MILITARY SPECIFICATION

HOLDER: PLATE, MULTIPLEX DIAPOSITIVE

This specification is approved for use by the Mobility Equipment Research and Development Command, Department of the Army, and is available for use by all Departments and Agencies of the Department of Defense.

1. SCOPE

1.1 Scope. This specification covers a holder for multiplex diapositive plates.

2. APPLICABLE DOCUMENTS

2.1 Issues of documents. The following documents of the issue in effect on date of invitation for bids or request for proposal form a part of this specification to the extent specified herein:

SPECIFICATIONS

FEDERAL

QQ-W-423	- Wire, Steel, Corrosion-Resisting.
PPP-B-601	- Boxes, Wood, Cleated-Plywood.
PPP-B-621	- Boxes, Wood, Nailed and Lock-Corner.
PPP-B-636	- Boxes, Shipping, Fiberboard.

FSC 6760

Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to: US Army Mobility Equipment Research and Development Command, ATTN: DRDME-DS, Fort Belvoir, VA 22060 by using the self-addressed Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document or by letter.

STANDARDS

MILITARY

MIL-STD-105	- Sampling Procedures and Tables for Inspection by Attributes.
MIL-STD-129	- Marking for Shipment and Storage.
MIL-STD-1188	- Commercial Packaging of Supplies and Equipment.

(Copies of specifications and standards, required by contractors in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

3. REQUIREMENTS

3.1 Description. The holder shall be as shown in Figure 1 and as specified herein.

3.2 Material. Material shall be as specified herein (see 6.3).

3.2.1 Steel wire. Corrosion-resisting steel wire shall conform to QQ-W-423, Form I, Composition 316, Condition B.

3.3 Workmanship. Wire used in fabrication shall be free from kinks and sharp bends. The straightening of the wire shall be done by methods that will not cause injury to the material. Bending methods shall insure uniformity of size and shape and accuracy of each bend dimension.

3.3.1 Welding. The surfaces of parts to be welded shall be free from rust, scale, paint, grease, and other foreign matter. Parent materials, weld filler metals, and fabrication techniques shall be as required to enable the holder to conform to the examination requirements specified in Section 4. Unless otherwise specified (see 6.2), the welding process used in fabrication of the holder shall be at the option of the contractor.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract, the contractor may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

4.1.1 Material inspection. The contractor is responsible for insuring that materials used are manufactured and examined in accordance with referenced specifications and standards.

4.2 Classification of inspections. The inspection requirements are classified as follows:

(a) Quality conformance inspection (see 4.3).
(b) Inspection of packaging (see 4.5).

4.3 Quality conformance inspection.

4.3.1 Sampling. Sampling for examination shall be in accordance with MIL-STD-105, Inspection Level II.

4.3.2 Examination.

4.3.2.1 Samples. Samples selected in accordance with 4.3.1 shall be examined for the major defects specified in 4.4.1. Acceptable Quality Level (AQL) shall be 2.5 percent defective.

4.4 Inspection procedure.

4.4.1 Examination. The holders shall be examined as specified herein for the following defects:

Major

101. Holder not as shown in Figure 1.
102. Material not as specified.
103. Workmanship not as specified.

4.5 Inspection of packaging.

4.5.1 Quality conformance inspection of pack.

4.5.1.1 Unit of product. For the purpose of inspection, a completed pack, prepared for shipment shall be considered a unit of product.

4.5.1.2 Sampling. Sampling for examination shall be in accordance with MIL-STD-105.

4.5.1.3 Examination. Samples selected in accordance with 4.5.1.2 shall be examined for the following defects. AQL shall be 2.5 percent defective.

Check the source to verify that this is the current version before use.

104. Materials and containers not as specified.
105. Quantity of holders packaged together not as specified for Level A.
106. Strapping and closure not as specified for Level A or B.
107. Marking illegible, incorrect or incomplete, or missing.

5. PACKAGING

5.1 Preservation. Preservation shall be Level A or Commercial as specified (see 6.2).

5.1.1 Level A. The holders shall be preserved in quantities of 36 in a fiberboard box conforming to PPP-B-636, W5c. The box shall be sealed by Method V in accordance with the Appendix to the box specification.

5.1.2 Commercial. The holders shall be preserved in accordance with MIL-STD-1188.

5.2 Packing. Packing shall be Level A, B, or Commerical as specified (see 6.2).

5.2.1 Level A. The holders, preserved as specified in 5.1, shall be packed in boxes conforming to PPP-B-601, Overseas type, Grade B or PPP-B-621, Class 2. Closure and strapping shall be in accordance with the appendix to the box specification.

5.2.2 Level B. The holders shall be packed as specified in 5.2.1 for Level A except the boxes shall be domestic type or the holders may be packed in boxes conforming to PPP-B-636, Class Weather-Resistant. Fiberboard boxes shall be closed using Method V in accordance with the appendix to the box specification.

5.2.3 Commercial. The holders, preserved as specified in 5.1, shall be packed in accordance with MIL-STD-1188.

5.3 Marking. In addition to any special marking required by the contract or order, shipping containers shall be marked in accordance with MIL-STD-129 for Military levels of protection. Commerical marking shall be in accordance with MIL-STD-1188.

6. NOTES

6.1 Intended use. The holder is intended to hold multiplex dispositive plates while they are being processed. NSN 6675-00-565-6237 which is used in Equipment Set CL 6675-97-E39 applies thereto.

6.2 Ordering data. Procurement documents should specify the following:

(a) Title, number, and date of this specification.
(b) When welding process other than at the option of contractor is required (see 3.3.1).

STANDARDIZATION DOCUMENT IMPROVEMENT PROPOSAL

OMB Approval
No. 22-R255

INSTRUCTIONS: The purpose of this form is to solicit beneficial comments which will help achieve procurement of suitable products at reasonable cost and minimum delay, or will otherwise enhance use of the document. DoD contractors, government activities, or manufacturers/vendors who are prospective suppliers of the product are invited to submit comments to the government. Fold on lines on reverse side, staple in corner, and send to preparing activity. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements. Attach any pertinent data which may be of use in improving this document. If there are additional papers, attach to form and place both in an envelope addressed to preparing activity.
