FOREWORD

The Standardization Directory (SD-1) provides the following information:

A list of Standardization Executives

A list of all DOD Standardization Management Activities (SMA), which includes:

- Addresses, phone and fax numbers, e-mail addresses, and points of contact
- The SMA’s areas of document interest by Federal Supply Class (FSC) or Standardization Area (AREA)
- The SMA's item reduction Study interest by FSC
- SD-1 Code Assignment

A list of civilian agency standardization offices, which includes:

- Addresses, phone and fax numbers, e-mail addresses, and points of contact
- The civil agency's areas of interest by FSC or Standardization Area
- SD-1 Code Assignment

Assignments of Lead Standardization Activities and Departmental Standardization Activities by FSC and Standardization Area

A list of Federal Supply Groups (FSG), FSC's, and Standardization Areas, and definitions for the Areas

Data Item Description (DID) Approval Authorities

Changes to this Directory are marked with an asterisk (*) to indicate changes from the last issue (This does not include the Introduction pages).

Previous editions of this Directory are hereby superseded.

STANDARDIZATION EXECUTIVES

Standardization Executives are appointed by a Military Department or Defense Agency to participate on the Defense Standardization Council and to provide senior management oversight and direction for the Defense Standardization Program. The list below is provided for information. You are encouraged to contact your respective Departmental Standardization Office (DepSO) for all standardization-related matters.

DISA Standardization Executive	**Air Force Standardization Executive**
Mr. Jay Chung Chief, DOD IT Standards and Assessment Branch Attn: BDE2 P.O. Box 549, Room # A5G12 Fort Meade, MD 20755-0549 jay.chung1.civ@mail.mil	Mr. Devin Cate Deputy Assistant Secretary of the Air Force Logistics and Product Support SAF/AQD 1060 Air Force Pentagon Washington, DC 20330-0001 devin.cate.1@us.af.mil
Air Force Standardization Executive	**Navy Standardization Executive**
Mr. Tom Simms Principal Deputy Executive Director, Systems Engineering & Architecture (SE&A) OUSD (R&E) PDED 4800 Mark Center Drive Suite 16F09-02 Alexandria, VA 22350 Thomas.w.Simms2.civ@mail.mil	Mr. Peter Reddy DASN (RDT&E), Room 4C681 1000 Navy Pentagon Washington, DC 20350-1000 peter.c.reddy.civ@us.navy.mil

WHERE TO SEND UPDATES

This Directory is published four times a year—in January, April, July and October. Each standardization management activity shall send non-routine changes (i.e., changes which add or delete standardization codes, FSCs, AREAs, or any changes in areas of responsibility) to the appropriate office listed below. The offices below, after any required coordination with DSPO (such as transfers of responsibility between Services/Agencies), will forward the changes to the DSPAO, email; alice.shannon@dla.mil. Changes may be made at any time. To be included in the next quarterly update, changes should be to the DSPAO by the 2nd week of December, March, June or September to be reflected in the next quarterly issuance.

Individuals in standardization management activities who have been given access to make routine-only changes (address, phone, fax, e-mail changes) may do so via the ASSIST SD-1 Module. See Enclosure 7, paragraph 10.b of DODM 4120.24, “Defense Standardization Program (DSP) Procedures.” Routine- only changes may be made directly to the SD-1 database via the ASSIST SD-1 module by those who have been given access to do so through their DepSO.

Those who do not have access to the ASSIST SD-1 module and who wish to make routine-only changes, please e-mail revisions to assisthelp@dla.mil or phone the ASSIST Service Desk at (215) 737-8000.

GENERAL DEFINITIONS

Standardization Executives. Standardization Executives are appointed by a Military Department or Defense Agency to participate on the Defense Standardization Council and to provide senior management oversight and direction for the Defense Standardization Program.

Departmental Standardization Office (DepSO). A top-level office in each Military Department or Defense Agency responsible for managing the Defense Standardization Program and ensuring that its Lead Standardization Activities and Standardization Management Activities properly implement the policies, procedures, and goals of the Defense Standardization Program.

Data Item Description Approval Authorities. The organization in each Military Department/Defense agency with delegated responsibility to approve new, revised, and cancelled data item descriptions within their respective Department/Agency. FSG, FSC, and Area Codes. Federal Supply Group (FSG), Federal Supply Class (FSC), and Standardization Area codes. For a more complete description of FSGs and FSCs, see Cataloging Handbook H2-1, Federal Supply Classification, Part 1, Groups and Classes.

Item Reduction Activity. An activity responsible for conducting item reduction studies in accordance with DODM 4120.24.

Lead Standardization Activity (LSA). The activity responsible for managing DOD standardization efforts in an Area or Federal Supply Class.

Non-Government Standards Body. A private sector association, organization, or technical society that plans, develops, establishes, maintains, or coordinates private sector standards, specifications, and other types of standardization documents.

Departmental Standardization Activities. The activity designated by its DepSO to represent the department in interdepartmental standardization efforts.

Standardization Area. A standardization category that encompasses a broad engineering discipline, practice, and manufacturing technology and is not susceptible to categorizing in the Federal Supply Classification system.

Standardization Management Activity (SMA). A generic term to describe any organization listed in the SD-1 that functions as a Lead Standardization Activity, Preparing Activity, Departmental Standardization Activities, Military Coordinating Activity, Custodian, Review Activity, Adopting Activity, or Item Reduction Activity.

STANDARDIZATION AREA CODES AND DESCRIPTIONS

Established Standardization Areas are listed below. Area descriptions are provided as guidance in categorizing documents not susceptible to categorizing in the Federal Supply Classification system.

AREA	TITLE (AREA Description Below Title)
CMPS	COMPOSITES TECHNOLOGY

This AREA covers standardization document for materials and processing (M&P) technology that are pertinent to composites manufacturing and applications. This includes the M&P technology of fiber reinforcements and matrices used in composites manufacturing, the design and fabrication of composites, and standard test methods for determining the properties of composites and their constituent materials. This AREA includes the M&P technology of primary classes of composite materials including polymer matrix composites (PMC), metal matrix composites (MMC), and ceramic matrix composites (CMC).

SAFT SYSTEM SAFETY

This AREA covers the systems engineering integration of life cycle environment, safety, and occupation health (ESOH) considerations in the design, test, demonstration, operations, maintenance, sustainment, and disposal of military systems.

DRPR DRAWING PRACTICES

This AREA covers engineering practices to define, record and communicate concepts and design and production requirements in a concise, graphic form with standard symbols, abbreviations and text on drawings and associated lists.

EDRS DOD ENGINEERING DATA REPRODUCTION SYSTEMS

This AREA covers automated processing of engineering data documentation used in support of research and development, design and engineering, procurement and supply and maintenance of defense materiel. Also covers reproduction systems required for recording, reproducing, storing, retrieving, and distributing engineering documents and related information by electronic, optical, or microform methods, or combination thereof.

EMCS ELECTROMAGNETIC COMPATIBILITY STANDARDS

This AREA covers requirements and procedures to achieve electromagnetic compatibility within all frequency ranges of platforms, facilities, electrical and electronic systems/equipment, circuits and components. Included are: (1) standards for prediction, measurement and validation for electromagnetic compatibility; (2) standards for techniques and procedures relating to grounding, bonding and shielding; (3) standards for prevention and control of electromagnetic radiation to personnel and equipment (including hazardous material and substances); and (4) standards for surviving the electromagnetic environment (e.g. electric and magnetic fields) resulting from a nuclear detonation, system-generated electromagnetic pulse (EMP) or high-power microwaves (HPM).

Check the source to verify that this is the current version before use.

AREA	TITLE (AREA Description Below Title)
ENVR	ENVIRONMENTAL REQUIREMENTS AND RELATED TEST METHODS

This AREA covers environmental definitions, environmental design criteria (both natural and induced) and related test and evaluation methods. The electromagnetic environment is excluded as it is covered under the EMCS AREA.

FACR FACILITIES ENGINEERING & DESIGN REQUIREMENTS

This AREA covers standard general facilities engineering and design criteria, practices, guidelines, and related to requirements. Specifications and Standards related to specific building products and materials are not covered by this area but in the appropriate FSG/FSC.

SCRE SECURE CYBER RESILIENT ENGINEERING

This AREA covers the integration of life cycle security and protection considerations in the requirements, design, test, demonstration, operations, maintenance, sustainment, and disposal of military systems that operate in physical and cyberspace operational domains.
This AREA specifically encompasses the standards, specifications, methods, practices, techniques, and data requirements for the security aspects of systems engineering activities executed and artifacts produced, with explicit consideration of malicious and non-malicious adversity.

SESS SYSTEMS ENGINEERING STANDARDS AND SPECIFICATIONS

This AREA covers standards, specifications, methods, practices, techniques, and data requirements for analyzing, developing, and defining the technical engineering requirements for new and modified DOD systems. This AREA specifically encompasses procedural guidance to address those systems engineering elements executed throughout the acquisition process, which includes configuration management of the technical baseline information, data management, reliability, maintainability, manufacturing producibility, and design, development, and test activities. This AREA does not include Human Factors, Environmental, Product Support, Quality Control, Cybersecurity, or Systems Safety.

SOLD SOLDERING

This AREA covers the processes for making metallic junctions in which the surfaces are joined under elevated temperatures by the surface wetting and subsequent coalescence of liquid solder having a much lower melting point than any of the metals being joined (generally below 426°C; 800°F). Requirements, procedures and inspection criteria for soldering processes ranging from general fabrication of non-electrical assemblies to soldering electrical and electronic connections are included.

SPVT SPACE VEHICLE TECHNOLOGY

This AREA covers standards, specifications, handbooks, and other related technical documentation for acquiring space vehicles, space launch vehicles, and associated ground elements. Documentation topics include, but are not limited to, design, construction, testing, parts, safety, and maintenance support.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T14:30Z
Check the source to verify that this is the current version before use.

AREA	TITLE (AREA Description Below Title)
IPSC	INFORMATION PROCESSING STANDARDS FOR COMPUTERS

This AREA covers computers and data processing devices, equipment and systems including, but not limited to, character recognition types; input/output media, formats, and labels; programming languages; computer documentation; flowcharts and terminology; character codes; data communications; and input/output interfaces.

MECA METAL CASTINGS

This AREA covers metal castings produced by a variety of processes and techniques such as: green and dry mold, shell, core, permanent and ceramic mold; expandable pattern; centrifugal; continuous and iron die-casting.

MFFP METAL FINISHES AND FINISHING PROCESSES AND PROCEDURES

This AREA covers metal finishes and processes, such as metallic coatings, anodic coatings, and chemical treatments and coatings. It also covers corrosion and corrosion control of metals.

STDZ STANDARDIZATION

This AREA covers documents that establish the content and format criteria for specifications, standards, and other related standardization documents that do not specifically belong in any other Federal Supply Class or AREA. This AREA also covers documents that provide direction and guidance for implementing the Defense Standardization Program.

TCSP TECHNICAL SUPPORT

This AREA covers technical documentation not covered by the MGMT standardization area relating to facilities, cataloging, property control, contractor engineering technical services, and acquisition. Note: This AREA is to be used for Data Item Descriptions (DIDs) and shall not be used for any other standardization documents.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T14:30Z
Check the source to verify that this is the current version before use.

AREA	TITLE (AREA Description Below Title)
FNCL	FINANCIAL DATA

This AREA covers all financial or dollar data, actual or estimated, for expenditures, forecasts, status accounting, and any other record keeping, or data required by contract provisions to be expressed in financial or dollar terms. Other items covered include: (1) Documents generated for contract cost reporting, such as the contract funds status report, cost summary report, cost/schedule status report, and cost/schedule control description; (2) documentation associated with the breakdown of contractor tasks into tracking elements, such as work breakdown elements used for contract schedule and cost reporting; (3) documents associated with design-to-cost, where cost is a key design parameter and life cycle cost, which encompasses the cost of development, acquisition, operation, support and where applicable disposal. Documents include the Design to cost Plan, Life Cycle Cost Report, and Target Prices versus Actual Forecast; and (4) documents generated as a result of a value- engineering program, including documents that set forth a change in contractual documents such as Value Engineering Data Report, Value Engineering Plan, and Task Change Proposal.
Note: This AREA is to be used for Data Item Descriptions (DIDs) and shall not be used for any other standardization documents.

FORG FORGINGS

This AREA covers metal forging processes, procedures and technology.

GINT GEOSPATIAL INTELLIGENCE TECHNOLOGY

This AREA covers standards relating to geospatial intelligence (GEOINT) as defined in 10 U.S.C., Section 467. The term “geospatial intelligence” means the exploitation and analysis of imagery and geospatial information to describe, assess, and visually depict physical features and geographically referenced activities on the earth. Geospatial intelligence consists of imagery, imagery intelligence, and geospatial information.

HFAC HUMAN FACTORS

This AREA covers human factors engineering, which incorporates human characteristics and considerations into design of military systems, equipment, and facilities. The HFAC AREA includes tasking requirements and technical data for analysis, design (including initial design and analysis of user tasks), test, and evaluation during acquisition. It also includes design criteria, expressed as requirements and guidelines, as they apply to those who will operate, control, maintain, supply or transport the materiel. The AREA also encompasses environmental considerations including limits for maximum exposure, human performance, habitability, and vulnerability. Manpower, personnel, and training (MPT) considerations apply only to the degree that they affect the human performance aspects of design. Additionally, the AREA also includes human systems integration (HSI) which encompasses the integration of, tradeoffs between and integrated analysis of the seven HSI domain areas of human factors engineering, MPT, Safety and Occupational Health, personnel survivability/force protection and habitability.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T14:30Z
Check the source to verify that this is the current version before use.

AREA	TITLE (AREA Description Below Title)
INST	INFORMATION STANDARDS AND TECHNOLOGY

This AREA covers report standards, data exchange format standards, graphic, and imagery constructs. It includes the structure, values, definition, and representation of data that gives it meaning, enhances information sharing and exchange, and facilitates effective decision-making based on a DoD-wide commonality of representation and understanding of specific bits of information. Standard structures and formats include character and bit-oriented syntax as well as graphics, imagery, and geographical constructs. These information structures are derived from the combination and use of standard data elements and codes to convey precise meaning.

TCSS TELECOMMUNICATIONS SYSTEMS STANDARDS

This AREA covers uniform engineering criteria for terminal equipment, transmission equipment, and switching equipment to ensure interoperability within military telecommunications systems and, in many cases, interoperability with federal systems and common carriers. Activities within the TCSS AREA include participation in federal, commercial, and international standard forums, as well as development of military-unique telecommunications standards and handbooks. The TCSS AREA includes communications systems in support of computer data transfer; more conventional telecommunications services such as voice, video, and facsimile. The TCSS AREA applies to services provided over a broad spectrum of transmission media and under widely varying environmental and physical conditions. Note that the standardization of higher layer protocol, such as peer and interlayer management protocols, including those that deal with end-to-end (host-to-host) communications across network(s) are in DPCS and not TCSS.

THDS SCREW THREADS

This AREA covers screw threads and other items associated with the purchase or use of interchangeable threaded parts, including the basic requirements for assembly inspection and verification, interchangeability, strengths, and installation/removal torques.

THJM THERMAL JOINING OF METALS (EXCEPT SOLDERING)

This AREA covers the thermal joining of metals processes (welding and brazing), but exclude soft (low temperature) soldering, which is covered by the SOLD standardization area. It includes low-temperature brazing (also known as hard soldering or silver soldering). It does not include equipment or accessories.

Check the source to verify that this is the current version before use.

AREA	TITLE (AREA Description Below Title)
TMSS	TECHNICAL MANUAL SPECS & STANDARDS

This AREA covers the requirements for technical manual (also known as technical orders) preparation, including those requirements to facilitate technical manual deliverables in digital format. It addresses the technical content and format of weapon systems, weapon systems components, and support equipment technical manuals used for operation, maintenance and repair of systems and equipment. Markup language tools, such as Document Type Definitions (DTDs), extensible Markup Language (XML) schemas, and stylesheets, identified in the TMSS documents are also covered by this standardization AREA, as well as administrative and management data, such as status reports, validation plans, and schedules relating to technical manuals.

ADMN ADMINISTRATIVE DATA

This area covers non-technical data required by contracting officers and other personnel for the Government administration of the overall provisions of the contract, excluding management and financial data.

As a minimum, the following subjects are covered:
(1) security system engineering; military history, responsibilities and policies and procedures for safeguarding classified material;
(2) audio-visual data such as recorded information on photographic records; motion picture films and microfilm developed in support of a project; recorded information on view graphs, video tapes and slides
(3) documents describing meeting agendas and minutes.

Note: This AREA is to be used for Data Item Descriptions (DIDs) and shall not be used for any other standardization documents.

AMPR Additive Manufacturing (AM) Production and Repair

This AREA covers the process of joining materials to make parts from 3D model data, usually layer upon layer, as opposed to subtractive manufacturing and formative manufacturing methodologies. It includes both part manufacturing and the use of additive processes for repair.

ATTS AUTOMATIC TEST TECHNOLOGY STANDARDS

This AREA covers standard methods, procedures, techniques and design criteria for providing automatic test capability in defense systems and equipment. It excludes automatic test equipment and accessories that are covered by FSC 6625.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T14:30Z
Check the source to verify that this is the current version before use.

AREA	TITLE (AREA Description Below Title)

AVCS AVIONICS

This AREA covers all requirements pertaining to the economy of avionics operations and resources, including but not limited to process, measurement, product, interchangeability, compatibility, commonality, interoperability, and service/coalition operations. It covers all resources for electronic, electro-optics, and electromechanical systems and subsystems (hardware and software) installed in or attached to an aircraft. It also covers mission critical defense computer systems installed in or attached to aircraft, related software (development environments, support software, application programs, firmware, and data bases), and associated documentation. It includes systems that interact with the crew and other aircraft systems in the areas of: communications, controls, and displays (ID), navigation (N), reconnaissance (RE), systems integration (SI) and target acquisition/strike (TA/S) and in the technology and functional areas of weapons delivery, identification, instrumentation, electronic warfare, flight controls, engine controls, power distribution, support equipment, sensors, transducers, antennas, processing elements, system interfaces, networks, buses, and associated hardware.

CBRN CHEMICAL, BIOLOGICAL, RADIOLOGICAL, AND NUCLEAR

This AREA covers all requirement and procedures pertaining to chemical, biological, radiological, and nuclear (CBRN) contamination survivability. The CBRN AREA incorporates compatibility, decontaminability, and hardness characteristics and considerations into design and testing of military systems, equipment, and facilities that may see CBRN contaminated environments and be required to survive and continue to operate in or after exposure to such environments. Standards related to surviving the deleterious effects resulting from nuclear detonations should be placed in the Nuclear Survivability (NUSU) standardization area. The electromagnetic environment is also excluded as it is covered under the Electromagnetic Compatibility (EMCS) standardization area.

MGMT MANAGEMENT

This AREA covers data required by the Government to manage, provide visibility, and enforce contractual requirements in the form of record keeping or deliverable products concerning project management milestones, technique, status (excluding financial and technical), milestones, problems, plans, and other data not technically or financially oriented. Documents related to management policies and concepts for programs or projects include Master Plan, Procedures for Determining Responsibility of Prospective Contractors, and various progress Status Reports, planning documents, and Program Management Plan.
This AREA also includes documents related to the establishment and maintenance of Government property, i.e., status of condition, deficiency, and inventory. Examples of related documents are GFI Deficiency Report, Support Equipment Delivery, Schedule/Delinquency Report, and Defective Material Report.
Note: This AREA is to be used for Data Item Descriptions (DIDs) and shall not be used for any other standardization documents.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T14:30Z
Check the source to verify that this is the current version before use.

AREA	TITLE (AREA Description Below Title)
MISC	MISCELLANEOUS

This AREA is reserved for those standardization documents that cannot, by definition, be assigned to a currently established Federal Supply Class, or standardization area.

MOSS MODULAR AND OPEN SYSTEMS STANDARDS AND SPECIFICATIONS

This AREA covers the specifications, standards, best practices and compliance testing guidance that form a Modular Open System Approach (MOSA) framework that can be applied to the development, operation, upgrade and maintenance of defense systems. These products include:

- Technical specifications that define system architectures that support severable and composable components,
- Standards for interfaces, data exchanges, physical connections (electrical, mechanical, etc.) and data models,
- Best practices for implementing MOSA architectures and frameworks, and
- Compliance testing for implementations of standards that support the MOSA practice.

MSSM MODELING & SIMULATION STANDARDS & METHODOLOGIES

This AREA covers standards, methodologies, practices, processes, techniques, specifications, models, modeling, simulations, data, databases, environmental representations, and synthetic distributed live, virtual, and/or constructive (LVC) environments that are developed and implemented within DOD in support of US forces in the execution of DOD missions. It encompasses the realm of modeling and simulation (M&S) related technologies, processes, practices, and techniques across all defense M&S communities of practice, including Acquisition, Analysis, Experimentation, Intelligence, Medical, Planning, Test and Evaluation, and Training; including, but not limited to:

- Interoperability, modularity, and composability of models, simulations, and associated data in synthetic distributed environments, including M&S interfaces to virtual, augmented, and mixed reality environments.
- Representations of human-made structures and systems, including threat weapon systems and tactics; human-system integration and human performance; and the natural environments used by models, simulations, and synthetic distributed environments.
- Processes and techniques for development, use, and maintenance of models, simulations, associated data, and synthetic distributed environments throughout their lifecycle, including verification, validation and accreditation (VV&A).

NDTI NONDESTRUCTIVE TESTING & INSPECTION

This AREA covers nondestructive testing (NDT) methods of inspection, qualification of NDT equipment and personnel, and reference standards for acceptance inspection. It excludes NDT equipment and accessories.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T14:30Z
Check the source to verify that this is the current version before use.

AREA	TITLE (AREA Description Below Title)
NUOR	NUCLEAR ORDNANCE

This AREA covers standardization documents for engineering criteria, practices, requirements and items (not properly included in Federal Supply Group 11) unique to nuclear ordnance due to design, security, quality, storage, safety, or transportability requirements.

NUSU NUCLEAR SURVIVABILITY

This AREA covers protection standards, hardened electronics, testing protocols, and experimental environments that reflect realistic prompt nuclear weapons effects to support nuclear survivability programs. Included are: (1) standards defining the various nuclear environment (e.g., blast, thermal, and prompt radiation resulting from a nuclear detonation); (2) standards for protection from the various nuclear environments; and (3) design handbooks. This AREA does not cover requirements for military systems, equipment, and facilities to continue operation after exposure to a nuclear environment. Standards related to continued operation in a nuclear environment and nuclear decontamination should be placed in the Chemical, Biological, Radiological, and Nuclear (CBRN) standardization area.

PACK PACKING, PACKAGING, PRESERVATION AND TRANSPORTABILITY

This AREA covers packaging, packing, and preservation of defense materiel. Transportability is included whenever transportation requirements are a part of a packaging systems documents.

PSSS Product Support Standards and Specifications

This AREA covers standards, specifications, and other related technical documentation for analyzing, developing, and defining supportability and support requirements as well as for acquiring product support elements and sustain DOD systems or system modification programs.

QCIC QUALITY CONTROL/ASSURANCE & INSPECTION

This AREA covers general methods and techniques intended to provide assurance that material, data, supplies and services conform to established technical requirements and achieve satisfactory performance.

REPS RADIO-FREQUENCY EXPOSURE TO PERSONNEL SAFETY STDZN

This AREA covers requirements and procedures for supporting activities and research required for biologically based scientific standards for safe operations of Radio-Frequency Radiation (RFR) systems to ensure environmental safety and occupational health of Department of Defense (DOD) personnel. Included in this area are: (1) biologically based safety standards for limiting RFR exposure to personnel; (2) biological/medical aspects associated with the development of personnel exposure limits to RFR; and (3) biologically-based safety standards for limiting exposure of personnel from High Power Microwave (HPM), electromagnetic pulse (EMP), and Ultra-Wide-Band forms of non-ionizing radiation.

Check the source to verify that this is the current version before use.

AREA	TITLE (AREA Description Below Title)
DCPS	DATA COMMUNICATIONS PROTOCOL STANDARDS

This AREA covers DOD protocol standards and reference protocol architectures necessary to support intranet-work and internet-work host-to-host data communications using digital communications techniques. The DCPS AREA involves standardization of internet-work, peer and interlayer management protocols, including those that deal with end-to-end (host-to-host) communications across a network or a concatenated set of networks. The standardization of lower layer protocols, those that deal with the physical data link and network functions do not fall with the domain of the DCPS AREA. They fall with the TCSS AREA. However, the DCPS AREA coordinates with those standardization activities developing and coordinating those lower layer protocols to ensure that the interfaces allow interoperability.

NOTES:

1. AREA TELE, Federal Telecommunications Standards, is used for ASSIST indexing purposes only. It is not a DOD standardization AREA assignment.
2. SLHC and TCTS have been merged into one Area - TCSS.
3. SDMP has been replaced by STDZ.
4. EGDS has been merged into Area - EDRS.
5. MCCR has been merged into Area - AVCS.
6. ALSS/ILSS has been merged into Area - PSSS.
7. CMAN/GDRQ/MNTY/RELI has been merged into Area – SESS.
8. MCGT has been superseded by Area – GINT.

DATA ITEM DESCRIPTION APPROVAL AUTHORITIES

“All DIDs must be reviewed in accordance with MIL-STD-963C, Data Item Descriptions. DIDs must be submitted to the appropriate DID approval authority listed below for final approval. Contact information may be found in the appropriate section of this directory. DID approval authorities will send approved DIDs to the Defense Standardization Program Automation Office (DSPAO) using the ASSIST Electronic Document Submission tool as required by DODM 4120.24, Enclosure 12, paragraph 5.e. AMSC and DID numbers are issued through the ASSIST Automated Document Number module at https://assist.dla.mil.”

The following DID approval authority offices are listed in this directory in their appropriate Service/Agency sections.

OSD code - SO
Army code - AM
Navy code - SA
Air Force code - 10
Defense Logistics Agency code – DH
Defense Information Systems Agency code – DC
Defense Intelligence Agency code – DI
National Geospatial-Intelligence Agency code - MP
National Security Agency code – NS
Defense Threat Reduction Agency code - DS

PART 1

STANDARDIZATION MANAGEMENT ACTIVITY (SMA) LIST

This index shows DOD SMAs and other interested organizations that participate in the conduct of the Defense Standardization Program. These activities function as lead standardization, participating, and review activities or departmental custodians as defined in the DoDM 4120.24 "Defense Standardization Program (DSP) Procedures". To facilitate use of Part 3 of this directory, this part is primarily sectionalized by Military Department, Defense Agency, and other elements of the Federal Government.

PART 2

STANDARDIZATION MANAGEMENT ACTIVITY (SMA) LIST

This part assigns the Lead Standardization Activities and Departmental Standardization Activities for Standardization Areas, Federal Supply Groups (FSG), and Federal Supply Classes (FSC). It also identifies the item reduction activity for each FSC. See DoDM 4120.24, "Defense Standardization Program (DSP) Procedures" for an explanation of assignment functions.

PART 3

POINTS OF CONTACT

This part provides the names, addresses, and phone numbers for standardization points of contact in the DoD, civilian agencies, and non-government standards bodies. In addition, this part identifies the Standardization Areas and FSCs in which DoD SMAs and civilian agencies have an interest and should review standardization documents and item reduction studies. See DoDM 4120.24, "Defense Standardization Program (DSP) Procedures" for the procedures and extent of document coordination.

   3838 Vogel Road
   Arnold, MI 63010

   NOTES: NGA serves as the DoD Lead Agent for Geospatial Intelligence (GEOINT) standards and prescribes, mandates, and enforces standards and architectures related to GEOINT and GEOINT tasking, collection, processing, exploitation, and international geospatial information for the DoD Components and for the non-DoD elements of the Intelligence Community (IC), to include: a) Standards for end-to-end architectures and embedded interfaces related to GEOINT. (b) Standards for geospatial aspects of natural and man-made features across the environmental domains of Earth, the atmosphere, and near-Earth space. (c) Standards for GEOINT collected or produced within the Department of Defense. (d) Technical guidance and direction to the DoD Components and other components of the National System for Geospatial Intelligence (NSG) regarding standardization and interoperability of systems requiring, exploiting, and/or disseminating GEOINT. NGA represents the Department of Defense in national and international geospatial information standardization activities, and provides the principal US representative to the NATO Joint Geospatial Standards Working Group, and develops the US position on proposed new/revised NATO Standardization Agreements (STANAGs) dealing with GEOINT and related matters.

PART 3
SECTION VIII
INTERNATIONAL STANDARDIZATION

The National Geospatial-Intelligence Agency, (DepSO)
Standardization Code: MP

1. National Geospatial-Intelligence Agency
   ATTN: DepSO, Mail Stop L-069
   3838 Vogel Road
   Arnold, MI 63010

   NOTES: NGA serves as the DoD Lead Agent for Geospatial Intelligence (GEOINT) standards and prescribes, mandates, and enforces standards and architectures related to GEOINT and GEOINT tasking, collection, processing, exploitation, and international geospatial information for the DoD Components and for the non-DoD elements of the Intelligence Community (IC), to include: a) Standards for end-to-end architectures and embedded interfaces related to GEOINT. (b) Standards for geospatial aspects of natural and man-made features across the environmental domains of Earth, the atmosphere, and near-Earth space. (c) Standards for GEOINT collected or produced within the Department of Defense. (d) Technical guidance and direction to the DoD Components and other components of the National System for Geospatial Intelligence (NSG) regarding standardization and interoperability of systems requiring, exploiting, and/or disseminating GEOINT. NGA represents the Department of Defense in national and international geospatial information standardization activities, and provides the principal US representative to the NATO Joint Geospatial Standards Working Group, and develops the US position on proposed new/revised NATO Standardization Agreements (STANAGs) dealing with GEOINT and related matters.

   POC: Jeffrey C. Struyk (DepSO)
