FOREWORD

1. This handbook is approved for use by all Departments and Agencies of the Department of Defense.

2. The office symbols, addresses, telephone numbers, and code designations contained herein are current as of the date of this handbook. Due to the frequency of organizational changes in structure, designation, and locations, the information contained herein may change at any time and the user is advised to ascertain correctness prior to use, especially code designations listed.

3. Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to: , MSG/ILMP, 4027 Colonel Glenn Hwy, Suite 300, Dayton OH 45431-1672 by using the Standardization Improvement Proposal (DD Form 1426) appearing at the end of this document or by letter.

1. SCOPE

1.1 Scope. The purpose of this handbook is to identify each service's primary repository organizational concept, type of data available, and address information (including DODAAC and EDRS code).

1.2 Controls. It is the responsibility of all personnel that use engineering data to obey appropriate handling, storage, distribution, and disposal controls; particularly, if the data are marked with a restrictive legend. Data marked with a restrictive legend must be safeguarded against release or access to unauthorized personnel (Government and non-Government).

2. APPLICABLE DOCUMENTS.

2.1 General. The documents listed below are not necessarily all of the documents referenced herein, but are the ones that are needed in order to fully understand the information provided by this handbook.

2.2 Government documents.

2.2.1 Other Government documents, drawings, and publications. The following other Government documents, drawings, and publications form a part of this document to the extent specified herein.

DoD 4000.25-6-M	-	DoD Activity Address Directory (DODAAD)
DoD 4100.39-M	-	Federal Logistics Information System (FLIS) Procedures Manual
DoD 4130.2-M	-	Federal Catalog System Policy Manual
SD-1	-	Standardization Directory
TO 00-25-115	-	Logistics Maintenance Engineering Management Assignments

(Copies of DoD 4000.25-6-M, DoD 4100.39-M, and DoD 4130.2-M are available from:

Army - U.S. Army Publications and Printing Command, ATTN: ASQZ-NV, 2461 Eisenhower Avenue, Hoffman Building 1, Room 1040, Alexandria, VA 22331

Navy - U.S. Department of the Navy, Navy Directives and Records Management Branch, ATTN: CODE N09B35D, Washington Navy Yard, Washington, DC 20374

Air Force - Office of the Secretary of the Air Force, ATTN: SAF/AAD, 110 Luke Avenue, Suite 300B, Bolling AFB, Washington, DC 20332-9080

Others - Commander, Defense Logistics Services Center, ATTN: DLSC-VPH, Federal Center, Battle Creek, MI 49017-3084.

Copies of the SD-1 are available from Standardization Order Desk, 700 Robbins Avenue, Building 4D, Philadelphia, PA 19111-5094. Copies of TO 00-25-115 are available from Oklahoma City Air Logistics Center, ATTN: OC-ALC/TILUB, 7851 Arnold St., Suite 201, Tinker AFB, OK 73145-9147 (URL address: http://www.pdsm.wpafb.af.mil/to-system.html)

3. DEFINITIONS

3.1 Terms explained.

3.1.1 Engineering data. Engineering documents (i.e., drawings associated lists, accompanying documents, manufacture specifications and standards), or other information prepared by a design activity relating to the design, manufacture, procurement, test, or inspection of items or services.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T13:42Z
Check the source to verify that this is the current version before use.

3.1.2 Primary repository. Repositories that receive, inspect, accept and store the official record copy of data, and disseminate copies of that data to established customers and other appropriate requesters or users.

3.1.3 DoD activity address code. The DODAAC is a six digit alphanumeric code associated with a primary repository's address information.

3.1.4 EDRS code. A two digit alpha code that designates the location of the primary repository.

3.2 Acronyms.

AFMC	-	Air Force Materiel Command
ALC	-	Air Logistics Center
DDN	-	Defense Data Network
DLA	-	Defense Logistics Agency
DLANET	-	Defense Logistics Agency Network
DoD	-	Department of Defense
DOE	-	Department of Energy
DODAAC	-	Department of Defense Activity Address Code
DODAAD	-	Department of Defense Activity Address Directory
DODISS	-	Department of Defense Index of Specifications and Standards
DSN	-	Defense Switching Network
DSWA	-	Defense Special Weapons Agency
EDRS	-	Engineering Data Reproduction Systems
FLIS	-	Federal Logistics Information System
FSC	-	Federal Supply Class
JEDMICS	-	Joint Engineering Data Management Information and Control System
MEDALS	-	Military Engineering Data Asset Locator System
RNAAC	-	Reference Number Action Activity Code

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T13:42Z
Check the source to verify that this is the current version before use.

4. GENERAL INFORMATION

4.1 DoD primary repository concept. Within the DoD, official record copies of engineering data are stored within primary repositories. Address information is identified in Section 5. The concept of each service's primary repositories is:

Air Force: Within the Air Force, primary repositories operate under a decentralized concept. The decentralized repository functions are located within the Air Force Materiel Command (AFMC); specifically, at the five Air Logistics Centers (ALCs). As appropriate, each repository maintains specific categories of data. Technical Manual, TO 00-25-115, identifies the assignments.

Army: Within the Army, primary repositories operate under a decentralized concept. The decentralized repository functions are located throughout the various commands. As appropriate, each repository maintains specific categories of data. The assignments are related to a maintenance or acquisition need of various types of data (explosives, vehicular equipment, etc.). Generic groupings of data categories are identified in Section 6.

Navy: Within the Navy, primary repositories operate under a decentralized concept. The decentralized repository functions are located throughout the various commands. As appropriate, each repository maintains specific categories of data. The assignments are related to a maintenance or acquisition need of various types of data (ships, weapon systems, machinery, etc.). Generic groupings of data categories are identified in Section 6.

Marine Corps: The Marine Corps has a primary repository that operates under a centralized concept. The centralized repository function is located within the Marine Corps Research, Development and Acquisition Command; specifically, the Marine Corps Logistics Base. This repository maintains all categories of data applicable to the Marine Corps.

Defense Logistics Agency (DLA): Within the DLA, primary repositories operate under a decentralized concept. The decentralized repository functions are located throughout the various centers. As appropriate, each repository maintains specific categories of data. The assignments are related to the Federal Supply Class (FSC) of the products depicted by the data. DoD Manual 4130.2-M, Chapter 4, Appendix A, identifies the assignments.

U. S. Coast Guard: Within the Coast Guard, primary repositories operate under a decentralized concept. The decentralized repositories functions are located at the Engineering Logistics Center (ELC) and Aircraft Repair and Supply Center (ARSC). Each center maintains a repository of a specific category of data applicable to the Coast Guard.

4.2 Special repositories.

4.2.1 DOE nuclear data repository. Nuclear data is controlled within the Department of Energy (DOE). Official record copy of nuclear engineering data (camera masters) are stored within a primary repository that operates under a centralized concept. The centralized repository function is located within the Defense Special Weapons Agency (DSWA) Field Command; specifically, on Kirtland Air Force Base, New Mexico.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T13:42Z
Check the source to verify that this is the current version before use.

4.2.2 DoD nuclear data repositories. Within the DoD, nuclear data is controlled and stored within two special repositories that operate under a centralized concept; specifically, the Air Force on Kelly Air Force Base, Texas and the Navy at the United States Naval Inventory Control Point, Mechanicsburg, Pennsylvania. As appropriate, each repository is assigned service unique types of nuclear data.

4.2.3 Cryptologic data repository. Within the Air Force, service unique cryptological data are controlled and stored in a repository that operates under a centralized concept. The centralized repository function is located within the Air Force Security Command; specifically on Lackland Air Force Base, Texas.

4.2.4 Atomic energy detection system data repository. Within the Air Force, service unique atomic energy detection system data are controlled by a USAF Direct Reporting Unit (AFTAC/LG, Patrick Air Force Base, Florida). The data are stored in a repository that operates under a centralized concept. The centralized repository function is located on McClellan Air Force Base, California.

4.3 Directory information. Directory information for special repositories is provided separately as follows:

Nuclear Data Repositories

		Address	Phone	DODAAC	EDRS
DSWA	-	Commander, Field Command Defense Special Weapons Agency ATTN: FCPNL 1680 Texas Street, SE Kirtland AFB NM 87117-5669	DSN 246-8439 Com'l (505) 846-8439	HD1029	RS
Air Force	-	SA-ALC/NWTD 413 North Luke Drive Kelly AFB TX 78241-5314	DSN 945-3963 Com'l (210) 925-3963	FH2388	MA
Navy	-	Commanding Officer US Navy Inventory Control Point Code: OSM1 P.O. Box 2020 Mechanicsburg, PA 17055-0788	DSN 430-4365 Com'l (717) 605-4365	N00104	JF

Cryptologic Data Repository

Air Force	-	Engineering Data Service Center CPSG/LGLIE 230 Hall Blvd, Ste 158 San Antonio TX 78243-7056	DSN 969-2195 Com'l (210) 977-2195	FH1318	MH

Check the source to verify that this is the current version before use.

Atomic Energy Detection System Data Repository	Address	Phone	DODAAC	EDRS
Air Force -	Air Force Technical Applications Center ATTN: AFTAC/LGV McClellan AFB CA 95652-6437	DSN 633-5423 Com'l (916) 643-5423	FH7051	TZ

4.4 Military engineering data asset locator system. MEDALS is associated with DoD primary repositories that use a JEDMICS storage file. On-line and dial-up access can be accomplished through the Defense Data Network (DDN) or the DLA Network (DLANET). When completed, identification of specific engineering data document numbers (in accordance with each service's control procedures) will be indexed in the MEDALS data base. If the document is indexed, a MEDALS user can determine the location of the DoD primary repository by entry of a document number.

5. DETAILED INFORMATION

5.1 Ordering. Data should be ordered from the repositories listed in this handbook. When ordering data, requesters not within DLA, should order the data from the appropriate Air Force, Army, Navy, Marine Corps, or U. S. Coast Guard repository.

5.2 DoD activity address directory. The DODAAD (DoD 4000.25-6-M) is a directory containing addresses of DoD activities, other government agencies, and Com'l entities. The primary repositories are among the activities listed in the DODAAD. The DoD Activity Address Code (DODAAC) is a six digit alphanumeric code used to uniquely identify an activity. When receiving master data or distributing copies, repositories identified in this handbook may, or may not, include the DODAAC in their mailing address.

5.3 Engineering data reproduction systems (EDRS) code. EDRS codes are used to identify engineering data repositories that maintain the official record copy of data. These repositories are responsible for processing requests for copies of that data. Requests may be from local customers, DoD activities, other government agencies, or the general public. The EDRS codes are identical to the activity codes identified in Federal Logistics Information System (FLIS) Manual DoD 4100.39-M, Volume 10, Table 104, Part 4. However, the office symbols and telephone numbers in this handbook reflect the primary engineering data repository information. The repository activities listed in this handbook may, or may not, be authorized originators for a Reference Number Action Activity Code (RNAAC).

5.4 Directory information. The directory information provided in paragraphs 5.4.1 through 5.4.9 identifies the repository's mailing address, DSN, Com'l telephone number, DODAAC, and EDRS code.

6. TYPE OF DATA MAINTAINED

6.1 Intended use. This handbook is intended as a consolidated reference source to aid in the search of, and subsequently to obtain, engineering data maintained in DoD repositories. This handbook is not intended for use with engineering data purchase requests, or to supersede any DODISS specification/standard requirement and there are no Data Item Descriptions (DIDs) associated with this handbook.

6.2 Generic groupings. This section provides generic groupings of individual categories of data maintained by Army and Navy repositories. The information is in alphabetical order. The DODAAC and EDRS code for the repositories maintaining the data are also identified.
