NOTICE OF CANCELLATION

INCH-POUND

QQ-T-201F
NOTICE 3
27 April 2026

FEDERAL STANDARD

# TERNEPLATE, FOR ROOFING AND ROOFING PRODUCTS

QQ-T-201F, dated 12 November 1986, is hereby cancelled. Future acquisitions should utilize Terne-Coated Stainless Steel (TCS), the most direct functional replacement that uses ASTM A666 type 304 stainless steel coated with 100% tin in accordance with ASTM B339 in place of lead-tin alloy. Additional commercial offerings use tin coated 316L stainless steel for additional durability and impart a matte gray patina to match legacy lead-tin terneplate. Additional installation and dimensioning information for modern terneplate products is available in the Architectural Sheet Metal Manual (SMACNA 1120).

Users are cautioned to evaluate these documents for their particular application and mission requirements before citing as a replacement.

ASTM A666 - Standard Specification for Annealed or Cold-Worked Austenitic Stainless Steel Sheet, Strip, Plate, and Flat Bar

ASTM B339 - Standard Specification for Pig Tin

(Copies of these documents are available online at https://www.astm.org/.)
