COMMERCIAL ITEM DESCRIPTION

CLIP, PAPER

The General Services Administration has authorized the use of this Commercial Item Description.

This commercial item description covers the clam type paper clips used for clipping paper.

1. SALIENT CHARACTERISTICS:

A. Construction. Clips shall be of a CLAM CLIP design as illustrated in Fig. 1 on page 2, meeting all the dimensional requirements specified. Clips shall be made of stainless steel and be capable of securing up to 40 pages of 20-lb basis weight (17x22-500) paper. Clips shall be reusable. The clips shall be designed so that they can be fed automatically into position in the dispenser as the preceding clip is used. The clips shall fit the clip dispensers specified in Commercial Item Description A-A-2791, CLIP SYSTEM, PAPER.

B. Physical characteristics.

1). The clips shall pass through the dispenser without jamming, falling out or failing to feed smoothly when tested as specified in paragraph (2C1) below.

2). The grip shall be tight and the paper shall not slip out from the clip when tested as specified in paragraph (2C2) below.

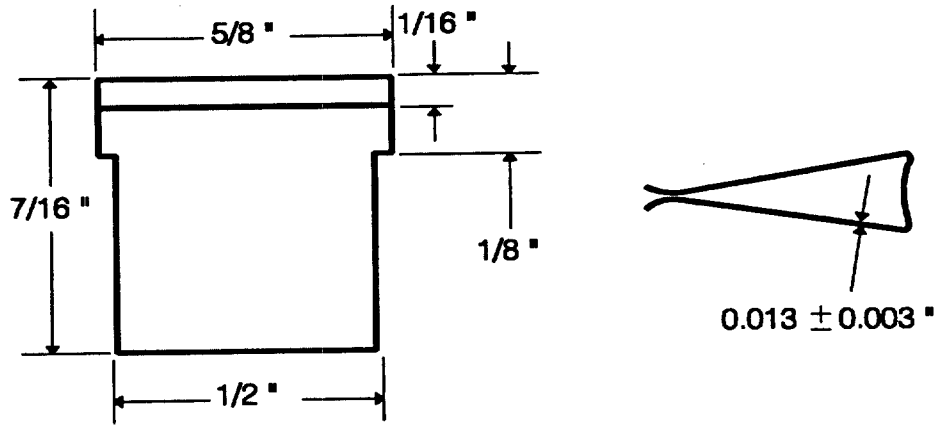

C. Workmanship. The clips shall be clean, have smooth face and edges. The clips shall be free of any defects which may constitute a hazard to the end user, affect its function or impair its serviceability.

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

2. QUALITY ASSURANCE:

A. Responsibility for Inspection. Unless otherwise specified in the contract, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract, the contractor may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirements.

B. Sampling. Samples shall be selected for inspection in accordance with MIL-STD-105, using the plans described in Table I. A lot shall consist of a number of sample units manufactured by the same process from the same components at the same time. Random samples shall be drawn from each lot for the end item inspection.

TABLE I

Inspection Type	AQL (%) defective	Inspection Level	Sample Unit	Requirement Paragraph
Construction & Workmanship	4.0	S-2	one clip	1A 1C
Physical Characteristics	2.5	S-1	one clip	1B
Packaging, Packing & Marking	2.5	S-2	one shipping container	4

C. Testing.

1). Dispensing Test. A minimum of 20 clips for Type I and 16 clips for Type II shall be propelled through the dispenser.

2). Tightness Test. Insert a stack of forty (40) sheets of 20-lb basis weight (17x22-500) paper into the clip dispenser and apply a clip. Check for tightness of clip in gripping the paper by holding the paper stack by the clip and gently pulling the paper away from the clip. Then, reuse the same clip on the five (5) sheets of 20-lb basis weight (17x22-500) paper and again check for tightness.

3. REGULATORY REQUIREMENTS: The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580, as amended, to the maximum extent practicable.

4. PACKAGING, PACKING, AND MARKING: Packaging, packing, and marking shall be as specified in the contract or order.

5. REFERENCED DOCUMENTS: The issue of the referenced documents in effect on the date of the solicitation for offers or request for proposals shall be used to determine conformance with the requirements of this Commercial Item Description.
