COMMERCIAL ITEM DESCRIPTION

EXTRACTOR, COTTER PIN

The General Services Administration has authorized the use of this commercial item description in lieu of Federal Specification GGG-E-926.

This commercial item description covers cotter pin extractors required for removing cotter pins on automotive, material handling and all other types of mechanical equipment that employ cotter pin locking devices.

Salient characteristics:

Material: Steel, R_C 30-47.
Finish: Treated to prevent corrosion.
Design: Similar to figure 1.
Length: 6-10 inches.
Ends: Taper to point diameter of 1/32 - 3/64 at one end, flat at the other end 5/16 - 3/8 inches wide.

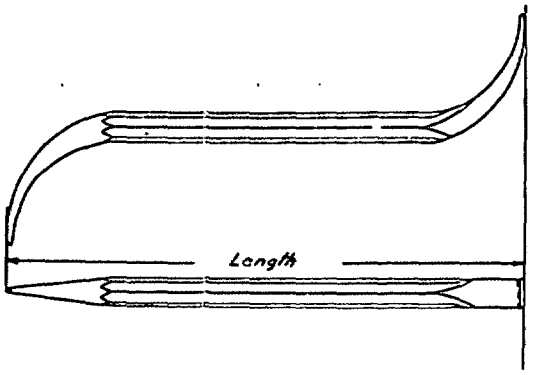

Figure 1. Cotter-pin extractors.

Workmanship. The extractors shall not have rust, fins, burrs, or other imperfections which may effect appearance, usability, or durability.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description, and that the product conforms to the producer's own drawings, specifications, standard and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Recovered materials. The manufacturer shall utilize recovered materials to the maximum extent practicable.

Packaging, packing, and marking. The cotter pin extractor shall be packaged in accordance with normal commercial practice and packed to assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with National Motor Freight Classification and Uniform Freight Classification. Marking shall be in accordance with the contract or order.

Note. Assigned National Stock Number (NSN) 5120-00-222-4284.
