SUPERSEDING
Int. Fed. Spec. WW-H-00560A(GSA-FSS)
October 5, 1970

FEDERAL SPECIFICATION

HOLDER, SOAP (DISPOSABLE)

This specification was approved by the Commissioner, Federal Supply Service, General Services Administration, for the use of all Federal Agencies.

1. SCOPE AND CLASSIFICATION

1.1 Scope. This specification covers disposable soap holders.

1.2 Classification. Soap holders shall be the following types, as specified (see 6.2):

Type I - Metal.
II - Plastic.

2. APPLICABLE DOCUMENTS

2.1 The following documents, of the issue in effect on date of invitation for bids or request for proposal, form a part of this specification to the extent specified herein.

Federal Specification:

PPP-B-636 - Box, Fiberboard.

Federal Standard:

Fed. Std. No. 123 - Marking for Domestic Shipment (Civil Agencies).

(Activities outside the Federal Government may obtain copies of Federal Specifications, Standards, and Handbooks as outlined under General Information in the Index of Federal Specifications and Standards and at the prices indicated in the Index. The Index, which includes cumulative monthly supplements as issued, is for sale on a subscription basis by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

(Single copies of this specification and other Federal Specifications required by activities outside the Federal Government for bidding purposes are available without charge from Business Service Centers at the General Services Administration Regional Offices in Boston, New York, Washington, DC, Atlanta, Chicago, Kansas City, MO, Fort Worth, Denver, San Francisco, Los Angeles, and Seattle, WA.

(Federal Government activities may obtain copies of Federal Specifications, Standards, and Handbooks and the Index of Federal Specifications and Standards from established distribution points in their agencies.)

Military Standards:

MIL-STD-105 - Sampling Procedures and Tables for Inspection by Attributes.
MIL-STD-129 - Marking for Shipment and Storage.

(Copies of Military Specifications and Standards required by contractors in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

2.2 Other publications. The following documents form a part of this specification to the extent specified herein. Unless a specific issue is identified, the issue in effect on date of invitation for bids or request for proposal shall apply.

American Society for Testing and Materials (ASTM) Standard:

D635 - Flammability of Self-Supporting Plastics.

Check the source to verify that this is the current version before use.

(Application for copies should be addressed to the American Society for Testing and Materials, 1916 Race Street, Philadelphia, PA 19103.)

Uniform Classification Committee, Agent:

Uniform Freight Classification.

(Application for copies should be addressed to the Uniform Classification Committee, Traiff Publishing Officer, Room 202 Union Station, 516 W. Jackson Blvd., Chicago, IL 60606.)

National Motor Freight Traffic Association, Inc., Agent:

National Motor Freight Classification.

(Application for copies should be addressed to the National Motor Freight Traffic Association, Inc., Agent, 1616 P Street N.W., Washington, DC 20036.)

3. REQUIREMENTS

3.1 Material.

3.1.1 Type I, metal. Metal holders shall be formed from any suitable aluminum alloy sheet, strip or foil. Temper of aluminum alloy shall be at the manufacturer's option.

3.1.2 Type II, plastic. Plastic holders shall be molded from any of the following plastics at the manufacturer's option:

(a) Chlorinated polyether.
(b) Fluorinated poly (ethylene copropylene) FEP resins.
(c) Nylon 66.
(d) Poly (tetra-fluorethylene).
(e) Poly (vinyl chloride).
(f) Polycarbonate resins.
(g) Polystyrene.

3.2 Types I and II.

3.2.1 Capacity and shape. Holder shall be capable of holding a full, personal sized cake of soap, and providing for the drying of the soap between uses. Holders shall be rectangular in shape and dimensioned so they may be stored in stacks, one within another.

3.2.2 Dimensions. Holders shall have the inside bottom dimensions of 2-1/4 ± 1/2 inches wide, 3-1/2 ± 1/2 inches long and 1/2 ± 1/16 inch deep. Raised ribs to provide for air circulation for drying shall be 1/8 ± 1/32 inch in height and shall be the entire length of the holder.

3.2.3 Identification marking. The bottom surface of the holder shall be permanently and legibly marked to indicate the item as a disposable single use type of plastic soap holder. Wording shall be at the option of the manufacturer.

3.3 Type II, plastic holders.

3.3.1 Color. Holders shall be colorless or of a pastel shade. Value, hue and chroma of color shall be at the manufacturer's option.

3.3.2 Flammability. Holders shall not ignite when tested in accordance with 4.4.1.

3.4 Workmanship. Holders shall be free from holes, sharp edges, fins or projections and any other defects which would impair its serviceability for its intended use.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified, the supplier may utilize his own facilities or any commercial laboratory acceptable to the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirements.

Check the source to verify that this is the current version before use.

4.2 Sampling.

4.2.1 Lot. Unless otherwise specified (see 6.2), a lot shall consist of all soap holders of the same type offered from inspection at one time.

4.2.2 Sampling for examination and tests. Size of sample for examination shall be level S4 in MIL-STD-105. Samples for test shall be in accordance with ASTM D635.

4.3 Examination.

4.3.1 End item. Examination of the end items shall be in accordance with the classification of defects in table I. The Acceptable Quality Levels (AQL's) shall be 4.0 for major defects and 6.5 for total defects expressed in defects per hundred units.

TABLE I. Classification of defects, end item

Defects	Major	Minor
Type not as specified	X	
Shape not rectangular, ribs for drying missing.	X	
Dimensions (length, width, depth and rib height) not correct.	X	
Identification marking missing, not permanently indented, or illegible.	X	
Sharp edges, fins or project not affecting servicability.		X
Holes in holder.	X	
Color not as required (colorless or pastel shade).	X	

4.3.2 Inspection of preparation for delivery requirements. An inspection shall be made to determine that the packing marking comply with the requirements in section 5 of this specification. Defects shall be scored in accordance with table II. The sample unit shall be one shipping container fully prepared for delivery. Sampling shall be in accordance with MIL-STD-105. The lot size shall be the number of shipping containers in the end item inspection lot. The inspection level shall be II and the AQL shall be 4.0 defects per hundred units.

TABLE II. Classification of preparation for delivery defects

Examine	Defects
Markings (exterior)	Omitted; incorrect; illegible; improper size, location sequence, or method of application.
Materials	Any component missing, or damaged.
Workmanship	Inadequate application of components such as incomplete closure of container flaps, loose strapping, distortion or container.

4.4 Test method.

4.4.1 Flammability, type II. Test plastic holders for nonburning in accordance with ASTM D635 (see 3.3.2).

5. PREPARATION FOR DELIVERY

5.1 Packing. Packing shall be level A, B or C as specified (see 6.2).

5.1.1 Level A. One thousand (1,000) soap holders of like discription shall be nested and packed in a close-fitting box conforming to PPP-B-636, W5c. The box shall be closed and waterproof sealed with tape in accordance with the appendix to the box specification.

5.1.2 Level B. One thousand (1,000) soap holders of like description shall be nested and packed in a close-fitting box conforming to PPP-B-636, class domestic. Closure shall be in accordance with the appendix to the box specification.

5.1.3 Level C. Soap holders shall be packed in a manner which will insure arrival at destination in satisfactory condition and be acceptable to the carrier at lowest rates. Containers and packing shall comply with Uniform Freight Classification rules, or with National Motor Freight Classification rules.

Check the source to verify that this is the current version before use.

5.2 Marking. In addition to any special marking required by the contract or order, the shipping containers shall be marked in accordance with Fed. Std. No. 123 or MIL-STD-129 as applicable (see 6.2).

6. NOTES

6.1 Intended use. The disposable soap holders are intended as a sanitary means for storing a persons individual bar of soap.

6.2 Ordering data. Purchasers should select the preferred options permitted herein, and include the following information in procurement documents:

(a) Title, number, and date of this specification.
(b) Type (see 1.2).
(c) Size of lot, if different from 4.2.1.
(d) Level of packing required (see 5.1).
(e) Marking required (see 5.2).

Preparing activity:

GSA-FSS

Orders for this publication are to be placed with the General Services Administration, acting as an agent for the Superintendent of Documents. See section 2 of this specification to obtain extra copies and other documents referenced herein. Price 5 cents each.
