COMMERCIAL ITEM DESCRIPTION

SEAL, ANTIPILFERAGE (SELF-LOCKING)

The General Services Administration has authorized the use of this commercial item description in preference to Military Specification MIL-S-23769, types I and II.

This commercial item description covers self-locking seals for use in sealing railroad containerized shipments

Salient characteristics.

Self-locking seals shall be of the following types, as specified.

Type I - Ball
Type II - Flat

Shall be of one- or two-piece construction
Shall be continuous strips having leading edges which mate with locking devices so that the seals, when locked, form loops or bars through a shackled or gormmets to prevent unauthorized opening of the locked container
Type I seals shall be a metal strip having a formed leading edge and fitted with a locking device encased in a spherical or near-spherical housing
Type II seals shall be a metal strip having a formed leading edge and fitted with a locking device encased in a flat, rectangular housing
Seal bodies shall not be less than 6-3/4 inches long and not less than 0.312 inch wide
Shall be capable of being locked manually and require no tools to insert the leading edge into the locking device
Locked seals shall resist withdrawal of the leading edge from the locking device at pressures less than 70 pounds
Unless otherwise specified, the seals shall be marked with the letters "US"
All seals shall be marked with consecutive serial numbers as specified. Numbers shall not be provided in duplicate

Workmanship. Seals shall be constructed so as to assure proper functioning of all parts of the seal.

Certification The contractor shall certify that the product offered meets the salient characteristics of this description, and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices, and is the same product sold in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract

Regulatory requirements. The manufacturer shall utilize recovered materials to the maximum extent practicable.

Packaging, packing, and marking. The items shall be packaged in accordance with the normal commercial practice and packed to assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with National Motor Freight Classification and Uniform Freight Classification. Shipping containers shall be marked as specified in the contract or order.
