COMMERCIAL ITEM DESCRIPTION

CHEESE TORTELLINI IN TOMATO SAUCE, KOSHER AND HALAL, THERMOSTABILIZED

The U.S. Department of Agriculture has authorized the use of this Commercial Item Description.

1. SCOPE

1.1 This Commercial Item Description (CID) covers thermostabilized, kosher certified and halal approved, cheese tortellini in tomato sauce, packed in flexible pouches, suitable for use by the Federal Government and as a component of the Meal, Ready-to-Eat, Individual.

2. SALIENT CHARACTERISTICS

2.1 Processing. The product shall be prepared in accordance with good commercial practice.

2.2 Ingredients. All ingredients shall be certified as kosher and approved as halal by recognized rabbinical and Islamic/Muslim organizations/authorities as specified in the solicitation, contract, or purchase order. Proof of their kosher and halal status shall be made available upon request. The cheese tortellini in tomato sauce shall include tortellini with cheese filling and tomato sauce.

2.2.1 Pasta. The pasta component (enriched) of the tortellini shall contain enriched wheat flour, water, and whole eggs or egg whites. The pasta shall be the type suitable for thermoprocessing.

Beneficial comments, recommendations, additions, deletions, clarifications, etc., and any data which may improve this document should be sent to: Commander, U.S. Army Natick Research, Development, and Engineering Center, ATTN: SATNC-WRE, Natick, MA 01760-5018.

Check the source to verify that this is the current version before use.

2.2.3 Cheese filling. The cheese filling component of the tortellini shall contain ricotta cheese, and may contain mozzarella, parmesan, and romano cheeses, or a combination thereof, bread or cracker crumbs, salt, vegetable oil, natural cheese flavors, and spices.

2.2.3.1 Mozzarella cheese. The mozzarella cheese shall comply with the Food and Drug Standard of Identity for Mozzarella (21 CFR 133.155).

2.2.3.2 Parmesan cheese. The parmesan cheese shall comply with the Food and Drug Standard of Identity for Parmesan (21 CFR 133.165).

2.2.3.3 Romano cheese. The romano cheese shall comply with the Food and Drug Standard of Identity for Romano (21 CFR 133.183).

2.2.3.4 Ricotta cheese. The cheese filling shall contain a minimum of 50 percent ricotta cheese.

2.2.4 Tomato sauce. The tomato sauce shall contain crushed tomatoes or diced tomatoes or a combination thereof, typical Italian herbs, spices and seasonings, parmesan and/or romano cheese, celery, onion, garlic, vegetable oil, and may also include tomato paste, tomato sauce, tomato puree, or a combination thereof, carrots or carrot powder, sugar, salt, and thickeners.

2.3 Finished product. The finished product shall be a uniform mixture of tortellini pasta with a mild cheese filling, and a mild Italian flavored sauce. The product shall show no evidence of excessive heating (materially darkened or scorched).

2.3.1 Appearance. The sauce shall have a red to reddish brown color with recognizable crushed tomato pieces and may contain visible flecks of herbs and spices. There shall be no foreign color to the product.

2.3.2 Odor and flavor. The sauce shall have a balanced blend of Italian seasonings with no excess bitterness or acidity. The cheese filling shall have a mild cheese flavor with no bitterness or rancidity. There shall be no foreign odors or flavors such as, but not limited to, burnt, scorched, moldy, rancid, sour, or stale.

2.3.3 Texture. The texture of the sauce shall be moderately thick and not excessively thin or pasty. The pasta shall have a characteristic, ring-like tortellini shape and be intact pieces. The texture of the pasta shall be soft, not mushy or hard. The cheese filling shall be soft and smooth textured, not rubbery, tough, or grainy.

2.3.4 Foreign material. There shall be no evidence of rodents and no foreign material such as, but not limited to, dirt, insect parts, hair, wood, or metal.

Check the source to verify that this is the current version before use.

2.3.5 Net and drained weight. The net weight of an individual pouch shall be not less than 7.5 ounces (212.6 g). No individual pouch shall contain less than 4.5 ounces (127.8 g) or more than 5.5 ounces (155.9 g) drained weight of tortellini.

2.3.6 Fat and salt content. The salt content of an individual pouch shall be not more than 1.2 percent. The fat content of an individual pouch shall be not more than 5.0 percent.

2.4 Pouch filling and sealing. Each pouch shall be filled with 8 ounces (226.8 g) of product so as to conform to the finished product and analytical requirements.

2.5 Thermoprocessing. The filled and sealed pouch shall be in the retort process within 2 hours after sealing and shall be thermoprocessed by retorting until a sterilization value (F_o) of not less than 6 has been achieved.

2.6 Analytical requirements. Eight filled, sealed, and thermoprocessed pouches shall be selected at random from the lot regardless of lot size and individually tested for fat and salt content. The test results shall be reported to the nearest 0.1 percent. Any result not conforming to the finished product requirements, as indicated by USDA test results, shall be cause for rejection of the lot. Analyses shall be made in accordance with the following methods of the Official Methods of Analysis of the AOAC:

Test	Method
Fat	925.12
Salt	935.47

3. REGULATORY REQUIREMENTS

3.1 The delivered cheese tortellini in tomato sauce shall conform with all applicable Federal and State mandatory requirements and regulations relating to the preparation, packaging, labeling, storage, distribution, and sales of the product within the commercial marketplace. Delivered cheese tortellini in tomato sauce shall conform in every respect to the provisions of the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder.

4. QUALITY ASSURANCE PROVISIONS

4.1 Contractor's certification. By submitting an offer, the contractor certifies that the product offered meets the specified salient characteristics and requirements of this CID; conforms to the producer's own specifications and standards, including product characteristics, manufacturing procedures, quality control procedures, and storage and handling practices; has a national or regional distribution from storage facilities located within the United States, its territories, or possessions; and is sold on the commercial

market. The Government reserves the right to determine proof of such conformance prior to the first delivery from point of origin and at any time thereafter, up to and including delivery at final destination, as may be necessary to determine conformance with the provisions of the contract.

4.2 Quality assurance. When the solicitation, contract, or purchase order requires that product quality or acceptability or both be determined, the Processed Products Branch (PPB), Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, shall be the certifying activity. The cheese tortellini in tomato sauce shall be examined or analyzed or both in accordance with applicable provisions in the CID, and when applicable, the United States Standards for Condition of Food Containers.

5. PACKAGING

5.1 Preservation, packaging, packing, labeling, and marking. The cheese tortellini in tomato sauce shall be preserved, packaged, packed, labeled, and case marked in accordance with good commercial practice. Commercial labeling and packaging, as may be augmented by the solicitation, contract, or purchase order, shall be acceptable. Vendors are permitted to place the kosher and halal certification symbol(s) and/or markings on individual packages and shipping containers. The symbols attest to compliance with applicable dietary (kosher and halal) laws. Shipping containers shall comply with the National Motor Freight Classification or Uniform Freight Classification, as applicable.

6 FOR DEPARTMENT OF DEFENSE PROCUREMENTS

6.1 The following tests and examinations are applicable to Department of Defense procurements of Operational Rations. Sampling shall be in accordance with MIL-STD-105, Sampling Procedures and Tables for Inspection by Attributes.

6.2 First article. When the solicitation, contract, or purchase order requires a first article, it shall be inspected in accordance with the quality assurance provisions of this document and evaluated for overall appearance and palatability. Any failure to conform to the quality assurance provisions of this document or any appearance or palatability failure shall be cause for rejection of the first article.

6.3 Packaging, packing, labeling, and marking. The cheese tortellini in tomato sauce shall be filled and sealed into a heat sealable flexible pouch, thermoprocessed, unit packed into paperboard cartons, and packed for shipment in accordance with class 2 of MIL-P-44073, Packaging and Thermoprocessing of Foods in Flexible Pouches. Labeling of pouches, marking of paperboard cartons and marking of shipping containers shall also be in

Check the source to verify that this is the current version before use.

accordance with MIL-P-44073. Inspection of filled and sealed pouches, paperboard cartons and shipping containers shall be in accordance with the quality assurance provisions of MIL-P-44073.

6.4 Net weight examination. The net weight of the filled and sealed pouches shall be determined by weighing each sample unit on a suitable scale tared with a representative empty pouch. Any individual net weight of less than 7.5 ounces (212.6 g) shall be classified as a minor defect. The lot size shall be expressed in pouches. The sample unit shall be one filled and sealed pouch. The inspection level shall be S-3, and the acceptable quality level (AQL), expressed in terms of defects per hundred units, shall be 2.5. Results shall be reported to the nearest 0.1 ounce (3 g). In addition, the lot shall be rejected if the sample average net weight is less than 8.0 ounces (226.8 g).

6.5 Product and drained weight examination.

6.5.1 Double sampling plan for product examination. The finished product shall be examined for the defects listed in Table I utilizing the double sampling plans indicated in MIL-STD-105. The filled and sealed sample pouches shall be held for a minimum of 72 hours at room temperature (65 to 75°F [18 to 24°C]) after completion of the thermostabilization operation. The pouches shall be heated in 180 to 190°F (83 to 87°C) water for 10 minutes, opened, and inspected. The lot size shall be expressed in pouches. The sample unit shall be the contents of one pouch. The inspection level shall be S-3 and the AQL, expressed in terms of defects per hundred units, shall be 1.5.

TABLE I. Product defects 1/ 2/ 3/

Category	Defect
Major	
101	Not a uniform mixture of tortellini pasta, cheese filling, and sauce.
102	Color and content of sauce not as specified.
103	Odor and flavor of sauce or cheese filling not as specified.
104	Pasta not a characteristic, ring-like tortellini shape.
105	Texture of pasta is mushy or hard.
106	Texture of cheese filling is not smooth, or is rubbery, tough, or grainy.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T08:34Z
Check the source to verify that this is the current version before use.

TABLE I. Product defects 1/ 2/ 3/ (Continued)

Category	Defect
Major	
107	Sauce consistency is excessively thin, thick, or pasty.
108	Product shows evidence of excessive heating (materially darkened or scorched).

1/ Any product not kosher certified and halal approved shall be cause for rejection of the lot.

2/ The presence of any foreign material (for example, dirt, insect parts, hair, wood, glass, metal), foreign odor or flavor (for example, burnt, scorched, moldy, rancid, sour, stale), or foreign color shall be cause for rejection of the lot.

3/ Product not equal to or better than the approved first article sample in palatability and overall appearance shall be cause for rejection of the lot.

6.5.2 Double sampling plan for drained weight examination. The finished product shall be examined for the drained weight defects listed in Table II utilizing the double sampling plans indicated in MIL-STD-105. The filled and sealed sample pouches shall be held for a minimum of 72 hours at room temperature (65 to 75°F [18 to 24°C]) after completion of the thermostabilization operation. The pouches shall be heated in 180 to 190°F (83 to 87°C) water for 10 minutes, opened, and inspected. The lot size shall be expressed in pouches. The sample unit shall be the contents of one pouch. The inspection level shall be S-3 and the AQL, expressed in terms of defects per hundred units, shall be 1.5.

TABLE II. Drained weight defects 1/

Category	Defect
Major	
101	Drained weight of pasta with cheese filling is less than 4.5 ounces (127.8 g) or more the 5.5 ounces (155.9 g).

1/ To determine the drained weight, the pouch contents shall be poured into a flat bottom container. A minimum of three times the pouch's volume of 180 to 190°F (83 to 87°C) water shall be added to the container so as to cover the contents. The contents and water shall be gently agitated without breaking the pasta or vegetables. The contents shall then

Check the source to verify that this is the current version before use.

be poured into a U.S. Standard No. 7 sieve (2.80 mm) in a manner that will distribute the product over the sieve without breaking the pasta or vegetables. Sieve area shall be such that the distributed product does not completely cover all the openings of the sieve. The sieve shall be tilted at approximately a 45° angle and allowed to drain for 2 minutes before determining the drained weight by subtracting the sieve tare weight from the gross weight. The drained weight shall be reported to the nearest 0.1 ounce (3 g).

7. NOTES

7.1 Sources of documents.

7.1.1 Sources of information for nongovernmental documents are as follows:
