Page 1

Add tne following Preamble underneath the title: "This specification is approved by the US Army Armament Research and Development Command, and is available for use by all Departments and Agencies of the Department of Defense."

Page 5

4.3: Delete in its entirety and substitute the following:
4.3 Inspection provisions.

4. 3.1 Lot formation. - The term "inspection lot" as used in this specification is defined as an essentially homogeneous collection of units of product from which a representative sample is drawn and inspected to determi ne conformance with applicable requirements. The sample selected shall represent only that quantity of units from which the sample was drawn and shall not be construed to represent any prior or subsequent quantities presented for Inspection. Homogeneity shall be considered to exist provided the inspection lot has been produced by one manufacturer, in one unchanged process, in accordance with the same drawing, same drawing revision, same specification and same specification revision and compiles with the provisions for submissi on of product as specified in MIL-STD-105. Changes to process, specification, or drawing not affecting safety, performance, interch angeability, or storage, as determined by the Government, shall not be deemed to alter the homogeneity of an inspection lot. All mater ial submitted for inspectionin accordance with this specification shall comply with the homogeneity criteria specified herein regardless of the type of sampling p rocedure which is being applied to determ in e conformance with requirements. Lot numbering, as required, shall be in accordance with MIL-STD-1168. Each inspection lot shall contain:

a. Booster assemblies of one inter fix number from one manufacturer.
