COMMERCIAL ITEM DESCRIPTION

BAG, BARRACKS

The General Services Administration has authorized the use of this Commercial Item Description in preference to MIL-B-2378.

Abstract. This document covers bag, barracks one type and size, with drawstring closure. The barracks bag is intended for use as a laundry bag to hold the soiled clothing of enlisted men and women.

Salient Characteristics. The bag shall be made of cloth, sateen, cotton, 8.2 oz the color shall be Camouflage Green 483. The finished bag shall measure 32 ± 3/4 inches in length by 24 3/4 ± 1/2 inches in width. The construction shall conform to Figure 1, and shall be as specified herein. In the event of a conflict between the text of this document and the references cited herein, the text of this document shall take precedence.

Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to: Defense Personnel Support Center, Clothing and Textiles Directorate, Attn: DPSC-FSSD, 2800 South 20th Street, Philadelphia, PA 19101-8419, by using the Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document or by letter.

Materials.

Thread, polyester. The thread for all stitching shall be twisted soft multiple cord. The yarn shall be continuous multifilament polyester. Thread size is 70, the thread shall be dyed Camouflage Green 483. The thread shall show good color fastness to laundering.

Braid, tubular, cotton. The braid shall be 6/32 inch diameter, solid. The cotton used to make the yarn shall be carded, spun, and twisted into ply yarns. The length of the braid shall be 62 ± 1/2 inches, two (2) braid are required for the bag. The braid shall be dyed CG 483 and shall show fastness to light, laundering (after 3 cycles), crocking, and wet-dry cleaning. The natural finish shall denote a braid for which no consistency or luster other than that inherent in the basic fiber is required.

Grommets. The grommets shall be brass and spur washer, and shall conform to type III, Class 3 size No. 1 of MIL-G-16491.

Marking. The identification marking shall be applied in the location shown on Figure 1. The letters "US" shall be applied in the size characters and in the location indicated on the figure and the markings shall have color fastness to laundering.

Workmanship. After completion, the finished bag shall be thoroughly cleaned, and all loose thread, lint, and foreign matter removed.

Product Demonstration Model. When required, offerers shall submit samples of their intended production. The Product Demonstration Model will consist of units independently developed. Product Demonstration Models will be analyzed and evaluated by the government. Evaluation criteria and basis for award are contained in the solicitation. Product Demonstration Models will be retained by the government. One (1) Product Demonstration Model approved by DPSC under the resultant contract will serve as a manufacturing standard for the corresponding production items delivered under this contract. Offerers are advised that the Product Demonstration Model does not relieve the successful offerer of his responsibility to perform in accordance with the Commercial Item Description specified above.

Quality Assurance

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards and quality assurance practices. The government reserves the right to require proof of such conformance prior to the first delivery and thereafter as may be otherwise provided for, under the provisions of the contract. Reliance on contractor QA systems shall not relieve the contractor of the responsibility of ensuring that all products or supplies submitted to the government for acceptance comply with all requirements of the contract.

Examination. Bag Lots shall be inspected in accordance with "Sampling Procedures and Tables for Inspection by Attributes", ANSI/ASQC Z1.4, published by the American Society for Quality Control.

Visual Examination. The bag shall be examined for the defects listed below. The lot size shall be expressed in units of bags. The sample unit shall be one bag. The inspection level shall be S-3 and the acceptable quality level (AQL), expressed in terms of defects per hundred units, shall be 1.0.

Visual defects

Examination	Defect
Cloth	Hole, cut, or tear; any smash, weak place, broken or missing yarn, multiple floats, or open place, clearly visible. Shade bar, fine or coarse filling bar.
Examination: Workmanship	Not within industry standards or practices.
Grommet	Clinched excessively tight, cutting surrounding material. Insecurely clinched to a degree that grommet may be detached from material.
Component and assembly	Any operation omitted, added or not performed (unless otherwise classified herein).

Visual defects

Examination	Defect
	Seam badly pleated or puckered. Needle chews.
Hems	Formed on outside of bag. Twisted or pleated.
Drawstrings (two required in hem	Either drawstring caught in hem stitching causing failure to draw freely. loop not extended thru grommet on each side.
Markings	Omitted, incorrect, illegible, misplaced or size of characters not as specified.
Cleanness	Spots or stains clearly noticeable; thread ends not trimmed to 1/4 inch maximum length.

Dimensional Examination. The finished bag shall conform to the dimensions specified. Any dimension that is not within the established tolerance shall be classified as a defect. The sample unit shall be one bag; the inspection level shall be S-3 and the AQL, expressed in terms of defects per hundred units, shall be 1.0.

Defects. The bag shall be examined for the following defects: any hole, cut, tear, color not as specified; any or stain (outside); thread ends not removed; label missing, incorrect, or illegible; measurement of item not as specified.

Packaging Examination. The fully packaged shipping containers shall be examined in accordance with defects listed below. The lot size shall be the number of shipping containers in the inspection lot. The inspection level shall be S-2 and AQL, expressed in terms of defects per hundred units, shall be 1.0.

EXAMINE	DEFECT
Marking (exterior and interior)	Omitted; incorrect; illegible; of improper size, location, or method of application
Materials	Any component missing, damaged, or not as specified
Workmanship	Inadequate application of components, such as: incomplete closure of container flaps, loose strapping, improper taping, or inadequate stapling
Content	Number of items in container is more or less than required NSN shown on one or more items not as specified on shipping container
Palletization	Length, width, or height exceeds specified maximum requirements Pallet type not as specified Load not bonded as specified

PACKING.

Overseas.

Packaging. Each bag shall be folded.

Packaging. Fifty bags shall be packed in a fiberboard box conforming to style RSC-L, grade 275 of PPP-B-636. The inside dimensions of the box shall be approximately 24 by 16 by 13 inches. The box shall be closed in accordance with the appendix of PPP-B-636.

Palletization. Boxes shall be palletized on a 4 way entry pallet in accordance with load type Ia of MIL-STD-147. Each prepared load shall be bonded with primary and secondary straps in accordance with bonding means C and D, or film bonding means F or G. The pallet pattern shall be number 3 in accordance with the appendix of MIL-STD-147.

STANDARDIZATION DOCUMENT IMPROVEMENT PROPOSAL

INSTRUCTIONS

1. The preparing activity must complete blocks 1, 2, 3, and 8. In block 1, both the document number and revision letter should be given.
2. The submitter of this form must complete blocks 4, 5, 6, and 7.
3. The preparing activity must provide a reply within 30 days from receipt of the form.

NOTE: This form may not be used to request copies of documents, nor to request waivers, or clarification of requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.
