MIL-C-43339C
Amendment-1
31 December 1985

MILITARY SPECIFICATION

COVERALLS, INDUSTRIAL: LINT-FREE

This amendment forms a part of Military Specification MIL-C-43339C, dated 3 August 1983 and is approved for use by all Departments and Agencies of the Department of Defense.

PAGE 2

2.1, under "SPECIFICATIONS FEDERAL": Delete "A-A-203-Paper, Kraft, Untreated" and substitute "UU-P-268-Paper, Kraft, Wrapping."

Under "SPECIFICATIONS MILITARY": Delete "MIL-C-43487-Cloth, Taffeta, Polyester" and substitute "MIL-C-44121-Cloth, Twill, Polyester."

Under "STANDARDS FEDERAL": Add "FED-STD-191 - Textile Text Methods."

Under "STANDARDS MILITARY": Add "MIL-STD-147 - Palletized Unit Loads."

PAGE 3

3.2.1: Delete and substitute: "3.2.1 Basic material. The basic material shall be polyester twill cloth, conforming to MIL-C-44121. The material shall be dyed Tan 448 and shall be treated with an antistatic finish."

Add the following:

"3.2.1.1 Antistatic finish. The cloth shall be given a durable antistatic finish (see 6.6) so that the maximum resistivity of any one sample before laundering shall be 1.0×10^{11} ohms per square yard and the maximum resistivity of any one sample after five launderings shall be 5.0×10^{11} per square when tested as specified in 4.3. Only those chemical treatments already approved by the appropriate medical service and so listed herein (see 6.6) or in the invitation for bids or request for proposal shall be considered acceptable for the related procurement.

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

"3.2.1.2 ph. The pH value of the water extract of the finished cloth sh. be not less than 5.0 nor more than 8.5 when tested as specified in 4.3".

3.2.2, line 2, following "class 1,": Add "subclass A."

PAGE 6

Add the following:

"4.3 Component testing. The methods of testing specified in FED-STD-191, wherever applicable, and as listed in Table IV shall be followed. The physical and chemical values specified in section 3 apply to the results of the determinations made on a sample unit for test purposes as specified in the applicable test method. All test reports shall contain the individual values utilized in expressing the final result. The sample unit shall be 5 yards full width of the finished cloth. The sample size (number of sample units) shall be as shown in the table below. The lot size shall be expressed in units of 1 yard. The lot shall be unacceptable if one or more sample units fail to meet any test requirement specified.

Lot size (yards)	Sample size
800 or less	2
801 up to and including 22,000	3
22,001 and over	5

Table IV. Test Methods

Characteristic Antistatic Finish	Requirement paragraph	Test-Method
Before laundering	3.2.1.1	5930 1/
After 5 laundering	3.2.1.1	5556 2/ and 5930 1/
pH	3.2.1.2	2811

1/ Average of the three determinations to nearest 1.0 x 10^{11} ohms per square.

2/ Cotton laundering procedure.

PAGE 15

Table III, under respective columns for Size, X-Small, Medium, Large, X-Large and Tolerance: Add "Overall length 5/ - 64 1/2 - 65 1/2 - 66 1/2 - 67 1/2 - 68 1/2 - ± 1/2."

Following "4/": Add "5/ Measure from base of neck along center back to bottom of leg."

Add the following:

4.2.3 Palletization inspection. An inspection shall be made to determine that the palletization complies with the section 5 requirements. Defects shall be scored in accordance with the list below. The sample unit shall be one palletized unit load fully packaged. The lot size shall be the number of palletized unit loads in the inspection lot. The inspection level shall be S-1 and the AQL, expressed in terms of defects per hundred units, shall be 6.5.

Examine	Defect
Finished dimensions	Length, width, or height exceeds specified maximum requirements.
Palletization	Pallet pattern not as specified. Interlocking of loads not as specified. Load not bonded with required straps as specified.
Weight	Exceeds maximum load limits.
Marking	Omitted; incorrect; illegible; of improper size, location, sequence, or method of application.

5.2.1, line 10: Delete "A-A-203" and substitute: "type 1, grade B of UU-P-268."

5.2.2, line 5: Delete and substitute "to type CF, class domestic, variety DW, grade 275 of PPP-B-636."

5.2.2, line 1: Delete "A-A-203" and substitute "type 1, grade B of UU-P-268."

5.3, line 2, after "shipping containers": Add "and palletized unit loads."

Add new paragraph:

"5.4 Palletization. When specified (see 6.2), coveralls, packed as specified in 5.2, shall be palletized on a 4-way entry pallet in accordance with load type Ia of MIL-STD-147. Pallet type shall be type I (4-way entry), type IV, or type V in accordance with MIL-STD-147. Pallets shall be fabricated from wood groups I, II, III or IV of MIL-STD-731. Each prepared load shall be bonded with primary and secondary straps in accordance with bonding means K and L or film bonding means O or P. Pallet pattern shall be

PAGE 17 (Cont'd)

in accordance with load pattern number six in accordance with the appendix of MIL-STD-147. Interlocking of loads shall be effected by reversing the pattern of each course."

6.2: Add "e. When palletization is required (see 5.4)."

PAGE 18

Add the following:

"6.6 Supply source for antistatic treatment compound. The requirements for the durable antistatic treatment can be met with Aston 123, Onyx Oil and Chemical Company, 190 Warren Street, Jersey City, NJ 07302 and Stamax (not Stamax 116), Standard Chemical Products Company, Inc., 600 Sugar Creek Road, Charlotte, NC 28213."
