NOTE: As indicated in table II, CKR12 items previously covered by MIL-C-39014/5A and MIL-C-39014/5 are now replaced by smaller CKR11 items. It is also to be noted that units of 6,800- pF and 10,000-pF capacitance values rated at 100 volts dc at +85°C (50 percent derating for +125°C) are replaced with units rated at 50 volts at both +85°C and +125°C.

EXAMPLE:

MIL-C-39014/5	MIL-C-39014/5A	MIL-C-39014/5B	MIL-C-39014/5C, /5D, /5E and MIL-PRF-39014/5F thru /5H
M39014/05-0177	M39014/05-0247	M39014/05-0656	M39014/05-2656
100 V (Derated 50% at +125°C)	100 V (Derated 50% at +125°C)	50 V (Not derated at +125°C)	50 V (Not derated at +125°C)

Since all previous failure rate level testing was accomplished at +125°C, no failure rate level was ever established for the +85°C rating. The newer items in regard to FR level testing more closely resemble the items they supersede.

Packaging: Capacitors will be furnished in tape and reel packaging when so specified in the ordering data.

Glass cases shall no longer be supplied to this specification sheet.

Substitutability for failure rate levels shall be as follows:

Failure rate level	Will replace failure rate level
S	R, P, M, L
R	P, M, L
P	M, L
M	L

Equivalent NATO styles. The equivalent NATO styles per NATO-NEPR No. 14 shall be as follows:

Military style	NATO style
CKR11	NCC75
CKR12	NCC70
CKR14	NCC72
CKR15	NCC73

Changes from previous issue: The margins of this specification are marked with vertical lines to indicate where changes from the previous issue were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the previous issue.
