FEDERAL SPECIFICATION

# TUBES, ELECTRON, GENERAL SERVICE

*This specification was approved by the Commissioner, Federal Supply Service, General Services Administration, for the use of all Federal agencies.*

## 1. SCOPE AND CLASSIFICATION

**1.1 Scope.** — This specification covers electron tubes and similar related electronic devices, such as crystal rectifiers and solid-state amplifiers.

**1.2 Classification.**

**1.2.1** *Classes.*—This specification covers general classes of electronic devices such as:

Cathode-ray tubes.
Cold cathode discharge tubes, including voltage regular tubes.
Counter tubes.
Crystal rectifiers.
Gas-filled rectifiers.
High-vacuum rectifiers.
Iconoscopes.
Klystrons.
Magnetrons.
Phototubes.
Pulse modulators.
Receiving tubes.
Semiconductor tube-like devices.
Spark-gap modulators.
Thyratrons.
Transmitting tubes.
TR, ATR, and pre-TR.
Traveling wave tubes.

The class into which each device falls is indicated on the individual specification sheet of Military Specification MIL–E–1. (see 2.1).

## 2. APPLICABLE SPECIFICATIONS

**2.1** The following Military Specification of the issue in effect on date of invitation for bids, forms a part of this specification:

MIL–E–1—Electron Tubes.

(Activities outside the Federal Government may obtain copies of Federal Specifications and Standards as outlined under General Information in the Index of Federal Specifications and Standards and at the prices indicated in the Index. The Index, which includes cumulative monthly supplements as issued, is for sale on a subscription basis by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.

(Single copies of this specification and other product specifications required by activities outside the Federal Government for bidding purposes are available without charge at the General Services Administration Regional Offices in Boston, New York, Atlanta, Chicago, Kansas City, Mo., Dallas, Denver, San Francisco, Los Angeles, Seattle, and Washington, D. C.

(Federal Government activities may obtain copies of Federal Specifications and Standards and the Index of Federal Specifications and Standards from established distribution points in their agencies.

(Copies of Military specifications required by contractors in connection with specific procurement functions should be obtained from the procuring agency or as directed by the contracting officer.)

## 3. REQUIREMENTS

**3.1** Electron tubes and related electronic devices furnished under this specification shall be in strict accordance with the requirements stated in Military Specification MIL–E–1, including the requirement for qualification approval (See 6.2, and 3.1 of MIL–E–1).

## 4. SAMPLING, INSPECTION, AND TEST PROCEDURES

**4.1** The sampling, inspection and test procedures of MIL–E–1, section 4, shall apply.

## 5. PREPARATION FOR DELIVERY

**5.1 Packaging.**—Unless otherwise specified, commercial packages are acceptable.

**5.2 Packing.**—Unless otherwise specified, the subject commodity shall be packed in substantial commercial containers of the type, size, and

kind commonly used for the purpose, so constructed as to insure acceptance and safe delivery by common or other carriers, at the lowest rate, to the point of delivery called for in the contract or purchase order.

**5.3 Marking.**

**5.3.1** *Unit packages.*—Each package or individual container shall be plainly marked with class and number of the tube, and the name or trade-mark of the manufacturer.

**5.3.2** *Shipping containers.*—Unless otherwise specified, shipping containers shall be plainly marked with the name of the item, the class, and quantity contained therein, as defined by the contract or order number under which the shipment is made, the name of the contractor, and the number of the contract or order.

## 6. NOTES

**6.1 Ordering data.** — Procurement documents should specify the following:

(a) Title, number, and date of this specification.

(b) Complete class designation of tube and date of the individual tube specification sheet.

**6.2 Qualification.** — In the procurement of products requiring qualification, the right is reserved to reject bids on products that have not been subjected to the required tests and found satisfactory for inclusion on the Military Qualified Products List. The attention of suppliers is called to this requirement, and manufacturers are urged to communicate with the Armed Services Electron Tube Committee, Armed Services Electro Standards Agency, Fort Monmouth, New Jersey, and arrange to have the products that they propose to offer the Government, tested for qualification in order that they may be eligible to be awarded contracts or orders for the products covered by this specification. Information pertaining to qualification of products covered by this specification may be obtained from the Armed Services Electron Tube Committee, Armed Services Electro Standards Agency, Fort Monmouth, New Jersey.

**6.3 Transportation description.**—Transportation description applicable to this item is:

*Cathode-Ray*

Tubes, electronic, cathode ray.
Carload minimum weight 14,000 pounds, subject to Rule 34, Uniform Freight Classification.
Truckload minimum weight 14,000 pounds.

*Transmitting*

Tubes, electronic, transmitting type:
Not exceeding 7″ in greatest dimension, carload minimum weight 14,000 pounds, subject to Rule 34, Uniform Freight Classification.
Truckload minimum weight 14,000 pounds.
Exceeding 7″ in greatest dimension—NOT TAKEN.

*All Others*

Tubes, electronic, not otherwise indexed by name.
Not exceeding 7″ in greatest dimension—
Carload minimum weight 16,000 pounds, subject to Rule 34, Uniform Freight Classification.
Truckload minimum weight 16,000 pounds.
Exceeding 7″ in greatest dimension—
Carload minimum weight 14,000 pounds, subject to Rule 34, Uniform Freight Classification.
Truckload minimum weight 14,000 pounds.

**Patent notice.**—When Government drawings, specifications, or other data, are used for any purpose other than in connection with a definitely related Government procurement operation, the United States Government thereby incurs no responsibility nor any obligation whatsoever; and the fact that the Government may have formulated, furnished, or in any way supplied the said drawings, specifications, or other data, is not to be regarded by implication or otherwise as in any manner licensing the holder or any other person or corporation, or conveying any rights or permission to manufacture, use, or sell any patented invention that may in any way be related thereto.
