MILITARY SPECIFICATION SHEET

COATING, HIGH REFLECTANCE, FIRST SURFACE, ORDINARY REQUIREMENTS FOR

The complete requirements for procuring the first surface high reflectance coating described herein shall consist of this document and the latest issue of Specification MIL-F-48616.

This specification is approved for use by all Departments and Agencies of the Department of Defense.

Requirements for first surface high reflectance coatings are given in Table I. The table provides the minimum allowable reflectance for several wavelength ratios.

TABLE I

First Surface High Reflectance Coatings - Minimum Reflectance per Surface

Wavelength Ratio λ_2/λ_1	Minimum Allowable Reflectance*	Dash No.
1 to 1.05	99	1
1.05 to 1.12	98	2
1.12 to 2	97	3
2	96	4

*For $\lambda 2/\lambda 1$, 1.0 maximum average reflectance between λ_1 and λ_2.

NOTES FOR TABLE I:

1. The wavelengths $\lambda 1$ and λ_2 are the extreme values of the wavelength region of interest.

2. The values given in this table apply at an angle of incidence ranging from 0° to 15° and ambient temperature. Reflectance measurements are to be performed at an angle of incidence between 0° and 15° (See 6.4b and 6.4c) of MIL-F-48616. When measurements are made at larger angles, the data shall be corrected to normal incidence.

Ordering Data:

The wavelength region of interest (See 6.2m) (λ_1 & λ_2) and the dash number (See 6.2b) shall be specified by the procuring activity.

Preparing activity:
