FEDERAL SPECIFICATION

ICE SCRAPER AND CHIPPER, SIDEWALK

This specification is approved by the Commissioner, Federal Supply Service, General Services Administration, for the use of all Federal agencies.

1. SCOPE

1.1 Scope. The sidewalk ice scraper and chipper covered by this specification is a long-handled tool for scraping, chopping, or removing ice or light snow from walkways. The sidewalk ice scraper and chipper covered by this specification shall be of one type as hereinafter specified.

1.1.1 Federal specification coverage. Federal specifications do not cover all varieties of the commodity indicated by the title of the specification, or which are commercially available, but are intended to cover only those generally used by the Federal Government.

2. APPLICABLE DOCUMENTS

2.1 Government documents. The following documents, of the issues in effect on date of invitation for bids or request for proposal, form a part of this specification to the extent specified herein:

Federal Specifications:

NN-H-81	- Handles, Ash, for Tools
PPP-P-40	- Preservation and Packing of Hand Tools; Tools and Tool Accessories for Power Driven, Metal and Woodworking Machinery

Federal Standards:

FED-STD-376	- Preferred Metric Units for General use by the Federal Government

(Activities outside the Federal Government may obtain copies of Federal specifications, standards, and Commercial Item Descriptions as outlined under General Information in the Index of Federal Specifications, Standards and Commercial Item Descriptions. The Index, which includes cumulative bimonthly supplements as issued, is for sale on a subscription basis by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.)

(Single copies of this specification, and other Federal specifications and Commercial Item Descriptions required by activities outside the Federal Government for bidding purposes are available without charge from General Services Administration Business Service Centers in Boston, MA; New York, NY; Philadelphia, PA; Washington, DC; Atlanta, GA; Chicago, IL; Kansas City, MO; Fort Worth, TX; Houston, TX; Denver, CO; San Francisco, CA; Los Angeles, CA; and Seattle, WA.)

(Federal Government activities may obtain copies of Federal standardization documents and the Index of Federal Specifications, Standards and Commercial Item Descriptions from established distribution points in their agencies.)

Military Standards:

MIL-STD-105	- Sampling Procedures and Tables for Inspection by Attributes

(Copies of military specifications and standards required by contractors in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

3. REQUIREMENTS

3.1 Illustrations. Illustrations herein are descriptive and not restrictive and are not intended to preclude the purchase of scrapers otherwise conforming to this specification.

3.2 Design. The scraper shall consist of a flat blade and a long, straight handle. It shall be of the dimensions specified herein, and shall be similar to figure 1.

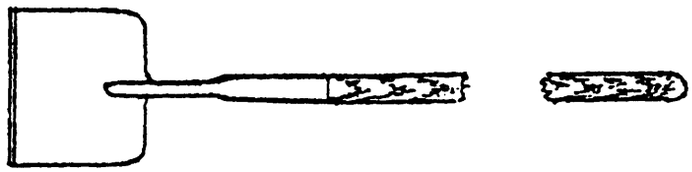

Figure 1. Sidewalk scraper.

3.3 Blade. The blade shall be high grade steel of uniform quality and free from hard spots. The socket for the handle shall be not less than 3-1/4 inches in depth. The socket and shank shall be forged integrally with the blade. The cutting edge of the blade shall be sharpened or beveled in accordance with good commercial practice.

3.3.1 Blade dimensions. The blade shall be not less than 6-7/8 inches wide and not less than 5-7/8 inches high. The blade thickness shall be not less than 3/32 inch at any point measured above the sharpened or beveled cutting edge.

3.3.2 Blade hardness. The blade shall be properly hardened to not less than 25 nor more than 45 on the Rockwell C hardness scale.

3.3.3 Finish. The blade and socket shall be free from burrs, cracks, or other detrimental defects. All edges shall be smoothly finished in accordance with good commercial practice.

3.4 Overall length. The overall length of the scraper shall be not less than 57 inches nor more than 65 inches.

3.5 Handle. The handle shall be of seasoned SA grade ash conforming to the requirements of NN-H-81. It shall be smoothly finished and covered with two durable coats of transparent lacquer, varnish, or wax, or one coat after surface treatment utilizing heat, such as flame-treating or charring. The coating shall be applied in a manner to permit visual inspection of the wood and prevent absorption of water.

3.6 Marking. Sidewalk scrapers shall be marked with the manufacturer's name or identifying symbol and the state or country of manufacture. The marking shall be engraved, etched, or stamped in such a manner that it will be permanent to the extent that it will remain clear and legible throughout the life of the item.

3.7 Workmanship. The sidewalk scrapers shall be free from rust, fins, burrs, or other imperfections which may impair their appearance, durability, or serviceability.

3.8 Metric product. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, provided they fall within specified tolerances using conversion tables contained in the latest revision of FED-STD-376, and all other requirements of this Federal Specification are met. If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch-pound units, a request should be made to the contracting officer to determine if the product is acceptable. The contracting officer has the option of accepting or rejecting the product.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract, the contractor may use his own or any other

facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirements.

4.1.1 Component and material inspection. In accordance with 4.1 above, the supplier is responsible for insuring that components and materials used were manufactured, tested, and inspected in accordance with the requirements of referenced subsidiary specification and standards to the extent specified, or, if none, in accordance with this specification.

4.2 Sampling procedures. Unless otherwise specified, sampling for inspection shall be performed in accordance with MIL-STD-105.

4.3 End item visual examination. The end items shall be examined for the defects listed in table I. The lot size shall be expressed in terms of blades heat treated as a batch or under the same process and control. The sample unit shall be one completely fabricated and assembled sidewalk scraper. The inspection level shall be II and the acceptable quality level (AQL), expressed in terms of defects per hundred units, shall be 4.0.

TABLE I. End item visual defects

Examine	Defect
Design	Not as specified
Material	Not fabricated from specified material
Finish	Dirt, grit, or foreign matter imbedded in finish Sharp burrs or slivers
Construction and Workmanship	Component part missing Not properly assembled Fractured, malformed, split, or otherwise impaired, affecting serviceability
Marking	Missing, incomplete, not legible; not permanent

4.4 End item dimensional examination. The end items shall be examined for the dimensions specified in 3.3, 3.3.1, and 3.4. The lot size shall be expressed in terms of blades heat treated as a batch or under the same process and control. The sample unit shall be one completely fabricated and assembled sidewalk scraper. The inspection level shall be II and the AQL, expressed in terms of defects per hundred units, shall be 4.0. Any deviation from the specified dimensions shall constitute a defect.

4.5 Test methods. The end items shall be tested as specified in 4.5.1. The lot size shall be expressed in terms of blades heat treated as a batch or under the same process and control. The sample unit shall be one sidewalk scraper blade. The inspection level shall be II and the AQL, expressed in terms of defects per hundred units, shall be 4.0.

4.5.1 Hardness test. Each sample sidewalk scraper blade shall be tested for the characteristics specified in 3.3.2. Hardness tests shall be performed prior to the application of paint. Care should be exercised in supporting the blade so that no movement will occur and the surface under test will be horizontal, whereby accurate readings may be obtained. Any reading not within specified values shall be classified as a defect.

4.6 Inspection of preparation for delivery requirements. An inspection shall be made to determine that the preservation, packaging, packing, and marking comply with the requirements in section 5 of this specification. Defects shall be scored in accordance with table II. The lot size shall be the number of shipping containers in the end item inspection lot. The inspection level shall be S-2 and the AQL, expressed in terms of defects per hundred units, shall be 4.0.

Check the source to verify that this is the current version before use.

TABLE II. Classification of preparation for delivery defects

Examine	Defect
Marking (exterior and interior)	Omitted; incorrect; illegible; improper size, location, sequence, or method of application
Materials	Any component missing, damaged, or not as specified
Workmanship	Inadequate application of components such as incomplete closure of container flaps, loose strapping, inadequate stapling Distortion of container
Contents	Number per container is more or less than required Net weight exceeds requirements

5. PREPARATION FOR DELIVERY

5.1 Preservation, packaging, packing, and marking. Preservation, packaging, packing, and marking shall be in accordance with PPP-P-40. The level of preservation, packaging, and packing shall be A, B, or Commercial, as specified (see 6.1).

6. NOTES

(This section contains information of a general or explanatory nature that may be helpful, but is not mandatory.)

6.1 Acquisition requirements. Acquisition documents must specify the following:

a. Title, number, and date of this specification.
b. Levels of preservation, packaging, and packing required (see 5.1).

MILITARY INTERESTS:

Military Coordinating Activity:

None: DoD has waived coordination on revisions and amendments to this Federal Specification until further notice.

PREPARING ACTIVITY:

GSA - FSS
