COMMERCIAL ITEM DESCRIPTION

SKIS, MILITARY, ALL TERRAIN

The General Service Administration has authorized the use of this Commercial Item Description in preference to MIL-S-44300.

Abstract. The skis are intended for use by Military personnel in downhill and cross-country tactical operations for mass movement of troops over snow.

Classification. The Skis shall be in the following sizes, as specified:

Size 1 - 180 centimeters overall length
Size 2 - 190 centimeters overall length
Size 3 - 200 centimeters overall length
Size 4 - 210 centimeters overall length

Salient Characteristics. The design and construction of the ski being procured shall be in accordance with the approved standard sample. Each ski shall have a 13/16 inch groove in the heel and the 3/8 inch diameter hole in the tip as shown in figure 1.

Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to: Defense Personnel Support Center, Clothing and Textiles Directorate, Attn: DPSC-FSSD, 2800 South 20th Street, Philadelphia, PA 19101-8419, by using the self-addressed Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document or by letter.

Check the source to verify that this is the current version before use.

Finish. The color of the ski surface (top) shall approximate lusterless white color No. 37875 of FED-STD-595.

Material. The materials shall be of the quality and type used by the contractor provided the completed item complies with all provisions of the approved samples.

Label/marking. Each ski shall be permanently and legibly indented or marked with the manufacturer's name or trademark of such characters as to be identifiable with the manufacturer.

Workmanship. After completion, the finished ski shall be thoroughly cleaned, and all rough edges, burrs and surface shall be smooth, and all foreign matter removed. Color shall approximate lusterless white No. 37875. Any groove in heel or hole in tip of ski is missing or dimensions incorrect, and identification markings missing, illegible, or incomplete will be considered defects.

Product Demonstration Model. When required, offerers shall submit samples of their intended production and style. The Product Demonstration Model will consist of units independently developed. Product Demonstration Models will be analyzed and evaluated by the government. Evaluation criteria and basis for award are contained in the solicitation. Product Demonstration Models will be retained by the government. One (1) Product Demonstration Model approved by DPSC under the resultant contract will serve as a manufacturing standard for the corresponding production items delivered under this contract. Offerers are advised that the Product Demonstration Model does not relieve the successful offerer of his responsibility to perform in accordance with the Commercial Item Description specified above.

Quality Assurance

Certification. The contractor shall certify that the product offered meets the salient characteristics and the requirements of this commercial item description, and where certificates of compliance are submitted, the government reserves the right to require proof of such conformance prior or to the first delivery and thereafter as may be provided for, under provisions of the contract.

Examination. Ski lots shall be inspected in accordance with "Sampling Procedures and Tables for Inspection by Attributes", ANSI/ASQC Z1.4, published by the American Society for Quality Control.

Visual Examination. The Skis shall be examined for the defects listed below. The lot size shall be expressed in units of skis. The sample unit is one pair of skis. The inspection level shall be II and the acceptable quality level (AQL), expressed in terms of defects per hundred units, shall be 2.5.

Check the source to verify that this is the current version before use.

Packaging Examination. The fully packaged shipping containers shall be examined in accordance with defects listed below. The lot size shall be the number of shipping containers in the inspection lot. The inspection level shall be S-2 and AQL, expressed in terms of defects per hundred units, shall be 2.5.

Examination	Defect
Material	Any components missing, damaged, not as required.
Marking (exterior of and interior)	Omitted, incorrect, illegible, improper size, location, sequence or method of application.
Workmanship	Incomplete closure of container flaps, loose or inadequate strapping.
Content	Number of skis per shipping container is more or less than required.
Palletization	Length, width, or height exceeds specified maximum requirements
	Pallet type not as specified
	Load not bonded as specified

Defects. The skis shall be examined for the following defects: any groove in heel missing; any hole in toe missing; any holes or groves not as specified; color of surface not as specified; dimensions not as specified; any identification marks missing, illegible or incomplete; rough edges or burrs; dimensions that do not concur with the standard sample.

Regulatory Requirements. The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580 to the maximum extent practicable.

Preservation, Packing, and Marking. The preservation, packing, and marking shall be as specified in the contract or order.
