COMMERCIAL ITEM DESCRIPTION

KEY CHAIN, REEL (DOOR KEY AND DRILL CHUCK KEYS)

The General Services Administration has authorized the use of this commercial item description in lieu of Federal Specification RR-K-795A.

This commercial item description covers key chain reels and drill chuck key chain reel.

Salient characteristics:

1. Reel key chains shall be of the following types, as specified:

   Type I - Key ring, with belt loop.
   Type II - Key ring, with belt clip.
   Type III - Drill chuck key, with mounting plate.

2. Shall consist of case, spring, and chain.

3. Size of reel case, not less than 2 inches nor more than 2-1/2 inches in length, width, or diameter.

4. Size of key ring, not less than 1-1/2 inches in diameter.

5. Length of key chain, not less than 21-3/4 inches.

6. Spring shall be of such length and tension as to reel in and support 8 tumbler type door keys or one drill chuck key against the case, as applicable.

7. End of chain shall be provided with a swivel or other device to prevent chain from twisting.

8. Type III reel shall be furnished with a self-ejecting safety key, Jacobs K3 size.

Workmanship. Reel key chains shall be free from defects such as sharp edges, loose plating, burrs, pits, rust, or any other defects which adversely affect their serviceability.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Recovered materials. The manufacturer shall utilize recovered materials to the maximum extent practicable.

Packaging, packing, and marking. The packaging and packing shall be in accordance with normal commercial practice and shall assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with the National Motor Freight Classification and Uniform Freight Classification. Marking shall be as specified in the contract or order.
