MIL-C-51449(EA)
AMENDMENT 1
17 September 1987

MILITARY SPECIFICATION

CANISTER, 2.75 WP

This amendment forms a part of MIL-C-51449(EA), dated 30 June 1978, and is approved for use within the Chemical Research, Development and Engineering Center, Department of the Army and is available for use by all Departments and Agencies of the Department of Defense.

PAGE 1

2.1.1: Under "STANDARDS", add the following:

"MIL-STD-1235 - Single and Multi-Level Continuous Sampling Procedures and Tables for Inspection by Attributes."

PAGE 2

3.2.2: Delete in its entirety and substitute the following:

"3.2.2 Filling weight. The fill weight shall be 1507 to 1541 grams of WP when filled in accordance with 3.2.1."

PAGE 4

4.2.4.1: Delete in its entirety and substitute the following:

"4.2.4.1 Weight test. The WP fill weight shall be determined by weighing the metal canister before and after filling. The WP weight shall conform to the requirements of 3.2.2 to be acceptable. MIL-STD-1235, sampling plan CSP-1, code letter F, AQL 0.65 may be used to determine fill level if the canisters are aspirated 100 percent to a level consistent with the required weight range (see 3.2.2). If a sample fails to meet the weight requirements, all units between the last satisfactory sample and the defective sample shall be suspect and segregated from regular production flow. These will then be subjected to a separate oven test. If the canister is acceptable, it shall be returned to regular production. If unacceptable, it shall be rejected."

AMSC N/A FSC 1340

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.
