MILITARY SPECIFICATION SHEET

ELECTRON TUBE, VOLTAGE REGULATOR

TYPE 8515

This amendment forms a part of Military Specification Sheet MIL-E-1/1609A, dated 23 December 1970, and is approved for use by all Departments and Agencies of the Department of Defense.

Page 1

GENERAL: Delete "Qualification - Required" and substitute "First article testing - Required (see note 7)".

Page 3

NOTES: Add the following:

7. First article testing requirements hereby replace any qualification requirements referable to the product covered herein. The term "First article testing" shall be considered as synonomous with the term "Preproduction sample approval testing". All tests applicable herein (including all first article tests and quality conformance inspection, parts 1, 2, and 3) shall be performed during first article testing. A failure of any one tube in any of the tests shall be cause for decision of first article sample disapproval. The contractor/manufacturer shall provide test reports and written assurance that:

(a) The first article sample is representative of the product to be submitted under the contract.

(b) First articles shall be manufactured from new materials and in the facility that produced the sample tubes.

A test plan shall be submitted to the contracting officer for approval prior to proceeding with first article testing. The test plan shall list all production test and laboratory test facilities to be utilized in first article testing and production phases of the contract. Upon receipt of approval of the test plan, first article testing may proceed. When testing has been completed, three copies of the test report shall be prepared in accordance with MIL-STD-831, certified by a government representative and submitted with the test samples to the contracting officer for approval.
