MIL-P-60165(MU)
AMENDMENT 2
15 June 1966
SUPERSEDES
AMENDMENT 1
8 December 1965

MILITARY SPECIFICATION

POWER CONTROL A

This amendment forms a part of Military Specification MIL-P-60165(MU), dated 11 February 1965.

* Paragraph 3.4.7, Table III, Column E, line 3: Delete "2K ± 160" and substitute "3.1K ± 290"; line 5: Delete "1.7K ± 136" and substitute "2.4K ± 240".

* Paragraph 3.4.7, Table IV, Column E, line 3: Delete "2.1K ± 168" and substitute "3.2K ± 310"; line 5: Delete "1.8K ± 144" and substitute "2.5K ± 255".

* Paragraph 4.5.2.5.1: Delete paragraph in its entirety and substitute:

"4.5.2.5.1 The ac reference voltage of Table I shall be connected to the indicated pins of Power Control A. (This ac reference voltage shall remain connected during test of paragraphs 4.5.2.5.2, 4.5.2.6.1, 4.5.2.6.2, 4.5.2.7.1 and 4.5.2.7.2). With the input resistors connected (paragraph 4.5.2.4) the most positive portion of the periodic wave voltages at pins 1A, 23A, 25A, 35A, 40B, 48B, and 65A with respect to pin 17B shall be more negative than zero volt. Upon completion of the test, disconnect the input resistors of Table II, Column A."

* Paragraph 4.5.2.8.2: Delete third and fourth sentences and substitute the following:

"In sequence, each resistance value, Column A shall be continuously varied in the direction specified in Column C until the circuit output voltages at the pins specified in Column D changes from minus 11 ± 1.3 vdc to minus 0.15 ± 0.15 vdc."

* The outside margin has been marked to indicate where additions to the previous amendment have been made. This has been done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in this notation. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content as written irrespective of the marginal notation and relationship to the last previous amendment.
