COMMERCIAL ITEM DESCRIPTION

SOAP, TOILET (FOR SOFT AND HARD WATER USE)

The General Services Administration has authorized the use of this Commercial Item Description in lieu of Federal Specification P-S-617.

This Commercial Item Description covers a detergent or soap-detergent combination bar.

Salient characteristics:

Characteristic	Requirement	Test Method
Moisture	max. 13.0%	ASTM D820 # 5,6
Synthetic detergent	min. 25.0%	ASTM D820 # 46
Sum of soap and synthetic detergent	min. 60.0%	ASTM D820 #9-12, 46
Free alkali (as NaOH)	max. 0.1%	ASTM D820 #7-8

The issue of ASTM D820 in effect on the date of the solicitation shall be used to determine compliance with these requirements.

The bars shall be milled and mildly perfumed.

NOTE: Purchasers should specify the bar weight required.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description, and that the product conforms to the producer's own drawings, specifications, standards and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to the first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Packaging, packing and marking. The soap bars shall be packaged in accordance with normal commercial practice and packed in fiberboard boxes that will assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling and storage. The shipping container shall be in compliance with National Motor Freight Classification and Uniform Freight Classification. Shipping containers shall be marked as specified in the contract or order.

ASTM Standards are available from the American Society for Testing and Materials, 1916 Race Street, Philadelphia, PA 19103.
