. REGULATORY REQUIREMENTS.

4.1 The delivered yogurt shall comply with all applicable Federal and State mandatory requirements and regulations relating to the preparation, packaging, labeling, storage, distribution, and sale of the yogurt within the commercial marketplace. Delivered yogurt shall comply with all applicable provisions of the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder.

5. QUALITY ASSURANCE PROVISIONS.

5.1 **Product conformance.** The yogurt provided shall meet the salient characteristics of this CID, conform to the producer's own specifications, standards, and quality assurance practices, and be the same yogurt offered for sale in the commercial market. The Government reserves the right to require proof of such conformance.

5.2 Quality assurance. All raw milk for pasteurization, condensed and dried milk, finished product and the plant in which the products are processed shall comply with all applicable requirements of the "Grade A Pasteurized Milk Ordinance - 1995 Recommendations of the United States Public Health Service, Food and Drug Administration, Publication No. 229" or latest revision thereof, or regulations substantially equivalent thereto. The raw milk for pasteurization, milk plant, and pasteurized milk and milk products each shall have a compliance rating of 90 or more as certified by a State Milk Sanitation Rating Officer and shall be listed in the "Sanitation Compliance and Enforcement Ratings of Interstate Milk Shippers." All testing shall only be done by milk laboratories approved by Federal and State agencies and listed in the previously mentioned document.

When required in the solicitation, contract, or purchase order, the Dairy Grading Branch shall determine the quality of the yogurt according to the requirements of this CID or applicable standards or specifications. The yogurt shall be examined or analyzed in accordance with applicable provisions in this CID, solicitation, contract, or purchase order, and, when applicable, the United States Standards for Condition of Food Containers in effect on the date of the solicitation.

6. PACKAGING.

6.1 Preservation, packaging, packing, labeling, and case marking. Preservation, packaging, packing, labeling, and case marking shall be as specified in the solicitation, contract, or purchase order.

7. NOTES.

7.1 Purchasers shall specify:

- Type(s) and class(es).
- Fruit desired for Types I, II, and III, Class B.
- Flavor desired for Types I, II, and III, Class C.
- Other food items desired for Types I, II, and III, Class D.
- Vitamins A and D, if added.
- Package size.
- Labeling requirements, if different from good commercial practice.

7.2 Purchasers may specify:

- Heat treatment.
- Chemical and microbiological testing.

7.3 Sources of documents.
