DATA ITEM DESCRIPTION

Title: NUCLEAR CERTIFICATION IMPACT STATEMENT (NCIS)

Number: DI-NUOR-81888A

Approval Date: 20130213

AMSC Number: F9332

Limitation:

DTIC Applicable: N/A

GIDEP Applicable:

Office of Primary Responsibility: 27 (AFNWC)

Applicable Forms: N/A

Use/Relationship: The NCIS is required for the development of new nuclear certifiable items (procedures, equipment, software/firmware, facilities, systems, subsystems or components having a nuclear mission), and also required for the modification to pre-existing nuclear certified items in order to determine if the modification could affect nuclear certification. When it is determined that an item requires nuclear certification or will change the status of a previously certified item, the Air Force Nuclear Weapons Center (AFNWC)/NCS shall be formally notified by submission of the NCIS. The NCIS is a prerequisite before initiation of the nuclear certification process and therefore must be submitted prior to the release of a request for proposal or an equivalent program milestone.

a. There are two different NCIS forms that are provided by the AFNWC/NCS, the NCIS Short Form and the NCIS Long Form (for use with Detailed NCIS). The NCIS short form is intended for a proposed change to a nuclear certifiable item that will result in minor nuclear certification impact. The Detailed NCIS is intended for nuclear certification actions that require a more comprehensive nuclear certification impact description. Items requiring a Detailed NCIS are nuclear certifiable items that have not previously been nuclear certified (i.e., a new/or current weapon system that is tasked to support nuclear missions).

b. This Data Item Description (DID) is related to DI-NUOR-81409, Certification Requirements Plan, Air Force Instruction (AFI) 63-125, *Nuclear Certification Program*, and AFI 91-107, *Design, Evaluation, Troubleshooting, and Maintenance Criteria for Nuclear Weapon Systems*, AFI 91-103, *Air Force Nuclear Safety Design Certification Program*, Air Force Manual (AFMAN) 91-118, *Safety Design and Evaluation Criteria for Nuclear Weapon Systems*, AFMAN 91–119, *Safety Design and Evaluation Criteria for Nuclear Weapon Systems Software* and NCIS Coordination Form V7.

(Copies of AF Instructions and Manuals are available online at http://www.e-publishing.af.mil/. Copies of the NCIS Coordination Form can be obtained from: AFNWC/NCS, OPR: Richard Burton, 8601 Frost Ave., Bldg 20203, Kirtland AFB, NM 87117-5624 or e-mail Richard.Burton@Kirtland.af.mil.)

Requirements:

1. Reference documents. The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments, notices and revisions, shall be as specified in the solicitation or contract.

2. Format. Contractor must use either the Short or Long Forms provided by the AFNWC/NCS.

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

3. Content. The NCIS shall provide the evaluation of the potential for a nuclear certification impact and also provide the data necessary for the AFNWC/NCS to define the basic certification requirements. The NCIS short form shall be included for a proposed change to a nuclear certifiable item that will result in minor nuclear certification impact. The detailed NCIS shall be included for nuclear certification actions that require a more comprehensive nuclear certification impact description.

3.1 NCIS Short Form Template. The NCIS Short Form template is provided by the AFNWC/NCS as guidance. To aid with the understanding of the nuclear certification impact, supplementary information can be attached to the NCIS Short Form. If the AFNWC determines that the NCIS is insufficient the process can be delayed.

3.1.1 The NCIS Short Form template provides sections for and shall include the following information:

a. Certification Components Impacted:

Block a. Design certification.

Block b. Operational certification.

Block c. Proposed release case

b. Scope of Impact:

Block a. Systems that will be affected.

Block b. Miscellaneous (Project is, Project requires, Project affects, Project result of).

Block c. Equipment/software affected.

Block d. Tech Orders affected.

c. Signature Block:

Block a. Submitter's name.

Block b. NCM's name.

Block c. SPM's name.

d. Description (a functional description of potential nuclear certification impact).

e. Nuclear Certification Recommendation.

3.2 Detailed NCIS. A detailed NCIS shall be derived from the NCIS Long Form template which is provided as guidance and shall be tailored as needed to adequately describe the certification impact. Nuclear certifiable items requiring a Detailed NCIS are items that have never been nuclear certified (i.e., a new/or current weapon system that is tasked to support nuclear missions).

3.2.1 The NCIS Long Form Template. The NCIS Long Form template provides sections for and shall include the following information:

a. Certification Components Impacted:

Block a. Design certification.

Block b. Operational certification.

Block c. Proposed release case.

Check the source to verify that this is the current version before use.

b. Scope of Impact:

Block a. Systems that will be affected.

Block b. Miscellaneous (Project is, Project requires, Project affects, Project result of).

Block c. Equipment/software affected.

Block d. Tech Orders affected.

c. Signature Block:

Block a. submitter's name.

Block b. NCM's name.

Block c. SPM's name.

d. Table of Contents.

e. List of Figures – specific drawings, changes and actual depiction of proposed modifications.

f. Background:

(1) Introduction.

(2) Purpose.

(3) Scope.

(4) Description.

(5) Schedule.

g. Design Certification:

(1) Compatibility Certification.

(2) Nuclear Safety Design Certification.

(3) Rules Development.

(4) Technical Order Certification.

h. Operational Certification:

(1) Qualification Training.

(2) Personnel Reliability Program (PRP).

(3) Nuclear Surety Training.

(4) Initial Nuclear Surety Inspection (INSI).

i. Conclusion

j. Recommendation

k. References

l. Attachments – include any additional information deemed appropriate.

4. End of DI-NUOR-81888.
