MIL-C-18832(Wep)
Amendment 2
26 September 1961
Superseding
MIL-C-18832(NOrd)
Amendment 1
16 October 1957

MILITARY SPECIFICATION

CONNECTOR. BREAKAWAY. ELECTRO-MECHANICAL

This amendment forms a part of Military Specification MIL-C-18832(NOrd) of 24 June 1955, and has been approved by the Bureau of Naval Weapons, Department of the Navy

By this amendment basic specification MIL-C-18832(NOrd) is changed to read MIL-C-18832(Wep).

Delete "Bureau of Ordnance" wherever it appears and substitute "Bureau of Naval Weapons".

Page 2, under DRAWINGS: Insert "BUORD DWG 1735569 Breakaway Receptacle and Cable Assembly".

Page 4, paragraph 3.2.2: Delete "MIL-P-14 Type MME" and substitute "MIL-M-14 Type MDG".

Page 4, paragraph 3.3.1.1: Insert at end of sentence "as applicable" and add "BUORD DWG 1735569 Breakaway Receptacle and Cable Assembly" at end of list of LD's.

Page 12, paragraph 4.5.5: Delete and substitute:
"4.5.5 UNCOUPLING FORCE (PLUG). With a receptacle made to nominal dimensions (Ref: DWG 1146395) rigidly mounted, the plug shall be uncoupled by a tension force applied within 60 degrees of the axis of the connector. Tension shall be measured on the axis and at four (4) equally spaced points 55 degrees ± 5 degrees from the axis, making four (4) measurements at each point for Preproduction Tests (Table I) and one (1) measurement at each point for Production Tests (Table II). The force determined from each of these measurements shall be 35 ± 15 pounds".

Page 12, paragraph 4.5.6: Delete and substitute:
"4.5.6 UNCOUPLING FORCE (LANYARD CLIP). The lanyard clip, when assembled with a simulated mating component manufactured to nominal dimensions (Ref: DWG 1146395) shall be uncoupled by a tension force of 35 ± 15 pounds measured on the axis of the simulated component and at four (4) equally spaced points 55 degrees ± 5 degrees from the axis. The simulated component shall be rigidly mounted in a manner which will permit uncoupling the lanyard clip without imparting movement to the simulated component."
