SUPERSEDING
MIL-S-29395(MC)
19 MARCH 1981

MILITARY SPECIFICATION

SLACKS, WOMEN'S; MUSICIAN'S

This specification is approved for use by U.S. Marine Corps, Department of the Navy, and is available for use by all Departments and Agencies of the Department of Defense.

1. SCOPE

1.1 Scope. This specification covers the requirements for slacks for wear by female members of the U. S. Marine Band.

1.2 Classification. The slacks shall be of one type in the following classes, sizes and lengths (see 6.2).

CLASS

Class 1 - Polyester/Wool, Gabardine: Sky Blue 2319
Class 2 - Polyester/Rayon, Gabardine: White 2400
Class 3 - Polyester/Rayon, Gabardine: White 2400 (Lined)

Schedule of Sizes and Lengths

Sizes X0,2,4,6,8,10,12,14,16,18
Lengths: Short, Regular and Long

2. APPLICABLE DOCUMENTS

2.1 Government documents.

2.1.1 Specifications and standards. The following specifications and standards form a part of this specification to the extent specified herein. Unless otherwise specified, the issues of these documents shall be those listed in the issue of the Department of Defense Index of Specifications and Standards (DODISS) and supplement thereto, cited in the solicitation. (see 6.2).

Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to the Commander (PSC), Marine Corps Systems Command, Quantico, VA 22134-5010 by using the Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this docuement or by letter.

2.2 Non-Government publications. The following documents form a part of this specification to the extent specified herein. Unless otherwise specified, the issues of the documents which are DoD adopted shall be those listed in the issue of the DODISS cited in the solicitation. Unless otherwise specified, the issues of documents not listed in the DODISS are the issue of the documents cited in the solicitation. (see 6.2).

AMERICAN SOCIETY OF TESTING AND MATERIALS

ASTM D 3951 - Standard Practice for Commercial Packaging

(Application for copies should be addressed to American Society for Testing of Materials, 1916 Race Street, Philadelphia, PA 19103).

(Non-Government standards and other publications are normally available from the organizations that prepare or distribute the documents. These documents also may be available in or through libraries or other informational services).

2.3 Order of precedence. In the event of a conflict between the text of this specification and the references cited herein, the text of this document takes precedence. Nothing in this document, however, shall supersede applicable laws and regulations unless a specific exemption has been obtained.

3. REQUIREMENTS

3.1 Guide sample. Guide samples are furnished solely for guidance and information to the contractor (see 6.3). Variation from this specification may appear in the sample, in which case this specification shall govern.

3.2 First article. When specified (see 6.2), in the contract or purchase order, the contractor shall furnish sample slacks for first article inspection and approval (see 4.4 and 6.4).

3.3 Materials.

3.3.1 Basic materials. The basic material for each class of slacks shall be as follows:

a. Class 1. Cloth, 10.6 ounce, polyester/wool gabardine, sky blue shade 2319 conforming to type II, class 12 of MIL-C-10176.

b. Class 2. Cloth, 8 ounce, polyester and rayon, gabardine, white shade 2400 to type III, class 1 of MIL-C-41820.

c. Class 3. Cloth, 8 ounce, polyester and rayon, gabardine, white shade 2400 to type III, class 1 of MIL-C-41820.

3.3.2 Lining and pocketing. The material for the pockets, crotch lining and pocket stays shall be twill or plain weave cloth, polyester or polyester blend cloth conforming to class I of A-A-52106. The color shall be white.

3.3.3 Lining. The material for lining the class 3 slacks shall be cloth, nylon, tricot warp knit, 2.7 oz/sq yard, shade White 3006 conforming to MIL-C-87059.

Source: https://assist.dla.mil -- Downloaded: 2026-10-20T22:51Z
Check the source to verify that this is the current version before use.

3.3.4 Ornamental stripes. The material for the ornamental stripes shall be cloth, wool, broadcloth, scarlet shade 2501 and white, 16.5 ounce conforming to type I, class 4 of MIL-C-29405.

3.3.5 Thread. The thread for each class of slacks shall be as follows:

a. Class 1, 2, and 3. Cotton thread shall be used conforming to A-A-52094 as follows:

Operation	Type	Ticket No.	Ply
Buttonholes	III	0	3
Seams, stitching	III	30, 50	3
Overedging	I	70	2
Buttons	II	16, 20	4

As an alternate to the cotton thread, a polyester, cotton-covered thread conforming to A-A-50199, ticket No. 50, 3 ply or ticket No. 70, 2 ply may be used. CAUTION: Some automatic machines will not operate properly with this thread.

3.3.3.1 Automatic button sewing. If an automatic machine which sews and shanks (wraps) the buttons in one operation is used, the thread shall be waxed nylon monocord special No. 5, having a minimum breaking strength of 16 pounds and a minimum length per pound of 2150 yards. This thread shall be tested for these requirements and for colorfastness (see 3.3.4.3) in accordance with test methods in V-T-295.

3.3.3.2 Color. The color of the thread for each class of slacks shall conform to the following:

a. Class 1. Blue, AT, Cable No 66060

b. Class 2 and 3. White, AG, Cable No 66049

NOTE: See DoD Standard Color Card of Official Standardized Shades for Sewing Threads 1968.

3.3.3.3 Colorfastness. The colored thread shall show fastness to light and wet dry cleaning equal to or better than the standard sample. When a standard sample is not available, the colored thread shall show "good" fastness to light and wet dry cleaning.

3.3.4 Gimp. The gimp for reinforcing the buttonhole shall conform to type I or II, size No. 8 of A-A-50198. The color of the gimp shall be the same as indicated for thread in 3.3.3.2 with same colorfastness requirements specified for thread in 3.3.3.3.

Source: https://assist.dla.mil -- Downloaded: 20260-20T22:51Z
Check the source to verify that this is the current version before use.

3.3.5 Button. The button for the waistband shall be 27-line and for hip pocket 22-line conforming to type II, class D, style 4 of V-B-871. The color of the buttons for each class of slacks shall be as follows: (See DOD Standard Shades for Buttons, 1966.)

a. Class 1 . Blue, Shade BV, Cable No 62003.

b. Class 2 and 3. White, Shade BA, Cable No 62031

3.3.6 Slide fasteners. The slide fasteners shall conform to either 3.3.6.1 or 3.3.6.2.

3.3.6.1 Metal. The slide fasteners shall conform to type I, style 3, short tab pull, cam lock size LS (commercial No. 4), of V-F-106, except that the salt spray test shall not be required. All the components of the slide fastener shall be brass and from the same supplier (see 4.5.1). The tape shall be cotton or synthetic or a combination. The length of the slide fastener shall be 7 inches for all sizes.

3.3.6.2 Plastic coil. The slide fastener shall be manufactured of polyester or nylon consisting of an automatic or cam lock and shall be equal to commercial size No. 2. The tape shall be a blend of nylon and cotton or polyester and cotton or polyester. The length of the slide fastener shall be 7 inches for all sizes.

3.3.6.3 Color. The color of the slide fastener tape shall be as follows:

a. Class 1. Blue, Shade AA, Cable No 66527.

b. Class 2 and 3. White, Shade C, Cable No 66503

3.3.6.4 Colorfastness. The dyed slide fastener tape shall show colorfastness to laundering equal to or better than the guide sample when tested as specified in V-F-106. When a guide sample is not available, the tape shall show "good" colorfastness when tested as specified in V-F-106.

3.3.7 Combination label. Each pair of slacks shall have a combination identification, and instruction label conforming to type VI, classes 1 and 3 of DDD-L-20. The slacks are intended to be dry cleaned and the labels shall show fastness to dry cleaning. The inscription shall be as follows:

SLACKS, WOMEN'S
FIBER CONTENT:
CONTRACT NO.: DLA-100-C-0000 (Example)
NAME OF CONTRACTOR
DRY CLEAN ONLY

Source: https://assist.dla.mil -- Downloaded: 20260-20T22:51Z
Check the source to verify that this is the current version before use.

3.3.7.1 Size labels. The size label shall conform to type VI, Class 2 of DDD-L-20 except the stock number is not required. The inscription on the size label shall conform to MIL-STD-984; Table II, Body Measurements for Marine Corps, Table III Height Ranges and Figure 2. Examples of labels for women's slacks is as follows: Note: The label on the bottom of Figure 2 shall be used for Marine Corps items.

Example:	
Hip Circ	36"
Waist Circ	25-1/2"
Height	63-1/2 to 67" R
	(Size Code 6)

3.3.8 Fusible interlining. The fusible interlining for the waistband and left fly shall be black or gray. The fusible shall conform to type V, Class 1, Style B of MIL-C-44296. Fusible interlining f/classes 2 and 3 shall be white, nonwoven. Class 1 may be black or gray. All have the same requirements. The fusible shall be fused to the basic material as recommended by the supplier of the fusible.

3.3.9 Hook and Eye. The hook and eye shall be North and Judd(Hook Flex H-49, K-50, H-89 and E-90); Universal Button Co. (Talon #3, #7 and #8 hook with #8 eye); Akim Co or Patwin, Inc., Junior Series, Type JB; Stimpson (P-536, D-4086, D04457, D-4288); Rau (OA50, OX 1256, 080415); Patwin, Inc. (Slim-Slak with MB eye, and Slik-Slax) or equal. The finish shall be nickel plate. Prior to use of an "or Equal" item, the supplier shall submit the item with supporting data to the contracting officer for approval. (see 4.5.1)

3.4 Design. The slacks shall be the U. S. Marine Corps design shown on Figures 1 and 2, having a two-piece waistband with button closure, with hook and eye, two (2) back pockets w/flaps, outlet at the seat seam, front fly with slide fastener and slightly tapered legs with unhemmed overedged bottoms. The class 1 slacks shall have a scarlet and white ornamental stripe sewn to each outseam. The class 3 slacks shall be lined.

3.5 Patterns. Standard patterns to be used to cut working patterns will be furnished by the Government. The patterns allow 1/2-inch seam allowance for all seams, except as otherwise indicated herein. The working patterns shall be identical to the Government patterns. Neither the Government patterns nor the working patterns shall be altered in any way.

Source: https://assist.dla.mil -- Downloaded: 20261O-20T22:51Z
Check the source to verify that this is the currentversion before use.

3.5.1 Pattern parts. The component parts of the slacks shall be cut from materials as specified herein in accordance with the pattern parts indicated below:

Pattern Nomenclature

Item	Basic Material	No. of Cut Parts
1.	Front	2
2.	Back	2
3.	Left Waistband	1
4.	Right Waistband	1
5.	Left Fly	1
6.	Right Fly Placket	1
7.	Back Pocket Bearer	2
8.	Back Pocket Facing	2
9.	Back Pocket Flap	4
	Interlining (Fusible)	
10.	Left Fly	1
11.	Left Waistband	1
12.	Right Waistband	1
13.	Back Pocket Flap	2
	Lining (Cloth Twill)	
14.	Crotch Lining	2
15.	Pockets	2

3.6 Construction. The slacks shall be manufactured in accordance with operation requirements as specified in Table I. The contractor is not required to follow the exact sequence of operations as listed in Table I, but all operations specified shall be used to manufacture the slacks.

3.6.1 Stitches, seams, and stitching. Stitch, seam and stitching types specified in Table I shall conform to FED-STD-751. Whenever two or more methods for seam or stitching types are given for the same part of the operation, any one of them may be used. Where stitch 401 is used, the looper (underthread) shall be on the inside of the slacks. The minimum and maximum number of stitches per inch shall be as specified in Table I.

3.6.1.1 Thread breaks and ends of seams. The ends of all seams and stitching produced with 301 stitch type, when not caught in other seams or stitching, shall be backstitched not less than 1/4 inch. Thread breaks (all stitch types) shall be secured by stitching back of the break not less than 1/2 inch. Skipped stitches may be repaired by using 301 stitch type. The ends of a continuous line of stitching shall be overlapped not less than 1/2 inch. Thread ends of darts shall be trimmed to a length of 1/2 inch. When an automatic dart machine is used, the ends shall be backstitched not less than 3 stitches.

3.6.2 Buttonhole. The buttonhole shall be eyelet end, taper bar type. The finished cut length of buttonhole shall be 3/4 inch for front of waistband, and 5/8 inch for backpocket flaps.

Source: https://assist.dla.mil -- Downloaded: 20260-20T22:51Z
Check the source to verify that this is the current version before use.

3.6.3 Pressing. Pressing as required in Table I shall be accomplished with a heated pressing iron or machine.

3.6.4 Shade marking. The component parts shall be marked to insure a uniform shade and size throughout the slacks. Any method of shade marking may be used except:

a. Corrosive metal fastening devices.
b. Sew-on shade tickets.
c. Adhesive type tickets, which leave traces of paper or adhesive on material after removal of tickets.

TABLE I MANUFACTURING REQUIREMENTS

NO	OPERATION	STCH TYPE	SEAM/ STCH TYPE	STCH/ IN	NDL	BOB/ LPR
1	Cutting. a. Cut the slacks in strict accordance with patterns furnished, which shall show size, placement of component parts, directional lines for cutting, marks for finished length of darts and notches for proper assembly of parts. b. All component parts of the basic material shall be cut from one piece of material except fly facings, which may be cut from ends. Parts cut from ends shall approximate the shade of the main assembly. c. Place fronts and backs so that the directional line is in the warp direction. d. Cut the waistbands left fly and pocket flap interlining in accordance with the patterns. e. Cut the crotch lining, and pockets from the twill cloth in accordance with the patterns. patterns. f. Cut the ornamental stripes in the warp direction. Cut two white stripes 1-1/4 inches wide and four scarlet stripes 1 inch wide.					
2	Shade marking. a. Mark or ticket all component parts of slacks except parts cut from ends, to insure a correct size and uniform shade throughout the slacks (or uniform). b. The use of corrosive metal fastening devices or sew-on tickets for shade marking is prohibited.

2	Shade marking. (cont'd)					
	c. The use of ink pad numbering machine, rubber stamp, or pencil is acceptable provided the numbers do not show on the outside of the slacks and whenever possible, numbers shall be covered by the seam allowance.					
3	Replacement of defective components					
	During the spreading, cutting and manufacturing process, components having material defects or damages that are classified as defects in MIL-STD-656 shall be removed from production and replaced with nondefective and properly matched components.					
4	Make ornamental stripes.					
	Finished appearance. The ornamental scarlet stripes shall be basted without distortions and the finished stripe shall be uniformly 1-1/8 to 1-1/4 inches wide.					
	a. The ornamental stripe shall be made of two stripes of scarlet material each cut 1 inch wide and one stripe of white material cut 1-1/4 wide (see 3.3.4).					
	b. Fold the raw edges of the scarlet stripes to the center back, abutting the raw edges. Baste along the folded edges.	101		4-6		
	c. Fold the white stripe in half lengthwise and stitch together 1/8 inch from the folded edge forming a corded edge.	301	OSf-1	10-14	A	A

11	Make hip pocket flaps. Finished appearance. The hip pocket flaps shall finish smooth and flat, without twists, pleats, or puckers and shall be uniform in shape and size in accordance with patterns. The lining shall not be exposed on the outside. The edges of the flaps shall be well forced out and the edgestitching shall be uniform in width. The buttonholes shall be correctly positioned, clean cut, and well made, and the stitching securely caught in the basic material. a. Flaps for the hip pockets shall be made of two plies of basic material and one ply of fusible interlining. Fuse interlining to top ply of flap.					
	b. Stitch the two plies of basic material together 3/16 to 1/4 inch from the side and bottom edges. Evenly trim the edges for proper turning when necessary.	301 or 401	SSe-2 (a) SSe-2	10-16 10-16	0 0	0 0
	c. Turn the flaps, working out the seamed edges, corners and points completely. Edgestitch the seamed edges of flaps uniformly 1/16 to 3/32 inch from seamed edges, working the lining or under ply back from the finished edge of the flaps. The lining underply shall not be exposed on the outside.	301	SSe-2 (b)	10-16	0	0
	d. Make a vertical, eyelet end, taper bar type buttonhole cut 5/8 inch long through the center of the flap with the edge of the eyelet 1/2 to 5/8 inch above the center point. Buttonholes shall be well worked over gimp to fit a 22-line button with the ends of the buttonholes securely tacked. The purling of the buttonhole shall be on the outside of the flaps.	Buttonhole		52-54 per buttonhole including bartack	0	0

TABLE I MANUFACTURING REQUIREMENTS

NO	OPERATION	STCH TYPE	SEAM/ STCH TYPE	STCH/ IN	NDL	BOB/ LPR
13	Join outseams. Finished appearance. Outseams shall be carefully joined with notches matching and without twists, puckers or pleats. The seams shall start and finish evenly and lie smooth and flat.					
	a. Join the outseam with a 1/2 inch seam, matching the notches as indicated by marks on the patterns.	301 or 401	SSa-1 SSa-1	12-14 12-14	30/3 30/3	30/3 30/3
	b. Spread open the outseams from top edge of slacks to bottom and press smooth and flat with a heated pressing machine.					
14	Attach ornamental stripes.(Class 1) Finished appearance. Ornamental stripes shall be set on the slacks from top edge of fronts to bottom edge of legs, with the top end to finish in the waistband seam. The ornamental stripes shall be securely and uniformly stitched, properly positioned and shall finish without distortion.					
	a. Position the ornamentation centered on the outseam. Seam to slacks from top to bottom 1/8 inch from edge of ornamentation.	301	SSat-2	10-14	A	A
15	Make waistband. Finished appearance. The two piece waistband shall be constructed with left and right parts. Each part shall consist of 1 ply of basic material and 1 ply of interlining. The left waistband shall have a pointed front end and the right waistband shall have a square end. The center back of the waistbands shall have square ends.					
	a. Overedge stitch the inside raw edge of left and right waistbands, and interlinings.	503 or 504	EFd-1	8-10	70/2	70/2

23	Attach hooks and eyes. Finished appearance. In the finished trousers, when hook and eye is engaged, the closure shall not bulge, pucker or twist. a. Position the hook at the center (1/4 inch off center tolerance) of the left waistband with the rolled edge of hook aligned with the slide fastener scoops. Attach hook to left waistband through a suitable reinforcement. b. Position the eye at the center of the right waistband aligned with slide fastener scoops and to correspond with hook and left waistband. Attach eye to right waistband through a suitable reinforcement.					
24	Topstitch waistband. Finished appearance. The waistband shall be sewn on smoothly and evenly and shall have a flat appearance throughout, without gathers, puckers, pleats or other distortions either in the waistband, front part or back part, and shall be even in width along the entire length. The waistband shall be 1-3/8 ± 1/8 inches wide. a. Topstitch the waistband to the slacks 1/16 inch from the lower folded edge, catching the overedge stitched portion of waistband in the stitching, and with the stitching extending the entire length of the waistband.	301	BSr-2 (a)	12-14	50/3	50/3
25	Bartack fly. Finished appearance. The bartacks shall be properly positioned and correctly placed to reinforce the points of strain.

18	36	48-1/2	32	34	36	21	18-1/2
Tolerance	± 1/2	± 1/2	± 1/2	± 1/2	± 1/2	± 1/2	± 1/2

1/ All measurements and tolerances are expressed in inches.

2/ Waist. Twice the measurement taken in center of waistband from folded edge to folded edge.

3/ Hips. Twice the measurement taken from folded edge to folded edge 7 inches from bottom of waistband.

4/ Inseam. Length measurement taken along inseam from crotch seam to unfinished bottom of legs.

5/ Knee. Twice the measurement taken from folded edge to folded edge across the width of slack leg at a point up from unfinished bottom of leg as follows: Short - 19-1/2 (±1/4) inches; Regular - 20-1/2 (±1/4) inches; Long - 21 (±1/4) inches.

6/ Bottom. Twice the measurement taken from folded edge to folded edge across unfinished bottom of leg.

3.8 Workmanship. The finished slacks shall conform to the quality and grade of product established by this specification. The occurrence of defects shall not exceed the applicable acceptable point value or defect limit.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract, or purchase order the contractor is responsible for the performance of all inspection requirements (examinations and tests) as specified herein. Except as otherwise specified in the contract, or purchase order the contractor may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to the prescribed requirements.

4.1.1 Responsibility for compliance. All items must meet all requirements of sections 3 and 5. The inspection set forth in this specification shall become a part of the contractor's overall inspection system or quality program. The absence of any inspection requirements in the specification shall not relieve the contractor of the responsibility of assuring that all products or supplies submitted to the Government for acceptance comply with all requirements of the contract. Sampling inspection as part of manufacturing operation is an acceptable practice to ascertain conformance to requirements, however this does not authorize submission of known defective material, either indicated or actual, nor does it commit the Government to acceptance of defective material.

4.1.2 Responsibility for dimensional requirements. Unless otherwise specified in the contract or purchase order, the contractor is responsible for ensuring that all specified dimensions have been met. When dimensions cannot be examined on the end item, inspection shall be made at any point, or at all points in the manufacturing process necessary to ensure compliance with all dimensional requirements.

4.1.3 Certificate of compliance. Where certificates of compliance are submitted, the Government reserves the right to check test such items to determine the validity of the certification.

4.2 Classification of inspection. The inspection requirements specified herein are classified as follows:

1. First article inspection (see 4.4).
2. Quality conformance inspection (see 4.5).

4.3 Inspection conditions. Unless otherwise specified, all inspections shall be performed in accordance with the test conditions specified in MIL-STD-656.

4.4 First article inspection. When first article is required, inspection shall be made of a completely fabricated pair of slacks for all provisions in this specification.

4.5 Quality conformance inspection. Inspection shall be performed in accordance with MIL-STD-656.

Source: https://assist.dla.mil -- Downloaded: 2026-10-20T22:51Z
Check the source to verify that this is the current version before use.

4.5.1 Testing of components. Testing of components shall be in accordance with the applicable subsidiary specifications and standards to the extent applicable, except that this specification shall govern in the event of conflict. The method of testing shall be as specified in FED-STD-191, wherever applicable. Testing shall be performed on components listed in Table III for characteristics noted. A certificate of compliance will be acceptable for the plastic coil slide fastener requirements of 3.3.7.2. In addition, the requirements that all components of the slide fastener have been furnished by one supplier shall be accepted on a certification of compliance (see 3.3.6.1).

4.5.2 In process inspection. Inspection shall be performed during the manufacturing of the end item to ascertain that the operations are performed as specified herein. The Government reserves the right to determine the acceptability of construction methods not performed in accordance with specified requirements for operations or subassemblies.

4.5.3 End item examination. Samplings and examination of the end item shall be performed for dress (D) slacks in accordance with the provisions of MIL-STD-656.

4.5.3.1 Finished measurement examination. The provisions for the finished measurement examination of the finished slacks shall be as specified in MIL-STD-656.

4.5.4 Examination of packaging requirements. The examination for compliance with packaging, packing and marking requirements shall be as specified in MIL-STD-656.

5. PACKAGING

5.1 Preservation. Preservation shall be level A or commercial (see 6.2).

5.1.1 Level A. Each pair of slacks shall be neatly folded so that the length dimension is approximately 23 inches. Each pair of folded slacks shall be inserted in a snug-fitting flat clear polyethylene film bag conforming to A-A-50083.

5.1.2 Commercial. Slacks shall be preserved in accordance with ASTM D 3951.

5.2 Packing. Packing shall be level A, or commercial (see 6.2).

5.2.1 Level A. Twenty (20) pairs of slacks of one class, size, and length only, packaged as specified in 5.1, shall be packed in a fiberboard shipping container, assembled, closed and reinforced conforming to type CF, class weather-resistant, variety SW, Grade V3c, size 2A, of MIL-B-17757. The fiberboard for the liner shall conform to type CF, class weather-resistant, variety DW, grade V15c of MIL-B-17757. Level A folded slacks shall be packed flat, alternated end for end, within a shipping container. Each container shall have the contents completely covered on top and bottom with a sheet of commercial grade kraft paper.

5.2.2 Commercial. Slacks preserved as specified in 5.1, shall be packed in accordance with ASTM D 3951.

Check the source to verify that this is the current version before use.

5.3 Marking. In addition to any special marking required by the contract or purchase order, interior packages and shipping containers shall be marked in accordance with MIL-STD-129.

5.3.1 Polyethylene bagged packages. Polyethylene bagged packages shall have the following information legibly printed or stamped in black directly on the bag across the center face or on a white paper label inserted within the bag so as to permit ready identification. The bag or label shall indicate the following information.

STOCK NUMBER
NOMENCLATURE
SIZE AND LENGTH

6. NOTES

(This section contains information of a general or explanatory nature that may be helpful, but is not mandatory.)

6.1 Intended use. The slacks described herein are intended for wear by female personnel of the Marine Corps.

6.2 Acquisition requirements. Acquisition documents should specify the following:

a. Title, number and date of this specification.
b. Classes, sizes and lengths required (see 1.2).
c. Whether first article is required (see 3.2).
d. Selection of applicable levels of packaging and packing (see 5.1 and 5.2).
e. Acceptance criteria (see 6.5).

6.3 Guide samples and shade samples. For information regarding the availability of samples, address inquiry to the procuring activity issuing the invitation for bids.

6.4 First article. When a first article is required, it shall be inspected and approved under the appropriate provisions of FAR 52.209 and the requirements of this specification. The sample(s) presented for inspection may be first articles, preproduction samples, first production of sample(s) taken from the first lot depending on the contractors history and will be as directed by the Contracting Officer. The Contracting Officer should include specific instructions in all acquisition instruments regarding arrangements for selection, inspection, and approval of the first article.

6.5 Acceptance criteria. The acceptance criteria as specified in the contract or purchase order shall be binding.

6.6 Subject term (key word) listing.

Female
Pants

6.7 Figures. Figures are furnished for information purposes only. To the extent of any inconsistencies between the written specification and the figure, the written specification shall control.
