MIL-D-17984A(ASG)
AMENDMENT-1
3 JUNE 1959

MILITARY SPECIFICATION

DATA PRESENTATION REQUIREMENTS, INSTALLED ENGINE PERFORMANCE AND AIR INDUCTION SYSTEMS

This amendment forms a part of Military Specification MIL-D-17984A(ASG), dated 1 May 1956, and has been approved by the Department of the Air Force and by the Navy Bureau of Aeronautics.

Page 8, paragraph 3.4.9.3: Delete and substitute the following:

"3.4.9.3 A plot of net jet thrust, shaft horsepower, and fuel flow, corrected for installation losses, versus true airspeed, at the altitudes presented in the engine specification and at maximum, military, normal, and varying percentages of normal thrust, shall be presented. Equivalent shaft horsepower (ESHP) shall not be used. A copy or reproduction of the engine manufacturer's specification used shall also be included.

"3.4.9.4 A plot of net jet thrust, shaft horsepower, and fuel flow corrections ($\Delta F_n/F_n$, Δ SHP/SHP, $\Delta W_f/W_f$) versus true airspeed, at the altitudes and thrust levels at which installed engine data are presented in paragraph 3.4.9.3 shall be presented. Corrections shall include all losses due to the engine installation."
