4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or order, the supplier may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

4.2 Classification of inspection. The inspection requirements specified herein are classified as follows:

1. First article inspection (see 4.3).
2. Quality conformance inspection (see 4.4).

4.3 First article. When a first article is required, the bakery plant shall be examined as specified in 4.4.2. Any missing component shall be cause for rejection of the first article.

4.4 Quality conformance inspection. Except as otherwise specified herein, sampling for inspection shall be performed in accordance with the provisions set forth in MIL-STD-105.

4.4.1 Component inspection. In accordance with 4.1 above, components shall be inspected and tested in accordance with all the requirements of referenced specifications, drawings, and standards unless otherwise excluded, amended, modified, or qualified in this specification or applicable purchase document.

4.4.2 End item inspection. Each portable bakery shall be examined to determine that there are no missing components. Any missing component shall be cause for rejection of the end item.

4.4.3 Inspection of preparation for delivery. An inspection shall be made to determine compliance with the preparation for delivery requirements in accordance with MIL-B-2316.

5. PREPARATION FOR DELIVERY

5.1 Preservation and packaging. Preservation and packaging shall be level A or C as specified (see 6.2).

5.1.1 Levels A and C. Each bakery plant shall be preserved and packaged in accordance with the applicable requirements of MIL-B-2316.

Source: https://assist.dla.mil -- Downloaded: 2026-10-21T21:10Z
Check the source to verify that this is the current version before use.

5.2 Packing. Packing shall be level A, B or C as specified (see 6.2).

5.2.1 Levels A, B and C. Bakery plants, preserved and packaged as specified in 5.1, shall be packed in accordance with the applicable requirements of MIL-B-2316.

5.3 Marking. In addition to any special marking required by the contract or order, interior packages and shipping containers shall be marked in accordance with the applicable requirements of MIL-B-2316.

6. NOTES

6.1 Intended use. The portable bakery plant covered by this specification is intended for use in the field for bread baking for 2500 men.

6.2 Ordering data. Procurement documents should specify the following:

(a) Title, number and date of this specification.
(b) When a first article is required (see 3.1).
(c) Selection of applicable levels of preservation, packaging and packing (see 5.1 and 5.2).

6.3 Where an item is specified by trade name and is followed by the words "or equal" or "or equivalent", it is intended to indicate a supplier satisfactory to the Government and a quality level that must be met or surpassed by any supplier of an "or equal" or "or equivalent" item. In order to be considered equal or equivalent, a piece or item must be dimensionally and functionally interchangeable with the piece or item it is to replace.

6.4 First article. When a first article is required, it shall be inspected and approved under the appropriate provisions of ASPR 7-104.55. The first article should be a preproduction sample, initial production item or other specific item described under the definition of a first article in the ASPR. The contracting officer should specify the appropriate type of first article and the number of units to be furnished.
