COMMERCIAL ITEM DESCRIPTION

CANISTER, FOOD STORAGE

The General Services Administration has authorized the use of this commercial item description in preference to Federal Specification RR-B-623.

This commercial item description covers food storage containers for tea, coffee, flour, and sugar.

Salient characteristics:

Canisters covered by this commercial item description shall have the following nominal dimensions, capacities and markings:

Capacity (pounds)	Height (inches)	Diameter (inches)	Marking
1-1/2	5-3/4	6	Tea
2	5-3/4	6	Coffee
6	8	7-5/8	Flour
10	8	7-5/8	Sugar

The body shall be formed seamless from a single piece of aluminum having a nominal thickness of either 0.040 or 0.022 inch stainless steel.

Covers may be two gages thinner than the body thickness. The top edge of the body shall be formed to fit the cover. The cover shall be a loose-top-type and shall fit the body.

All aluminum surfaces shall have a hard, white lustrous finish.

Must have National Sanitation Foundation (NSF) approval or certification by an independent testing laboratory acceptable to the GSA, indicating that the same model that is being furnished under this description has been inspected and tested and conforms to NSF Standard No. 2.

The issue of NSF Standard No. 2 in effect on the date of the solicitation shall be used to determine compliance with this requirements.

Workmanship. Canisters shall be free from rough or sharp edges, burrs, slivers, nicks, gouges, scratches and abrasions. There shall be no defects which may affect serviceability, durability, or appearance.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description, and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices, and is the same product sold in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements. The manufacturer shall utilize recovered materials to the maximum extent practicable.

Packaging, packing, and marking. The items shall be packaged in accordance with normal commercial practice and packed to assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with National Motor Freight Classification and Uniform Freight Classification. Shipping containers shall be marked as specified in the contract or order.

Copies of NSF Standard No. 2 are available from the National Sanitation Foundation, P.O. Box 1465, Ann Arbor, MI 48105.
