COMMERCIAL ITEM DESCRIPTION
FRAME, FILE DRAWER

The General Services Administration has authorized the use of this commercial item description by all Federal Agencies.

1. Scope: This Commercial Item Description covers letter and legal size file drawer frames which are used to support suspended file folders in desk drawers and file cabinets.

2. **Classification:**

Type: I. Legal
II. Letter

3. **Salient Characteristics:**

3.1 The file drawer frame shall be made of a rigid, corrosion resistant material which shall be in accordance with normal commercial practice and shall be easily assembled, either with the use of a common screwdriver and pliers or without the use of tools.

3.2 The side rails of the frame shall be designed to promote sliding of the file folders and shall be "snap-off" notched in .5 cm to 25.5 mm.(1/2 to 1 inch) increments to adjust the length of the rails from 33.02 to 68.580 cm ± .317 mm (13 to 27 ± 1/8 inch) so that frames shall be compatible with desk drawers varying in depth from 33.02 to 68.580 cm ± .317 mm (13 to 27 ± 1/8 inches).

3.3 The rails shall not sag or bend more than 0.6 cm (1/4 inch) when 11 evenly spaced suspended file folders, each holding 200 sheets of 60 g/sq. m. (20 lb., 17 x 22-500) bond paper are suspended from the frame.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to General Services Administration, Federal Supply Service, Engineering Branch, 26 Federal Plaza, New York, NY 10278.

Check the source to verify that this is the current version before use.

3.3 The height of the frame shall be not less than 23.5 cm (9.25 inches) nor more than 25.4 cm (10 inches). The depth of the frame (before "snap-off" adjustments) shall be not less than 66 cm (26 inches).

3.4 The horizontal distance between the rails shall be 31 cm ± 0.6 cm (12.2 inch ± .236 inch) for letter size frames and cm ± 0.6 cm (15 inch ± .236 inch) for legal size frames.

3.5 **Workmanship.** The file drawer frame shall be free from sharp edges, burrs, gouges, pits and any other defects which may affect appearance or serviceability.

4. **Regulatory Requirements:** The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

5. **Quality Assurance Provisions:**

5.1 **Product Conformance.** The products provided shall meet the salient characteristics of this commercial item description, conform to the producer's own drawings, specifications, standards and quality assurance practices and be the same product offered for sale in the commercial market. The government reserves the right to require proof of such conformance.

5.2 **Examination & Testing.**

5.2.1 Suppliers are encouraged to use quality control (QC) techniques that exhibit control over their processes (e.g. (Statistical Process Control) SPC Techniques) as defined in American National Standards Institute (ANSI) Z1.1, Z1.2 and Z1.3 / American Society for Quality Control (ASQC) B.1, B.2 and B.3 that systematically reduce excess variations. If used, objective evidence shall be available that demonstrates overall measurement adequacy techniques and controls. These techniques shall ensure quality levels equal to, or greater than, those cited in applicable technical document or, herein.

5.2.2 End item inspection / testing may be used by the offerer or the Government representative, as a means to determine the effectiveness of the in process quality controls. While in-process controls shall not be substituted for end item performance testing they may be used when sampling for visual and dimensional criteria.

5.2.3 For those characteristics for which there are no such controls, or for end item performance test, lot by lot sampling for inspection / test shall be required. The sample unit for this item shall be one marker or marking set. Sampling shall be in accordance with the American National Standards Institute (ANSI) / American Society for Quality Control (ASQC) Z1.4, Sampling Procedures and Tables for Inspection by Attributes.

5.2.4 An inspection lot shall consist of all like items submitted for inspection at one time. The inspection level for visual and dimensional inspections shall be S-2 with an AQL of 4.0 percent defective. The supplier must provide objective evidence (tests and inspection records) that the presented material meets the requirements of the sampling plan as indicated above.

6. **Packaging:**

6.1 Preservation, packing, and marking shall be specified in the contract or order.

7. **Notes:**

7.1 Source of Documents. Issues of the following documents, in effect on the date of invitation for bids or request for proposal form a part of this document to the extent specified herein.

7.1.1 Federal Acquisition Regulation (FAR) may be obtained from the Superintendent of Documents, Government Printing Office, Washington DC 20402.

7.1.2 Application for copies of (ANSI) Z1.1, Z1.2, Z1.3 and (ASQC) B.1, B.2 and B.3 may be obtained from the American Society for Quality Control PO Box 3005, 611 E. Wisconsin Avenue, Milwaukee, WI 53201-4606.

7.2 National Stock Number Listing (NSN's). The following is a list of NSN's assigned which correspond to this CID. The list may not be indicative of all possible NSN's associated with the CID.
