INCH-POUND

MIL-A-23595C(AS)
AMENDMENT 1
17 March 1989

MILITARY SPECIFICATION

AMPLIFIER, AUDIO FREQUENCY

This amendment forms a part of MIL-A-23595C(AS) dated 15 June 1988, and is approved for use by the Naval Air Systems Command, Department of the Navy, and is available for use by all Departments and Agencies of the Department of Defense.

PAGE 4

3.4 Design and construction: In the second sentence, delete "hermetically sealed" and replace with "potted."

PAGE 7

3.5.15 Delete and substitute:

"3.5.15 Radiated susceptibility, magnetic field. The amplifier shall meet the test requirements of 4.7.16 and RS01 of MIL-STD-461. The amplifier is permitted a magnetically induced amplifier output voltage of less than 15 millivolts RMS at 200 Hz and 81 millivolts RMS at 100 KHz with no audio amplifier input signal. Between 200 Hz and 100 KHz the output shall not exceed the limits established by a linear curve connecting the two extremes specified above. During and after completion of this test, there shall be no degradation in the performance requirements of 3.5.2.1 and 3.5.7 when tested to the conditions of 3.5.4 except that the distortion shall not exceed 12% during the test. The requirements of 3.5.2.1 shall not vary more than +2, -2 dB referenced to the output under standard conditions when the audio input signal and the magnetically induced voltage signal are of the same frequency. The requirements of 3.5.7 shall be met when the frequency of the magnetically induced voltage signal is set to the harmonic frequencies of the fundamental audio input signal."

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Add the following new paragraph:

"4.4.2.1 Test procedures. A list of test equipment used and the procedures used for conducting all required tests shall be prepared by the contractor. The right is reserved by the Government to modify the test or require any additional tests deemed necessary to determine compliance with the requirements of this specification or the contract. MIL-T-18303 shall be used as a guide for preparation of test procedures. When approved tests are available from previous contracts, such procedures will be provided and may be used. However, the right is reserved by the acquiring activity to require modification of such procedures, including additional tests, when deemed necessary."

Preparing Activity:
Navy - AS
Project No. 5831-N070
