COMMERCIAL ITEM DESCRIPTION

CARD, IDENTIFICATION

The General Services Administration has authorized the use of this Commercial Item Description.

This Commercial Item Description covers a medical patient identification card suitable for the embossing of medical information for use with the ward or clinic identification plate.

Salient characteristics:

The identification card shall be a white plastic card with rounded corners and smooth edges. It shall be furnished in the following sizes:

Size 1 - 3.495 ± .005 inches long by 1.725 ± .002 inches wide by 0.024 ± .003 inch thick.

Size 2 - 3.370 ± .005 inches long by 2.125 ± .002 inches wide by .025 ± .003 inch thick.

The card shall be blank white on one side with the other side imprinted in blue ink with Department of Defense seal and the legend shown on figure 1. A blank space shall be provided on the printed side to enable the medical facility to emboss patient identification data.

The printed side shall be laminated with a clear polyvinyl chloride material. The blank side shall be laminated with a polyvinyl chloride material and may be polished or a matte finish.

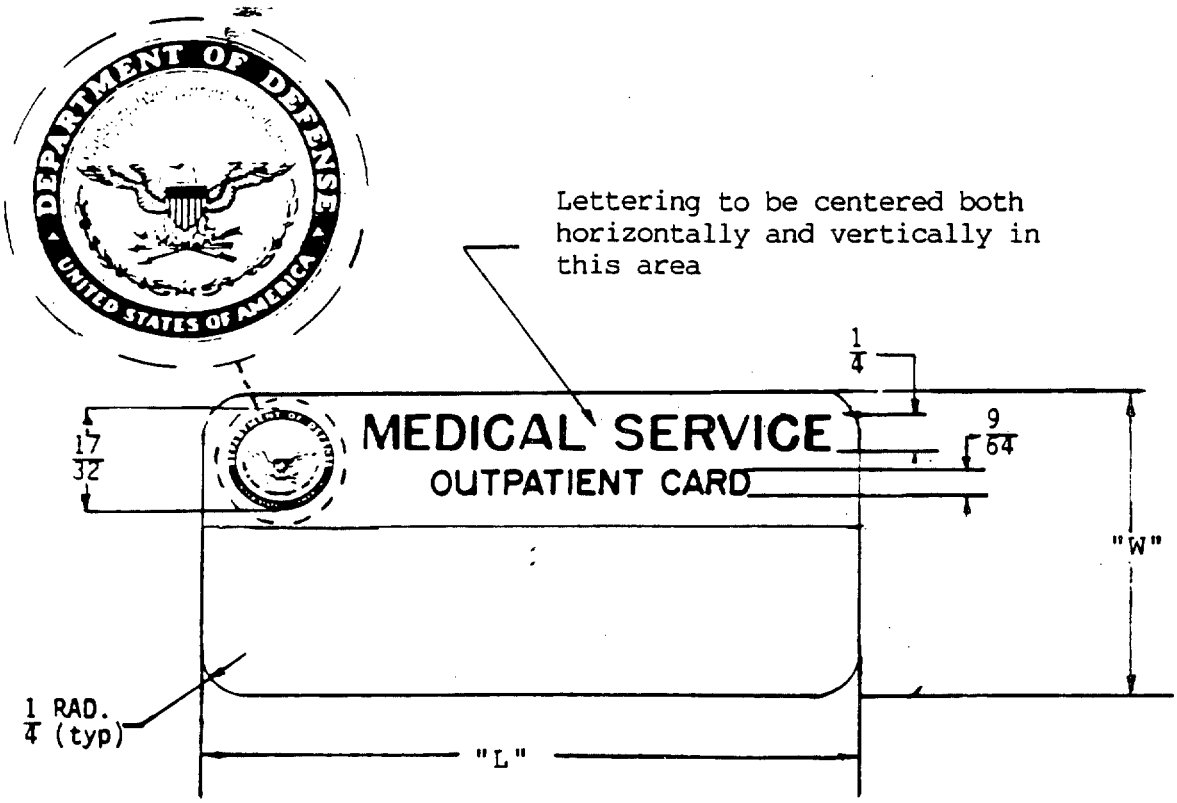

The legend on the printed side shall be centered both horizontally and vertically in the area adjacent to the Department of Defense seal. "Medical Service" letters shall be 1/4 inch high. "Outpatient Card" letters shall be 9/64 inch high.

The card shall be free of cuts, tears, or holes. The lamination shall be free of separations.

AMSC N/A FSC 7530

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

The card shall be clean and free of stains and foreign matter.

The card shall be in accordance with the latest issue of ANSI Standard X4.13, unless otherwise specified herein.

Workmanship. The identification card shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Package (PG). One package containing one thousand cards for size I or five hundred cards for size II, as specified, constitutes one unit.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Tests. Tests shall be conducted to determine compliance with specification requirements. Where feasible, the same sample shall be used for the determination of two or more test characteristics.

Sampling for examination. Sampling for examination shall be conducted in accordance with MIL-STD-105 with an AQL of 1.0 (percent defective) and an inspection level of II. The unit of product for sampling purposes shall be one identification card as specified in this description.

Defects.

Card not free of cuts, tears, or holes.

Lamination not free of separations.

Card not clean, not free of stains and foreign matter.

Card not white in color.

Color of marking not as specified.

Department of Defense seal missing.

Legend not clear and legible.

Sampling for tests. Sampling for tests including dimensional test, shall be conducted in accordance with MIL-STD-105, with an AQL of 2.5 (percent defective) and inspection level of S-1. The unit of product for tests purposes shall be one identification card.

Tests. Tests shall be conducted to determine compliance with specification requirements.

Flexibility test. The card shall be held lengthwise between two fingers and flexed so that the two ends touch together. The card shall then be allowed to straighten out. This shall be repeated five times. The card shall then be flexed 5 times in the opposite direction. The test shall then be repeated while holding the card widthwise. Any evidence of cracking or splitting for the card or lamination shall constitute a defect.

Embossing test. The card shall be embossed with the complete alphabet (A to Z inclusive) and the whole numbers from zero to nine inclusive. The card, after embossing, shall show no evidence of fracture or distortion. Any evidence of fracture or distortion shall constitute a defect.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580, as amended, and as implemented by Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

NOTE: The following National Stock Numbers are covered by this document:

7530-00-105-0101	(size 1)
7530-01-246-3802	(size 2)

Ordering data. Intermediate/exterior package quantities, labeling, and marking must be specified in the contract and/or order.
