COMMERCIAL ITEM DESCRIPTION

HAMMER, HAND, SCALING

The General Services Administration has authorized the use of this commercial item description in preference to Type VI of Federal Specification GGG-H-86.

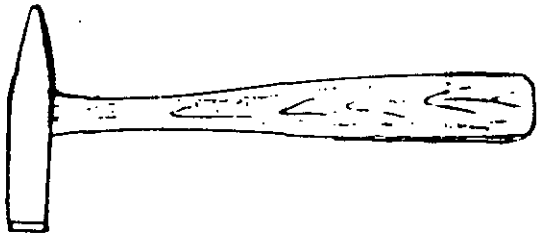

Salient Characteristics:

Conform to ANSI B173.8 and requirements stated herein.

Design. Scaling/straight peen, double bevel; cross peen, single or double bevel.

Finish. Polished striking face/protective coating of the entire head to deter rusting.

Handle. Clear lacquered hickory as specified.

(Figure is illustrative and not restrictive)

Hammer, Hand, Scaling

Nominal Head Weight	Handle Type	Handle Length Overall ±1	National Stock Number
Ounces		Inches	
16	Hickory	14	5120-00-224-4111

Marking. Hammers shall be legibly marked with the manufacturer's name or trademark. The country of origin shall be marked on each hammer.

Workmanship. All hammers shall be free from imperfections which may affect their safety, appearance, serviceability, or durability.

The issue of ANSI B173.8 in effect on date of the solicitation shall apply.

FSC 5120

Test:

Crack Detection Test. All samples shall be 100 percent inspected and shall be subjected to either a wet magnetic - particle inspection test as described in ASTM E-709-80 or an Ultrascope detection test described in ASTM E-114.75. All surfaces shall be examined. Any hammer exhibiting surface crack indications in any location, may have that indication removed by minor rework. The lot shall be rejected if upon Government acceptance testing any crack indications are found.

Regulatory requirements. The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580 to the maximum extent practicable.

Preservation, packaging, packing, labeling, and marking. The preservation, packaging, packing, labeling, and marking shall be as specified in the contract or order.

ANSI Standards are available from American National Standards Institute, Inc., 1430 Broadway, New York, NY 10018.
