GGG-S-0065B(GSA-FSS)
AMENDMENT-1
August 16, 1976
SUPERSEDING
Interim Amendment-3
June 11, 1964

AMENDMENT

TO

INTERIM FEDERAL SPECIFICATION

SAWS, HAND

This amendment was developed by the General Services Administration, Federal Supply Service, Washington, DC 20406, based upon currently available technical information. The General Services Administration has authorized the use of this amendment as a valid exception to Interim Federal Specification GGG-S-0065B, dated June 5, 1967.

PAGE 7

Paragraph 3.16.2: Delete and substitute: "3.16.2 Style B, metal-cutting keyhole saws shall consist of a pistol-grip type handle and detachable metal-cutting blade. Blade teeth shall have a Rockwell "C" hardness of 58 to 62 and shall be capable of passing the metal cutting test in 4.4.2.2. The pistol grip handle shall be designed to position, lock and cut with the blade in each of four different cutting positions (up, down, right, and left). For interchangeability and standardization between handles and replacement blades, all blades shall conform to the dimensions of figure 10A and table VIII.

Paragraph 3.24. Delete and substitute: '3.24 Workmanship. The blades of all saws shall be true and straight throughout their length and width. The teeth shall be sharp, suitable for cutting, and uniform in (depth) height or set as applicable. Except for the teeth, blades shall be free from burrs, pits, discoloration, sharp edges, rust or any blemishes that might impair their appearance, durability or serviceability. Handles shall afford a secure but comfortable hand-grip for sawing.
