TABLE II. Group qualification. 1/, 2/

Group	Submission and qualification of any of the following connectors	Qualifies the following connectors
I	M39012/04-X001	M39012/04-X001
II	M39012/04-X002	M39012/04-X002
III	M39012/04-X003	M39012/04-X003

1/ If a connector manufacturer produces a connector which meets all the requirements for two or more connector PIN (within the same series), the manufacturer may receive qualification approval for two or more connector PIN by qualifying the one connector. It is not necessary that such connectors be in the same group. Each connector, however, must be marked with its own appropriate PIN. For group qualification, the connectors must be of similar design.

2/ Connectors of the same body material and finish may only qualify connectors of the same body material and finish.

TABLE III. Cross-reference of PIN's.

Preferred PIN	Substitute for PIN or type designation 1/
M39012/04-0001	MS90531-680A
M39012/04-0002	UG-58/U
M39012/04-0003	--

1/ The superseded PIN or the type designation is for cross-reference only. Where a superseded PIN or type designation is not given, none was assigned or will be assigned. The PIN M39012/04-XXXX shall be used in all cases for marking and identifying the connector.
