MILITARY SPECIFICATION

SODIUM SULFACETAMIDE AND PREDNISOLONE ACETATE OPHTHALMIC SUSPENSION, 5 cc

This specification is approved for use by all Departments and Agencies of the Department of Defense.

1. SCOPE

1.1 This specification covers Sodium Sulfacetamide and Prednisolone Acetate Ophthalmic Suspension (see 6.2). Potency: 24 months.

2. APPLICABLE DOCUMENTS

2.1 The following documents, of the issue in effect on date of invitation for bids or request for proposals, form a part of this specification to the extent specified herein:

SPECIFICATIONS

Federal

PPP-C-00186B	Containers, Packaging and Packing for Drugs, Chemicals, and Pharmaceuticals.

STANDARDS

Military

MIL-STD-105	Sampling Procedures and Tables for Inspection by Attributes.

(Copies of specifications and standards required by contractors in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

2.2 Other publications. The following documents form a part of this specification to the extent specified herein. Unless otherwise indicated, the issue in effect on date of invitation for bids or request for proposals shall apply.

3. REQUIREMENTS

3.1 Material. Shall be a sterile, aqueous, nonirritating ophthalmic suspension containing Prednisolone Acetate, 0.25%; Sodium Sulfacetamide, 10.00%; Hydroxypropyl Methylcellulose (4,000 Centipoises), and suitable buffering and preservative agents. No chlorobutanol shall be used. The Prednisolone Acetate shall be in microfine suspension in the finished product.

3.2 Ingredients.

3.2.1 Prednisolone Acetate and Sodium Sulfacetamide. The Prednisolone Acetate and Sodium Sulfacetamide used in the manufacture of the suspension shall be in accordance with the tests, standards, and requirements of the U.S.P., including any supplements or revisions thereto.

3.2.2 Hydroxypropyl Methylcellulose. The Hydroxypropyl Methylcellulose used in the ophthalmic suspension shall be in accordance with the tests, standards, and requirements of the N.F., including any supplements or revisions thereto. In addition, the Hydroxypropyl Methylcellulose shall have a viscosity of 4,000 centipoisies (cps) when tested in accordance with the procedure outlined in the N.F.

Check the source to verify that this is the current version before use.

3.2.3 Other ingredients. All other ingredients entering into the manufacture of the sterile suspension shall be of U.S.P. or N.F. quality, and shall be suitable for use in this ophthalmic suspension.

3.3 Assay.

3.3.1 Prednisolone Acetate. The ophthalmic suspension shall assay to contain not less than 90.0 percent and not more than 110.0 percent of the required amount of Prednisolone Acetate, U.S.P., when assayed by the method specified in the U.S.P. for "Sterile Prednisolone Acetate Suspension."

3.3.2 Sodium Sulfacetamide. The ophthalmic suspension shall assay to contain not less than 95.0 percent and not more than 105.0 percent of the required amount of Sodium Sulfacetamide, U.S.P., when assayed by the method specified in the U.S.P. for "Sodium Sulfacetamide Ophthalmic Solution."

3.3.3 Hydroxypropyl Methylcellulose. The ophthalmic suspension shall assay to contain not less than 90.0 percent and not more than 110.0 percent of the required amount of Hydroxypropyl Methylcellulose, N.F., when assayed by an appropriate, accurate, and reproducible method.

3.3.4 pH value. The ophthalmic suspension shall have a pH value between 6.70 and 6.95 at 25° C., when determined potentiometrically using the U.S.P. method.

3.4 Sterility. The ophthalmic suspension shall be sterile when tested in accordance with the U.S.P. sterility test method for "Liquids".

3.5 Certificates of sterility. A certificate of sterility, listing all lot or control numbers, shall state that samples from each sterility lot have been tested in accordance with U.S.P. method and found to be sterile. When inspection is made at source, certificate shall be submitted to cognizant quality assurance representative for transmittal to Technical & Quality Assurance Division, Directorate of Medical Materiel, Defense Personnel Support Center, ATTN: Quality Assurance Branch, 2800 South 20th Street, Philadelphia, Pa. 19101. When inspection is made at destination, certificate of sterility shall be submitted by contractor directly to the Defense Personnel Support Center, addressed as shown above, and a copy shall be forwarded with shipment to the consignee.

3.6 Delivery. Not less than 21 months of the expiration dating period (potency period) shall remain at time of delivery to the Government.

3.7 Workmanship. Workmanship shall be first class throughout. Material and its containers shall be free from defects which detract from their appearance or may impair their serviceability.

4. QUALITY ASSURANCE PROVISIONS

4.1 Supplier responsibility for inspection. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or order, the supplier may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

4.1.1 Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government, upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of 3 years after delivery of the supplies to which such records relate.

4.2 No company supplying any ingredient(s) to the contractor will be considered an acceptable facility for the performance of any inspection requirements specified herein.

4.3 Sampling. Sampling shall be conducted in accordance with Military Standard MIL-STD-105, with an AQL (percent defective) of 1.0 percent for major defects and 2.5 percent for minor defects.

4.4 Tests.

4.4.1 Tests and examinations shall be performed to determine compliance with all requirements of this document and all referenced documents.

5. PREPARATION FOR DELIVERY

5.1 Shall be in accordance with all applicable requirements of Interim Federal Specification PPP-C-00186B, dated 15 June 1972, and as specified herein.

5.1.1 Immediate containers. Shall comply with the following: Shall be a commercially available dropper container having an ophthalmic tip, considered acceptable by the Food and Drug Administration (FDA) for the product contained therein and shall be of such compatibility that neither the contents nor the container are altered in any way by each other.

Check the source to verify that this is the current version before use.

5.2 Labeling. Labeling shall be in accordance with the requirements of the Federal Food, Drug and Cosmetic Act, and shall include the information required below:

5.2.1 Immediate container. Each immediate container label shall bear the following information:

(a) label information in accordance with commercial practice.

(b) the expiration date.

5.2.2 Unit packages. Each unit package label shall bear the following:

(a) labeling information in accordance with commercial practice.

(b) the National Stock Number.

NOTE: The National Stock Number shall not be preceded by any prefix.

Strip labeling may be used.

Label adhesion test shall not apply.

If a unit package is not supplied, the National Stock Number shall appear on the immediate container label.

5.3 Packaging and Packing.

5.3.1 Unit of issue. One bottle containing 5 cc, as specified, constitutes one unit of issue.

5.3.2 Unit package. At the option of the contractor a unit package may be furnished. If furnished, each unit shall be packaged as specified in 5.2.5 of PPP-C-00186B. As an alternate, the unit package may be a clear, rigid, plastic vial with a plug-type or sleeve-type closure. The closure shall be secured in position. Yellow colored plastic may be used provided the markings on the immediate container are visible through the plastic container. When a grade 2 immediate container is used, the unit package shall be light-resistant as specified above.

5.3.3 Procedure code. Procedure code No. 2 as specified in in Table I of PPP-C-00186B shall apply.

5.4 Marking.

5.4.1 Intermediate package. Each intermediate package shall be marked in accordance with 5.5.3 and 5.5.8.1 of PPP-C-00186B shall apply. Marking shall include the legend: "STORE AT CONTROLLED ROOM TEMPERATURE (59° - 86° F)" and "DO NOT PERMIT TO FREEZE".

5.4.2 Exterior container. Exterior container shall be marked in accordance with 5.5.4 and 5.5.8.1 of PPP-C-00186B. Marking shall include the legend: "STORE AT CONTROLLED ROOM TEMPERATURE (59° - 86° F)" and "DO NOT PERMIT TO FREEZE".

6. NOTES

6.1 Ordering data. Procurement documents should specifv the following:

(a) Number and date of this specification.
(b) the National Stock Number.
(c) Selection of applicable levels of packaging and packing (See 5.3).

6.2 This specification covers the following:

National Stock Number	Item Identification
6505-00-782-3901	SODIUM SULFACETAMIDE AND PREDNISOLONE ACETATE OPHTHALMIC SUSPENSION, 5 cc

6.3 This specification does not include all types, classes, grades, sizes, etc., of the commodity indicated by the title of this specification, or which are commercially available, but is intended to cover the types, etc., which are normally procured to meet Military requirements.
