MATERIAL: Flask shall be of borosilicate glass in accordance with ASTM E438, Type I, Class A.

Base of the flask shall be of aluminum alloy in accordance with Federal Specification QQ-A-250/1.

DESIGN: Flask shall be cylindrically shaped and have double-walls silvered on the inside. The space between the walls shall be evacuated and sealed.

Flask shall be firmly cemented into the base to protect the sealing tip. Flask shall have a protective plastic mesh over exposed glass surfaces.

NOTES:
1. Items differing from this Military Standard by minor variations in design or dimensions are considered standard under this document, provided such variations do not affect performance and are not in conflict with the material requirements specified herein.
2. For design feature purposes, this standard takes precedence over procurement documents referenced herein.
3. Referenced documents shall be of the issue in effect on date of invitations for bid.
4. FSCM: 20512 and 59728.
