INTERIM COMMERCIAL ITEM DESCRIPTION

BAG, TUBE, FEEDING

The General Services Administration has authorized the use of this commercial item description which was developed by the Defense Personnel Support Center, Directorate of Medical Materiel, DPSC-RST, 2800 South 20th Street, Philadelphia, PA, 19101, based upon currently available technical information.

This interim commercial item description covers sterile, disposable tube feeding bags.

Salient characteristics:

General. The tube feeding bag shall be a clear, sterile, disposable plastic bag with pre-attached administration set suitable for enteral nutrition support.

Style, design and dimensions. The bag shall have a capacity of 500 to 700 milliliters, graduated at least every 100 milliliters. The top or proximal end of the bag shall have a handle for suspending from an IV pole. The top shall also have a leakproof, slip-locking opening which measures at least 4 inches across.

Clear plastic tubing shall be attached to the bottom of the tube feeding bag. The tubing shall measure at least 54 inches in length and 7/32 inch, minimum, inner diameter.

The tubing shall have a roller flow clamp allowing not more than 4 drops per minute above the set rate. The tubing shall also have an integral transparent drip chamber for flow rate observation. The end of the tubing shall have a male step-wise tapered adapter that is compatible for leakproof connection to funnel-end feeding tubes.

Plastic components shall meet the USP requirements for Class II plastics.

AMSC/NA FSC 6515

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Sterility. The entire assembly shall be sterile in accordance with the USP.

Workmanship. The tube feeding bag shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Package (PG). One package containing 36 individually packaged sterile tube feeding bags, as specified, constitutes one unit. The individual package shall be sealed, peel-open type container capable of maintaining sterility of contents unless package is damaged or opened.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances of procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Tests. Tests shall be conducted to determine compliance with specification requirements. Where feasable, the sample shall be used for the determination of two or more test characteristics.

Security of roller in clamp body. The roller clamp shall be removed from the set together with a piece of tubing approximately one inch longer than the clamp body. The tubing shall be present in the roller clamp in its normal position with a 1/2 inch length extending from each end of the roller clamp. The clamp shall be held vertically, with the large end down, over a supporting gap so that the roller if forced out of the body is free to fall. A polished steel rod is applied to the top of the roller, so that the roller shall be able to rotate in the course of the test, and the vertical downward force required to separate the roller from the clamp body is measured. As an alternate, any position of the clamp is acceptable providing the clamp body is not distorted and the load measurement is accurate. The force required to remove the roller from the clamp shall be at least 3.65 kilograms.

Security of assembly. The security of assembly of the tubing to the bag shall be tested by gradually applying a seven-pound weight to the tubing above the drip chamber while suspending the bag from an IV pole. This load shall be maintained for one minute without evidence of sparation of the tubing from the bag.

Sampling for tests. Sampling for tests shall be conducted in accordance with MIL-STD-105; inspection level S-3, acceptance number zero. The unit of product for tests purposes shall be one tube feeding bag.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to thee producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the the contract.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580 to the maximum extent practical.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subscontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

NOTE: The following National Stock Number is covered by this document:

NSN	ITEM IDENTIFICATION
6515-01-139-3424	BAG, TUBE, FEEDING, Clear Plastic, 600 ml Capacity, 36's

Ordering data. Intermediate/exterior package quantities and labeling and marking must be specified in the contract and/or order.

INSTRUCTIONS: In a continuing effort to make our standardization documents better, the DoD provides this form for use in submitting comments and suggestions for improvements. All users of military standardization documents are invited to provide suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge *(DO NOT STAPLE)*, and mailed. In block 5, be as specific as possible about particular problem areas such as wording which required interpretation, was too rigid, restrictive, loose, ambiguous, or was incompatible, and give proposed wording changes which would alleviate the problems. Enter in block 6 any remarks not related to a specific paragraph of the document. If block 7 is filled out, an acknowledgement will be mailed to you within 30 days to let you know that your comments were received and are being considered.

NOTE: This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.
