COMMERCIAL ITEM DESCRIPTION

TABLES, OFFICE (TRADITIONAL STYLE)

The General Services Administration has authorized the use of this commercial item description as a replacement for Federal Specification AA-T-0091 which is canceled.

1. Scope. This commercial item description covers tables which are of a traditional style designed for heavy duty office use.

2. Salient characteristics.

2.1 Classification. The tables shall be classified in the following types and sizes.

Types

I With center drawer
II Without center drawer

Sizes

1 - 1140 mm W x 759 mm D x 730 mm H, minimum
2 - 1520 mm W x 759 mm D x 730 mm H, minimum
3 - 910 mm W x 759 mm D x 730 mm H, minimum

3. Requirements.

3.1 Tops. The corners shall have a minimum 19 mm radius. The top surface shall be HP plastic laminate. The color shall be white leather in accordance with the GSA Standard FSS-L-01001. Alternatively, the manufacturer may provide his equivalent commercial white leather HP plastic laminate subject to the contracting officer's approval. The edges shall be plastic or metal (self-edging not allowed). The top overhang shall be a maximum of 76.2 mm outside the aprons. The overall thickness shall be a minimum of 25 mm.

3.2 Aprons. All sides of the table shall have aprons. The aprons shall extend not less than 57 mm nor more than 140 mm below

Check the source to verify that this is the current version before use.

the underside of the table. The bottom edge shall be formed and returned to avoid sharp or thin edges.

3.3 Center drawers. The center drawers shall have in and out stops, and built-in pencil trays The bottom edges of the drawer front shall be formed and be flush with the apron bottom edge within ± 3 mm.

3.4 Legs. The legs shall be a minimum of 50 mm square, at the top, (with or without taper) formed steel and shall be KD construction. The bottom of the legs shall have foot sockets or glides.

3.5 Finish. The baked enamel finish shall be in accordance with Fed. Std. No. 595, gray (26134). Alternatively, the manufacturer may provide his equivalent commercial gray enamel finish subject to the contracting officer's approval.

3.6 Identification label. The label shall have the contractor's name or trademark, contract number and month and year of manufacture, legibly marked with permanent dark ink. The label shall be affixed to the underside of the top and shall not be removable by hand without defacement after being affixed for 4 hours.

3.7 Workmanship. The tables shall be free of sharp corners, edges, or burrs. The baked enamel finish shall be smooth, without runs, grit, wrinkles, tackiness, or separation of color. There shall be no defects that affect the appearance or serviceability of the table.

3 8 Performance.

3.8.1 Tests. The tables shall comply with the following tests in ANSI/BIFMA X5.5: 4 - Top Loading, 5 - Top Load Ease, 8 - Out Stop, 10 - Racking, 11 - Drop, 12 - Leg Impact, and 14 - Tables Stability. Failure to comply with these requirements shall be cause for rejection.

3.9 Regulatory requirements. The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580, as amended, to the maximum extent practicable.

4. Quality Assurance Provisions.

4.1 Responsibility for inspection. The contractor shall be responsible for the performance of all inspection and testing in

fulfillment of all requirements specified herein. Unless otherwise specified in the contract or purchase order, the contractor may use his own or any other facilities approved by the Government as suitable for the performance of inspections and tests required by this CID. The Government reserves the right to perform any or all of the inspections and/or tests set forth in this CID, as deemed necessary to provide assurance of supply conformance to prescribed requirements.

4.2 First article requirements. The first article inspection shall be in accordance with the solicitation.

4.3 Quality conformance inspection. A sample of the finished product shall be selected in accordance with paragraph 4.6 of this CID for quality conformance verification. The sample shall be examined to verify that the requirements referenced in sections 1, 2 and 3 have been met. Any non-conformance with the above requirements shall be considered a defect. All defects found shall be classified as major/minor in accordance with paragraphs 4.4 and 4.5 of this CID

4.4 Major defects. The following conditions of non-conformance with the stated requirements of the CID shall be considered as major defects which may potentially affect the safety, function, durability, usability, and life of the purchased items.

Major Defects

Reference	Defects
Performance:	- No acceptable evidence of conformance with ANSI/BIFMA Standard No. X5.5
Workmanship:	- Parts fractured, buckled, bent, punctured, or malformed. - Rivets loose or not set properly. - Sharp edges.
Packaging:	- Preservation, packaging, and packing not in accordance with the requirements of the contract or purchase order.
Label:	- Identification marking missing, wrong, or illegible.

4.5 Minor defects. Any conditions of non-conformance listed below shall be considered as minor defects affecting the appearance of the finished item.
