DETAIL SPECIFICATION SHEET

CONNECTORS AND ASSEMBLIES, ELECTRICAL, AIRCRAFT GROUNDING: GROUNDING CLAMP CONNECTOR FOR TYPES I AND III GROUNDING ASSEMBLIES, ALUMINUM CLIP, ELECTRICAL

This specification is approved for used by all Departments and Agencies of the Department of Defense.

The requirements for acquiring the product described herein shall consist of this specification sheet and MIL-DTL-83413.

Inches	mm	Inches	mm	Inches	mm
.003	0.08	.113	2.87	.75	19.1
.004	0.10	.125	3.18	.84	21.3
.010	0.25	.130	3.30	.88	22.4
.031	0.79	.130	3.30	1.25	31.4
.062	1.57	.203	5.16	1.50	38.1
.078	1.98	.205	6.35	2.80	76.1
.080	2.03	.380	9.70	3.20	81.3
.090	2.29	.500	12.70	4.13	104.9

NOTES:
1. Dimensions are in inches.
2. Metric equivalents are given for information only.
3. Surface toughness: If cast, smooth cast finish 125 or 250 all over, except machine surface 63.
4. Remove all burrs and sharp edges .010 (0.25 mm) to .020 (0.51 mm) radius.
5. Unless otherwise specified, tolerance is ±.03 (0.8 mm) on decimals and ± 1° on angles.

REQUIREMENTS:

Material:

Handle: The handle material shall be of aluminum alloy and meet the material requirements of MIL-DTL-83413.

Spring: The spring material shall be .125 diameter music wire and meet the spring requirements of MIL-DTL-83413

Set screw: The set screw shall meet the requirements of AIA/NASM51021, and shall be passivated in accordance with SAE-AMS 2700.

Salt spray: 96 hours in accordance with test procedure EIA/ECA-364-26 test condition A.

Clamp connector resistance: Shall not exceed 500 milliohms when tested in accordance with MIL-DTL-83413. Test to be performed after the salt spray test.

Part or Identifying Number (PIN): M83413/7-1.

Jaw material: The jaw material shall be steel and meet the material requirements of MIL-DTL-83413.

Alternate jaw material: MPIF FX - 1008-110HT in accordance with Metal Powder Industries Federation, 105 College Road East, Princeton, New Jersey 08540.

QUALIFICATION:

Qualification is not required.

FIRST ARTICLE TEST:

First article inspection shall consist of a visual and mechanical inspection in accordance with MIL-DTL-83413 and the requirements stated in this specification sheet.

Samples for first article inspection shall be representative of the products proposed to be furnished to this specification. Test samples, consisting of 12 grounding clamps shall be examined and tested in accordance with this specification. Test results shall be submitted to the acquiring activity.

Changes from previous issue. The margins of this specification are marked with vertical lines to indicate where changes from the previous issue were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the previous issue.
