TIER I ADOPTION NOTICE

IEEE 1730.1-2013, *IEEE Recommended Practice for Distributed Simulation Engineering and Execution Process (DSEEP) Multi-Architecture Overlay (DMAO)* was adopted for use by the Department of Defense (DoD) on 04 January 2017. Proposed changes by DoD activities must be submitted to the DoD Adopting Activity: Defense Modeling and Simulation Coordination Office, Attn: Standards, 4800 Mark Center Drive, Suite 16E08-08, Alexandria, VA 22350-3600 or via email at osd.mssc.secretariat@mail.mil.

IEEE 1730.1 identifies and describes multi-architecture issues and best practices for multi-architecture simulation environments. It is an overlay to, and should be used with, the IEEE 1730-2010, *IEEE Recommended Practice for Distributed Simulation Engineering and Execution Process (DSEEP),* a high-level process framework for integrating lower-level distributed simulation systems engineering practices. DMAO can be used when integrating several common distributed simulation architectures, including Distributed Interactive Simulation (DIS) (IEEE 1278 series), High Level Architecture (HLA) (IEEE 1516 series), and Test and Training Enabling Architecture (TENA).

The IEEE 1730 series of standards is maintained by the Simulation Interoperability Standards Organization (SISO) Standard Activities Committee, serving as the IEEE Computer/Simulation Interoperability (C/SI) Standards Committee. Copies of this document may be purchased from the Institute of Electrical and Electronics Engineers at the IEEE Customer Service Center, 445 Hoes Lane, P.O. Box 1331, Piscataway, NJ 08855-1331, U.S.A. or via the web at www.standards.ieee.org. SISO members may download one copy free at www.sisostds.org.
