MILITARY STANDARD

MICROELECTRONIC TERMS AND DEFINITIONS

FSC 5962

DEPARTMENT OF DEFENSE
WASHINGTON, D. C. 20301

Microelectronic Terms and Definitions
MIL-STD-1313A

1. This Military Standard is mandatory for use by all Departments and Agencies of the Department of Defense.

2. Recommended corrections, additions, or deletions should be addressed to the Naval Electronic Systems Command, Department of the Navy, Washington, D. C. 20360.

1. SCOPE

1.1 This standard establishes a list of terms and definitions applicable to microelectronic devices and techniques.

2. REFERENCED DOCUMENTS

2.1 The issue of the following document in effect on date of invitation for bids or request for proposals, forms a part of this standard to the extent specified herein.

GOVERNMENTAL

STANDARD

MILITARY

MIL-STD-280- Definitions of Terms for Equipment Divisions.

(Copies of specifications, standards, drawings and publications required by suppliers in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

3. DEFINITIONS

3.1 Terms for equipment divisions. The definitions of part, subassembly, assembly, unit, group, set and system, as well as the ancillary terms accessory and attachment are contained in MIL-STD-280.

3.2 Microelectronics. That area of electronic technology associated with or applied to the realization of electronic systems from extremely small electronic parts or elements.

3.3 Element (of a microcircuit or integrated circuit). A constituent of the microcircuit or integrated circuit that contributes directly to its operation. (A discrete part incorporated into a microcircuit becomes an element of the microcircuit.)

3.4 Substrate (of a microcircuit or integrated circuit). The supporting material upon or within which the elements of a microcircuit or integrated circuit are fabricated or attached.

3.5 Microcircuit. A small circuit having a high equivalent circuit element density, which is considered as a single part composed of interconnected elements on or within a single substrate to perform an electronic circuit function. (This excludes printed wiring boards, circuit card assemblies and modules composed exclusively of discrete electronic parts.)

Check the source to verify that this is the current version before use.

3.5.1 Multichip microcircuit. A microcircuit consisting of elements formed on or within two or more semiconductor chips which are separately attached to a substrate.

3.5.2 Hybrid microcircuit. A microcircuit consisting of elements which are a combination of the film circuit type (see 3.6.2) and the semiconductor types (see 3.5.1 and 3.6.1) or a combination of one or both of the types with discrete parts.

3.6 Integrated circuit. A microcircuit consisting of interconnected elements inseparably associated and formed in situ on or within a single substrate to perform an electronic circuit function.

3.6.1 Monolithic integrated circuit. An integrated circuit consisting of elements formed in situ on or within a semiconductor substrate with at least one of the elements formed within the substrate.

3.6.2 Film integrated circuit. An integrated circuit consisting of elements which are films formed in situ upon an insulating substrate.

3.7 Microcircuit module. An assembly of microcircuits or an assembly of microcircuits and discrete parts, designed to perform one or more electronic circuit functions, and constructed such that for the purposes of specification testing, commerce, and maintenance, it is considered indivisible.

NOTE: To further define a particular type of circuit, additional modifiers may be prefixed. This is particularly desirable in the case of the hybrid circuit.

STANDARDIZATION DOCUMENT IMPROVEMENT PROPOSAL

OMB Approval
No. 22-R255

INSTRUCTIONS: The purpose of this form is to solicit beneficial comments which will help achieve procurement of suitable products at reasonable cost and minimum delay, or will otherwise enhance use of the document. DoD contractors, government activities, or manufacturers/ vendors who are prospective suppliers of the product are invited to submit comments to the government. Fold on lines on reverse side, staple in corner, and send to preparing activity. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements. Attach any pertinent data which may be of use in improving this document. If there are additional papers, attach to form and place both in an envelope addressed to preparing activity.

DOCUMENT IDENTIFIER AND TITLE

NAME OF ORGANIZATION AND ADDRESS

CONTRACT NUMBER

MATERIAL PROCURED UNDER A

☐ DIRECT GOVERNMENT CONTRACT ☐ SUBCONTRACT

1. HAS ANY PART OF THE DOCUMENT CREATED PROBLEMS OR REQUIRED INTERPRETATION IN PROCUREMENT USE?

A. GIVE PARAGRAPH NUMBER AND WORDING.

B. RECOMMENDATIONS FOR CORRECTING THE DEFICIENCIES

2. COMMENTS ON ANY DOCUMENT REQUIREMENT CONSIDERED TOO RIGID

3. IS THE DOCUMENT RESTRICTIVE?

☐ YES ☐ NO *(If "Yes", in what way?)*

4. REMARKS

SUBMITTED BY *(Printed or typed name and address - Optional)*

TELEPHONE NO.
