COMMERCIAL ITEM DESCRIPTION
INKING PAD, RUBBER STAMP (FOAM PAD)

The General Services Administration has authorized the use of this commercial item description by all federal agencies.

1. SCOPE: This Commercial Item Description covers three sizes of foam latex rubber or foam plastic inking pads in covered containers, for use with hand rubber stamps in general office use.

2. CLASSIFICATION: The foam pads in this Commercial Item Description shall be of the following sizes, as specified (See Section 6, Ordering Data).

Size Options - Metric (Inches)
Size 1 - 6.98cm (2 3/4in.) X 10.79cm (4 1/4in.)
Size 2 - 8.25cm (3 1/4in.) X 15.87cm (6 1/4in.)
Size 3 - 11.43cm (4 1/2in.) X 19.05cm (7 1/2in.)

(Tolerance of +/- 1/4 inches shall be permitted on each dimensions.

The thickness of the pad shall not be less than .22 inch nor more than .32 inch.

3. SALIENT CHARACTERISTICS:

3.1.1. Pads shall be split from very small and uniform pore-size foam latex rubber or foam plastic stock. The split side shall form the surface of the pad and shall be smooth, even, and mat-like.

3.1.2. Large pores on the surface of the pad that may cause uneven or improper inking of the stamp shall be cause for rejection.

3.1.3. Pad containers shall be the manufacturer's commercial standard.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to General Services Administration, Federal Supply Service, Engineering Branch, 26 Federal Plaza, New York, NY 10278.

Check the source to verify that this is the current version before use.

3.1.4. The contractor shall use his commercial standard practice to ensure that the pads do not fall out during normal use.

3.1.5. The inside dimensions of the container base shall not be less than the dimensions given for the respective pad sizes. Pad inserts shall not make contact with the cover, when closed.

3.1.6. Each container shall be permanently and legibly marked with the name or the trademark of the manufacturer.

3.1.7. Pads shall absorb and hold sufficient amount of ink to avoid frequent re-inking. When the pads are re-inked they shall absorb the ink readily.

3.1.8. When the stamp is applied to the inked pad, the face of the type of the stamp shall be evenly inked and produce a sharp and uniformly intense impression. Surplus ink shall not adhere to the shoulder or the sides of the type.

3.2 Workmanship: The stamp pads shall be free of any defects which affect appearance or impair serviceability, including, but not limited to, superfluous coating of any kind, burrs, scratches, or discoloration, niches, dents, rough edges, scratches, crinkling, imbedded foreign matter, or any imperfections which will impair serviceability and adversely affect the appearance or which might constitute a personal hazard to the user.

4. Regulatory Requirements: The offerer/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

5. Quality Assurance Requirements:

5.1 Product Conformance. The products provided shall meet the salient characteristics of this commercial item description, conform to the producer's own drawings, specifications, standards and quality assurance practices and be the same product offered for sale in the commercial market. The government reserves the right to require proof of such conformance.

6. Packaging:

6.1 Preservation, packing, and marking shall be as specified in the contract or order.

7. Notes:

7.1 Source of Documents. Issues of the following documents, in effect on the date of invitation for bids or request for proposal form a part of this document to the extent specified herein.
