DETAIL SPECIFICATION SHEET

NUT, PLAIN, HEXAGON-CARBON STEEL,CADMIUM PLATED, UNF-2B (In./MM)

MS51968C is inactive for new design and is no longer used, except for replacement purposes.

For new design, use nuts sizes as specified per ASME B18.24.

The information to specify the nut size, material, grade, and finish are found in ASME B18.24. The following information is provided to assist in building an ASME PIN code per the 2020 revision:

Fastener Family and Type

"AEN04" is the prefix for ASME B18.2.2 hex nuts

Fastener Thread Configuration

"F" is the code for the UNF-2 thread type

Fastener Size

The size codes are listed in Table 3-1 and Table 4-1 of ASME B18.24

Material and Treatment

- "AZ5" is the material code for Grade B nuts per ASTM A563/A563M
- "AZ9" is the material code for Grade C nuts per ASTM A563/A563M
- There are multiple codes in Table 5-1 for stainless steel and non-ferrous material options

Plating, Coating, and Passivation

The Plating, Coating, and Passivation specification codes are listed in Tables 6-1 through 6-5 of ASME B18.24. "QX" is the preferred finish codes for Zinc Nickel Electroplating of carbon and alloy steel nuts designed to replace cadmium plating.

Features

The feature codes are listed in Tables 7 of ASME B18.24

Check the source to verify that this is the current version before use.

For example, AEN04F250000AZ5QX1 is an ASME B18.2.2 hex nut, with UNF-2 threads, 1/4-inch thread size, made with ASTM A563/A563M Grade B carbon steel, finished with MIL-PRF-32647 Zn-Ni Alloy Type K16, with no additional features.
