COMMERCIAL ITEM DESCRIPTION

CIRCUIT BREAKER, AUTOMOTIVE BLADE TYPE, MINIATURE, AUTOMATIC OR MODIFIED RESET, 7.5 AMPERES (A) TO 30A

The General Services Administration has authorized the use of this commercial item description (CID) for all federal agencies.

1. SCOPE. This CID covers the general requirements for miniature, automotive blade type, circuit breakers designed to protect wiring harnesses in 12 volt dc automotive systems. Circuit breakers covered by this CID are intended for commercial/industrial applications.

2. CLASSIFICATION. This CID uses a classification system which is included in the Part Identification Number (PIN) as shown in the following example (see 7.1).

AA59542/02	-	01	1
CID number		Dash number (see table I)	Reset type (1) Automatic reset, type I (see 3.4) (2) Modified reset, type II (see 3.5)

3. SALIENT CHARACTERISTICS.

3.1 Interface and physical dimensions. Circuit breakers supplied to this CID shall be as specified herein, and shall meet the requirements of Society of Automotive Engineers (SAE) J553 for circuit breakers (see figure 1).

3.2 Ampere rating. The ampere rating shall be as specified in table I.

3.3 Voltage rating. The voltage rating shall be 12 V dc.

3.4 Automatic reset. Automatic reset type circuit breakers are identified by the number 1 and shall meet the requirements of SAE J553 for type I, automatic reset circuit breakers. Automatic reset circuit breakers are cycling or continuously self-resetting units which are opened by overcurrent.

3.5 Modified reset. Modified reset circuit breakers are identified by the number 2 and shall meet the requirements of SAE J553 for type II, modified reset circuit breakers. Modified reset circuit breakers are units which are opened by overcurrents and remain open as long as the power is on or until the load is removed. A number of cycles may occur prior to achieving the steady-state open condition.
