COMMERCIAL ITEM DESCRIPTION

POST, BINDING, ELECTRICAL, SCREW-TYPE (UNINSULATED)

The General Services Administration has authorized the use of this commercial item description for all federal agencies.

1. SCOPE. This commercial item description (CID) establishes the government acquisition requirements for an uninsulated electrical binding post with insulated cap to be used as a wiring termination on terminal boards and test set panels. This binding post uses a screw-type wire gripping action.

2. CLASSIFICATION. The electrical binding post shall be classified and identified by type in accordance with the characteristics specified in table I. The selected types of products to be supplied shall be specified in the acquisition order (see 7.4(b)).

TABLE I. Electrical binding post classifications and dimensions.

Type	Color	A[1]	B[1] (max)	C[1]	D[1]	E[1]	F[1]
I	Black	.562	.734	.312	6-32	.125 x .094	.500
II	Black	.812	.937	.438	8-32	.125 x .156	.500

[1] See figure 1.

3. SALIENT CHARACTERISTICS

3.1 Components. The electrical binding post shall be similar to the one shown in figure 1. The product shall consist of the binding post, captive cap, and all mounting hardware.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data that may improve this document should be sent to: Defense Supply Center Richmond (DSCR), ATTN: DSCR-VBD, 8000 Jefferson Davis Highway, Richmond, VA 23297-5610.

FIGURE 1. Binding post configuration.

Notes:
1. The figure depicts only general characteristics and is not intended to limit specific manufacturing processes.
2. This is the insulated portion. Shape of insulated portion is optional.
3. Dimensions (listed in table I) are in inches. Tolerance is ±0.015 inch unless otherwise shown.
4. Metric equivalents (to the nearest .01 mm) are given for general information only and are based upon 1 inch = 25.4 mm.

3.2 Materials.

3.2.1 Metal. Unless specified otherwise in the acquisition order (see 7.4(c)), the current-carrying portions of the binding post shall be brass conforming to the requirements of the American Society for Testing and Materials (ASTM) B 16, "Standard Specification for Free-Cutting Brass Rod, Bar and Shapes for Use in Screw Machines" (DoD adopted).

3.2.2 Finish. Unless specified otherwise in the acquisition order (see 7.4(d)), metal portions of the binding post shall be nickel plated in accordance with the latest revision of QQ-N-290, "Nickel Plating (Electrodeposited)".

3.2.3 Cap. The cap shall be insulated and non-removable. The material used for the insulated caps of the binding post shall be specified in the acquisition order (see 7.4(e)).

3.3 Non-turn feature. Unless specified otherwise in the acquisition order (see 7.4(f)), the non-turn feature shall be a knurled base as shown in figure 1.

4. REGULATORY REQUIREMENTS

4.1 Recovered materials. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

5. PRODUCT CONFORMANCE PROVISIONS

5.1 Product conformance. The products provided shall meet the salient characteristics of this commercial item description, conform to the producer's own drawings, specifications, standards, and quality assurance practices, and be the same product offered for sale in the commercial marketplace. The government reserves the right to require proof of such conformance.

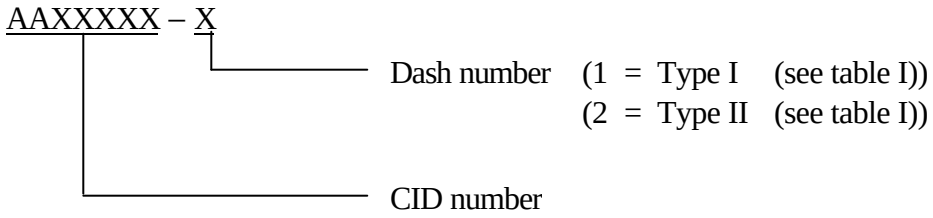
5.2 Market acceptability. The product offered must have been previously sold either to the government or on the commercial market.

6. PACKAGING

6.1 Preservation, packing, and marking. For acquisition purposes, the products shall be preserved, packed, and marked as specified in the acquisition order (see 7.4(g)).

7. NOTES

7.1 Part or identification number (PIN). The following part or identification numbering procedure is for government purposes and does not constitute a requirement for the contractor.



7.2 Sources of documents.

7.2.1 Government documents. Copies of the FAR and federal specifications may be obtained from the U.S. Government Printing Office, Superintendent of Documents, Mail Stop: SSOP, Washington, DC 20402-9328. Electronic copies of federal specifications may be obtained from http://astimage.daps.dla.mil/quicksearch/.

7.2 2 ASTM standards. Copies of ASTM standards may be obtained from the American Society for Testing and Materials, 100 Barr Harbor Drive, West Conshohocken, PA 19428-2959.

7.3 National stock number (NSN). The NSN listed below is assigned for the listed product types (see table I). Other NSNs may also correspond with this document.

NSN	Type

7.4 Ordering data. Acquisition documents must specify the following information:

a. CID document number, revision, and CID PIN
b. Product classification (type) (see table I)
c. Current-carrying material, if different (see 3.2.1)
d. Binding post finish, if different (see 3.2.2)
e. Insulation material (see 3.2.3)
f. Non-turn feature, if different (see 3.3)
g. Packaging requirements (see 6.1)

7.5 Substitution data. See table II.

TABLE II. Substitution data.
