COMMERCIAL ITEM DESCRIPTION

FOOTWEAR COVERS, OPERATING ROOM

The General Services Administration has authorized the use of this Commercial Item Description.

This Commercial Item Description covers a disposable, extra-large size, moisture resistant, conductive, low cut, footwear cover fabricated of nonwoven fabric suitable for one time, short term use by staff and visitors to surgical suites, and other areas where flammable liquids and gases are in use, and where an aseptic environment is essential.

Salient characteristics:

The footwear covers shall be fabricated of non-woven, moisture resistant spun bonded polypropylene fabric, with an elastic binding, stitched to the cover opening, and an elastic band stretched into a full length, sole seam, or as an alternate, an elastic band stitched from the front of the sole seam over the toe of the cover to the elastized opening. The construction shall be closed-back style, and be such that the cover can be worn over any men's shoe sizes 13 through 16, and held firmly to the shoe by the elastic binding and band. The spun bonded polypropylene shall have no known irritating or toxic element, be free of lint and objectionable odors, and have a minimum breaking strength of six pounds in the machine direction, and nine pounds in the cross direction when tested as specified. The elastic binding shall be stitched to the cover opening, so that the opening shall measure approximately nine (9) inches in diameter when manually stretched to its extreme opening without breaking. The cover shall be blue, green, aqua, or other light pastel shade.

Each shoe shall have a durable, carbon impregnated conductive strip. The conductive shall be firmly attached to the sole and shall be approximately 11 inches (27.94 cm) long. It shall extend beyond the attachment point at the heel for approximately 12 inches (30.48 cm), to be located for insertion in the wearer's shoe. The strip shall meet UL requirements.

AMSC N/A FSC 6532

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

The stitching shall be free of defects. The elastic binding and the elastic band shall be of a suitable width and sufficient elasticity and strength to secure the cover to the shoe, without deterioration of the cover, or of the snug fit during use. Thread breaks, skip and run-off shall be overstitched not less than one half inch. Skipped stitches or thread breaks shall be repaired. The thread tension shall be maintained, so that there shall not be any loose or tight stitching, and the lock shall be embedded in the materials sewn together. All thread ends shall be trimmed to a maximum length of one quarter inch.

The covers shall not contain any metal, spot, stain, non-specified hole, abraded area, tear, cut, mend, scratch, scorch, or needle chew.

Workmanship. The footwear covers shall be free from defects which detract from their appearance or impair their serviceability.

Unit. Package (PG). One package containing one hundred (100) pairs of footwear covers, as specified, constitutes one unit.

Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within the tolerances specified using conversion tables contained in the latest revision of Federal Standard 376, and all other requirements of this document are met.

If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch/pound units, a request should be made to the contracting officer to determine if the product is acceptable.

The contracting officer has the option of accepting or rejecting the product.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580, as amended, and as implemented by Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

NOTE: The following National Stock Number is covered by this document:

6532-01-162-2127

Ordering data. Intermediate/exterior package quantities, labeling, and marking must be specified in the contract and/or order.

INSTRUCTIONS: In a continuing effort to make our standardization documents better, the DoD provides this form for use in submitting comments and suggestions for improvements. All users of military standardization documents are invited to provide suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge *(DO NOT STAPLE)*, and mailed. In block 5, be as specific as possible about particular problem areas such as wording which required interpretation too rigid, restrictive, loose, ambiguous, or was incompatible, and give proposed wording changes which would alleviate the problems. Enter in block 6 any remarks not related to a specific paragraph of the document. If block 7 is filled out, an acknowledgement will be mailed to you within 30 days to let you know that your comments were received and are being considered.

NOTE: This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document*(s)* or to amend contractual requirements.
